Quiz 2026 HP HPE6-A88: Valid HPE Aruba Networking ClearPass Exam Valid Dumps Files

VerifiedDumps HPE Aruba Networking ClearPass Exam (HPE6-A88) Questions have numerous benefits, including the ability to demonstrate to employers and clients that you have the necessary knowledge and skills to succeed in the actual HPE6-A88 exam. Certified professionals are often more sought after than their non-certified counterparts and are more likely to earn higher salaries.

and promotions. Moreover, cracking the HPE Aruba Networking ClearPass Exam (HPE6-A88) exam helps to ensure that you stay up to date with the latest trends and developments in the industry, making you more valuable assets to your organization.

HPE Aruba Networking ClearPass Exam Sample Questions (Q102-Q107):

NEW QUESTION # 102

An IT administrator is setting up a new service and wants to ensure that non-compliant end hosts are automatically remediated. Which step should they take next?

- A. Select the Add new Posture Server link and configure a new server.
- B. Select the Posture Compliance check box, enable auto-remediation, and enter the Remediation URL.
- C. Select the Audit End-hosts check box and choose to perform an audit always.

Answer: B

Explanation:

ClearPass OnGuard provides the framework for endpoint health checks. In the service selection rules, enabling Posture Compliance tells ClearPass to look for a health token from the OnGuard agent. By selecting auto-remediation, the administrator allows the system to automatically trigger fixes (like starting a disabled firewall) or redirect the user to a Remediation URL where they can find instructions or software updates needed to become compliant.

NEW QUESTION # 103

In ClearPass, which service type would be most appropriate for authenticating corporate users via 802.1X? Response:

- A. Web Authentication
- B. 802.1X Wireless
- C. Guest Authentication
- D. RADIUS Enforcement

Answer: B

NEW QUESTION # 104

An organization hosting a large conference expects over 500 guests to require network access. They want to streamline the process and reduce the burden on their internal staff. Which feature should they implement to achieve this goal?

- A. Guest access with self-registration
- B. Guest access with pre-shared keys
- C. Basic guest access with internal account creation

Answer: A

Explanation:

For high-density events like conferences, manual account creation by IT staff is unscalable. Self-registration allows guests to navigate to a portal, enter their own details, and receive credentials without any administrative intervention. This offloads the entire management burden from the internal staff while still allowing the organization to collect visitor data and enforce terms of service.

NEW QUESTION # 105

A network engineer is installing a new HTTPS certificate on a ClearPass server to replace the built-in self-signed certificate. They want to ensure the certificate is trusted and properly installed. What critical step must they remember to avoid installation issues?

- A. Only install the certificate for the publisher
- B. Install the certificate without specifying the subject alternative names
- C. Include the entire certificate bundle with root CA and intermediate CA trusts

Answer: C

Explanation:

ClearPass requires the full certificate trust chain to validate and present the HTTPS certificate correctly. Including the server certificate along with all intermediate and root CA certificates ensures trust is established and prevents browser and service validation errors.

NEW QUESTION # 106

A company's IT department is tasked with ensuring data replication across multiple ClearPass servers while maintaining redundancy and failover capabilities. They need to perform license management operations for the cluster. Where should these license management operations be performed to ensure they are properly applied across the cluster?

- A. On a dedicated license server
- **B. On the publisher**
- C. On the server with the active Insights database

Answer: B

Explanation:

In a ClearPass cluster, the Publisher is the central "Source of Truth" for all configuration and licensing data.

While Subscriber nodes handle the actual authentication traffic, they receive their policy and license updates via replication from the Publisher. Therefore, all license management -including adding new license keys or re-allocating capacity-must be performed on the Publisher's web interface.

NEW QUESTION # 107

.....

As is known to us that pass rate is one of the most important standards when candidate choose the practice materials. The pass rate is 98.95% for HPE6-A88 training materials, and you can pass and get a certificate successfully.
