Best Analytics-Con-201 Practice | Latest Analytics-Con-201 Exam Fee

In order to serve you better, we have a complete system to you if you buy Analytics-Con-201 study materials from us. We offer you free demo for you to have a try before buying. If you are satisfied with the exam, you can just add them to cart, and pay for it. You will obtain the downloading link and password for Analytics-Con-201 Study Materials within ten minutes, if you don't, just contact us, we will solve the problem for you. After you buy, if you have some questions about the Analytics-Con-201 exam brandumps after buying you can contact our service stuff, they have the professional knowledge and will give you reply.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant

Sample Questions (Q31-Q36):

NEW QUESTION # 31

Universal Containers (UC) has a "Sales Manager" dashboard. UC has a compare table that has multiple groupings and columns added showing the Total and Subtotals of the numeric values. A consultant is asked to add additional groups to enhance details about UC's customers.

Which feature should the consultant use to make the navigation of the compare tables easier for the end user?

- A. Select the Enable Expand or Collapse option from the table properties.
- B. Create the table using SAQL query to accommodate this and make it user friendly.
- C. Scroll to the very end to see the details.

Answer: A

NEW QUESTION # 32

Universal Containers is setting up a Sales Analytics app to track the sales performance across all regions. The role hierarchy is well-structured with separate branches for various global regions.

Viewer access has been provided to the regional sales reps based on the following roles.

- * Regional Sales - APAC
- * Regional Sales - EMEA
- * Regional Sales - LATAM
- * Regional Sales - NA

The CRM Analytics project team receives a request to extend Editor access to the app to 20 'Superusers' across all regions.

What is the optimal solution?

- A. Create a new public group with these users and assign it the Editor app access.
- B. Create new roles for these users and assign them the Editor app access.
- C. Create a new sharing rule for these users and assign it the Editor app access.

Answer: A

NEW QUESTION # 33

A new picklist value was added for the Category field on the Account object. This field is already added as part of the Account object data sync and the respective recipe that uses this field.

The CRM Analytics team reports that when they start the recipe it runs successfully with no errors or warnings, but they are unable to see this new value on their existing dashboards.

What is the origin of this issue?

- A. The user who runs the dataflow/recipe does not have access to the field.
- B. The Integration User profile does not have access to the field.
- C. There are no records in Salesforce with this new picklist value.

Answer: C

NEW QUESTION # 34

Cloud Kicks needs a CRM Analytics consultant to install the Appointment Analytics App. After installation, they realize the wrong field was picked and the app did not have access to a newly created field that should be used instead of the old one.

What is the first step the consultant should take to prevent erroneous dataset/dashboard creation?

- A. Update the app with the new field after installation.
- B. Cancel running installations from Setup
- C. Stop the recipe from running in Data Manager.

Answer: C

Explanation:

If the wrong field is selected in the initial setup of an app or dataset, it is important to stop any data processing activities (like recipe executions) to prevent erroneous data from being loaded into datasets and dashboards. In this case, stopping the recipe from running in Data Manager is the correct first step. Once the recipe is stopped, the consultant can update the field selection or make other necessary corrections before restarting the process.

NEW QUESTION # 35

The CRM Analytics consultant at Universal Containers has set data syncs and recipe runs back to back. However, they notice that the data syncs and recipe run jobs fail repeatedly. Upon investigation, they realize the data syncs and recipes are tightly coupled which leads to too many runs being queued and eventually being canceled. How should the consultant resolve this issue?

- A. Enable priority scheduling to automatically queue shorter or smaller runs before longer or larger ones.
- B. Raise a case with Salesforce Support to help Increase the concurrency limits of the org.
- C. Set up failure notifications so that the CRM Analytics consultant gets notified when this happens and can fix the Issue.

Answer: A

NEW QUESTION # 36

.....

DumpsTorrent is an authoritative study platform to provide our customers with different kinds of Analytics-Con-201 practice torrent to learn, and help them accumulate knowledge and enhance their ability to pass the exam as well as get their expected scores. There are three different versions of our Analytics-Con-201 Study Guide: the PDF, the Software and the APP online. To establish our customers' confidence, we offer related free demos for our customers to download before purchase.
