To avoid this situation, we recommend you JN0-363 real dumps. This product contains everything you need to crack the JN0-363 certification exam on the first attempt. By choosing Prep4away's updated dumps, you don't have to worry about appearing in the Service Provider Routing and Switching, Specialist (JNCIS-SP) (JN0-363) certification exam. Prep4away Juniper JN0-363 Dumps are enough to get you through the Service Provider Routing and Switching, Specialist (JNCIS-SP) (JN0-363) actual exam on the first try.

Earning the JNCIS-SP certification is a valuable asset for IT professionals seeking to advance their careers in service provider environments. Certified professionals have demonstrated their ability to configure, monitor, and troubleshoot service provider routing and switching technologies using Junos OS. They are also equipped with the skills and knowledge to design and implement scalable, reliable, and secure networks for service providers.

The JN0-363 exam is designed to test the candidate's proficiency in configuring, monitoring, and troubleshooting Juniper Networks' SRX Series Services Gateways and MX Series 3D Universal Edge Routers in a service provider environment. JN0-363 exam consists of multiple-choice questions, simulations, and scenario-based questions that test the candidate's ability to apply their theoretical knowledge to real-world scenarios. The Juniper JN0-363 Exam is a comprehensive test that requires in-depth knowledge of service provider routing and switching and is an excellent way for professionals to demonstrate their expertise in this field.

Juniper JN0-363 exam covers a wide range of topics that are relevant to the service provider industry. These topics include routing protocols, MPLS, Layer 2 and Layer 3 VPNs, BGP, and multicast. Candidates who pass JN0-363 exam will have a deep

understanding of these technologies and will be able to apply this knowledge in real-world situations.

Test JN0-363 Duration, Valid JN0-363 Test Review

Everybody hopes he or she is a successful man or woman no matter in his or her social life or in his or her career. Thus owning an authorized and significant certificate is very important for them because it proves that he or she boosts practical abilities and profound knowledge in some certain area. Passing JN0-363 Certification can help they be successful and if you are one of them please buy our JN0-363 guide torrent because they can help you pass the exam easily and successfully.

Juniper Service Provider Routing and Switching, Specialist (JNCIS-SP) Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two statements are correct about IS-IS? (Choose two.)

- A. For level 2 adjacencies, the area IDs must be the same.
- B. A level 1 only router can form an adjacency with a level 2 only router.
- C. A level 1 only router can never form an adjacency with a level 2 only router.
- D. For level 2 adjacencies, the area IDs can be different.

Answer: C,D

Explanation:

A Level 1 router can become adjacent with the Level 1 and Level 1-2 (L1/L2) router. A Level 2 router can become adjacent with Level 2 or Level 1-2 (L1/L2) router. There is no adjacency between L1 only and L2 only router. HOWEVER: If two routers are in different areas, they can only form a Level 2 adjacency. As such, two routers in different areas can NOT form a Level 1 adjacency. If you want two routers to form a Level 1 adjacency, they have to be in the same area.

NEW QUESTION # 38

You are asked to configure and apply a new routing policy to influence routing advertisements received from a specific EBGP peer. In this scenario, which statement is true?

- A. The new policy should be applied as an import policy for the specific EBGP peer.
- B. The new policy should be applied as an export policy for the specific EBGP peer.
- C. The new policy should be applied as an export for the EBGP group in which the peer is defined.
- D. The new policy should be applied as an import policy for the EBGP group in which the peer is defined.

Answer: A

NEW QUESTION # 39

Which two statements are true when considering logical systems? (Choose two.)

- A. Logical tunnels cannot be used to connect logical systems
- B. Logical systems do not support nonstop active routing
- C. Logical systems share the master routing table and can create routing instances
- D. Logical systems provide management separation by providing user access per logical system

Answer: A,D

Explanation:

https://www.juniper.net/documentation/en_US/junos/topics/topic-map/security-logical-systems-for-routers-and-switches.html

NEW QUESTION # 40

Exhibit

```
Exhibit
root@R1> show configuration protocols isis
interface ge-0/0/0.0 {
}
interface ge-0/0/1.0 {
}
interface lo0.0;
level 1 disable;
level 2 wide-metrics-only;
reference-bandwidth 100g;
root@R1> show configuration interfaces ge-0/0/0
unit 0 {
  family inet {
    address 10.1.2.1/30;
  }
  family inet {
    address 10.1.2.1/30;
  }
  family inet6;
  family mpls;
}
root@R1> show isis adjacency
Interface      System      L State      Hold (secs) SNPA
ge-0/0/1.0     NETWORKS    2 Up         19
```

You configured interface ge-0/0/0.0 to run IS-IS. but this interface does not appear in the output of the show isis adjacency command as shown in the exhibit.

What is the problem in this scenario?

- A. The router at the other end of the link is a Level 1 only router.
- B. The router at the other end of the link is not sending any IS-IS Hello messages.
- C. This is a Gigabit Ethernet interface, that is incompatible with the reference-bandwidth 100g statement.
- **D. The family iso statement must be added to the logical interface.**

Answer: D

NEW QUESTION # 41

Router A receives two similar route advertisements from different BGP peers. What would cause a route to be selected in this scenario?

- **A. having a lower MED value**
- B. learning a route from a peer with a higher peer ID
- C. having a lower local preference
- D. learning a route from a peer with a higher IGP metric

Answer: A

NEW QUESTION # 42

.....

The importance of cracking the Professional Juniper JN0-363 Certification test is increasing, and almost everyone is taking it to validate their skills. Service Provider Routing and Switching, Specialist (JNCIS-SP) (JN0-363) has tried its best to make this learning material the best and most user-friendly, so the candidates don't face excessive issues. The applicants can easily prepare from our real Service Provider Routing and Switching, Specialist (JNCIS-SP) Exam QUESTIONS and clear test within a few days.
