

Practical Latest RCA Exam Simulator | Easy To Study and Pass Exam at first attempt & Efficient Relativity Relativity Certified Administrator

RCA EXAM PREP (RELATIVITY CERTIFIED ADMINISTRATOR EXAM PREP) WITH CORRECT ACTUAL QUESTIONS AND CORRECTLY WELL DEFINED ANSWERS LATEST 2024 – 2025 ALREADY GRADED A+

What does a green check mark next to a field in the layout indicate? - ANSWERS- That the field is currently copying coding from the previous document.

What fields are available in the Add Text to Layout Form? - ANSWERS-Category, Row, Column, Order, Custom Text

How can you make items on a layout collapsible? - ANSWERS-Go to the Category Information and choose options for (1) Collapsible and (2) Collapsed By Default.

What does a question mark icon in a layout indicate? - ANSWERS-That a category contains contextual help information.

Which options can be changed from within the 'My Settings' window:

The Easy4Engine wants to help students ace the certification exam preparation. To achieve this goal the Easy4Engine is offering real, valid, and updated exam questions in three different formats. These Relativity RCA exam questions formats are PDF file, desktop practice test software, and web-based practice test software. All these three RCA Exam Practice question formats are easy to use. The RCA desktop practice test software and web-based practice test software both are the easy-to-use mock Relativity Certified Administrator (RCA) exam. These RCA mock exams are designed to simulate the conditions of a real exam.

The exam questions and answers of general Relativity certification exams are produced by the Relativity specialist professional experience. Easy4Engine just have these Relativity experts to provide you with practice questions and answers of the exam to help you pass the exam successfully. Our Easy4Engine's practice questions and answers have 100% accuracy. Purchasing products of Easy4Engine you can easily obtain Relativity certification and so that you will have a very great improvement in RCA area.

Relativity RCA Questions – Reduce Your Chance of Failure [2026]

Another great way to assess readiness is the RCA web-based practice test. This is one of the trusted online Relativity RCA prep materials to strengthen your concepts. All specs of the desktop software are present in the web-based Relativity RCA Practice

Exam. MS Edge, Opera, Firefox, Chrome, and Safari support this RCA online practice test.

Relativity Certified Administrator Sample Questions (Q74-Q79):

NEW QUESTION # 74

How do you move a job to the front of the Branding queue?

- A. Change the job's submitted date / time.
- B. Cancel and restart the job.
- C. Change the job's priority to the highest value in the queue.
- **D. Change the job's priority to the lowest value in the queue.**

Answer: D

Explanation:

The correct answer is C. Change the job's priority to the lowest value in the queue. Relativity's Branding queue documentation states that only one job runs at a time and the lower numbered job runs first while the higher numbered job runs last. It also explains that you can move jobs by using Change Priority and entering a new integer value. Since lower numbers represent higher queue priority, moving a job to the front means assigning it the lowest priority number among the queued jobs.

This rules out option D, which reverses the queue logic. Changing submitted date/time is not the documented control for moving a branding job forward, and canceling/restarting is unnecessary when Relativity already provides a queue-priority control. Therefore, to move a job to the front of the Branding queue, you change its priority to the lowest value in the queue.

NEW QUESTION # 75

When should you run OCR on a production?

- A. After a document is redacted.
- **B. After a production is exported.**
- C. Before a production is run.
- D. Before a production is exported.

Answer: B

NEW QUESTION # 76

What is the recommended workflow for exporting produced PDFs with a corresponding load file?

- A. Download PDFs from the Viewer.
- B. Use the PDF mass action.
- C. Run a PDF production export from the RelativityOne Staging Explorer ROSE.
- **D. Export the production set as PDFs using Import/Export.**

Answer: D

Explanation:

The correct answer is C. Export the production set as PDFs using Import/Export. Relativity's official Import/Export documentation states that Import/Export is the recommended method for importing and exporting data for RelativityOne , and the production export workflow specifically supports exporting a production set load file with production files. The production export workflow is the documented method for exporting production sets and their associated deliverables in a structured, transferable form.

This makes it the best fit for the question's requirement: produced PDFs with a corresponding load file .

The PDF mass action is a separate document-level utility for creating PDFs from documents, natives, images, or produced documents, but it is not the standard production export workflow for packaging a production with its corresponding load file.

Downloading PDFs from the Viewer is a manual review action, not a formal production export workflow. ROSE is used for large-scale data transfer to and from RelativityOne storage, but the product documentation positions Import/Export as the recommended export mechanism for production sets and related load files.

So, from a Productions and RCA workflow perspective, the recommended method is to export the production set as PDFs using Import/Export .

NEW QUESTION # 77

How can you modify a dtSearch index?

- A. Configure the index to be accent sensitive.
- B. Add a repeated content filter.
- C. Configure the index to translate search terms into multiple languages.
- D. The dtSearch index is automatically built upon import and is not customizable.

Answer: A

Explanation:

The correct answer is A. Configure the index to be accent sensitive. Relativity's official dtSearch index documentation lists Create accent sensitive as a configurable Yes/No setting on a dtSearch index. When enabled, the index becomes sensitive to accents and other language-specific characters. This is an example of a valid dtSearch index modification that an administrator can configure. The other options are incorrect. Relativity does not document a dtSearch feature that translates search terms into multiple languages, so option B is not a valid dtSearch index modification. A repeated content filter is associated with Analytics workflows, not dtSearch index configuration, so option C is also wrong. Option D is clearly incorrect because dtSearch indexes are not simply automatic and fixed upon import; Relativity provides a dedicated dtSearch object with editable settings such as searchable set, sub-index sizing behavior, skip malicious files, and accent sensitivity. From an RCA perspective, this matters because dtSearch is a configurable search technology in Relativity, and administrators are responsible for tuning it for the needs of a workspace. Accent sensitivity can materially affect search precision in multilingual or language-specific datasets. Therefore, the correct answer is A .

NEW QUESTION # 78

When using Mass PDF, what field type can you use to name the file?

- A. Artifact ID
- B. Date
- C. Fixed length text
- D. Single choice

Answer: C

Explanation:

The correct answer is D. Fixed length text . Relativity's Mass PDF documentation states that when saving PDFs as a ZIP or PDF portfolio , you can choose to name the individual PDFs using the control number , the control number plus a field , or just a field . In other words, Relativity supports file naming from a document field value. The same documentation also notes that long names are truncated if they exceed the allowed length, which confirms that the chosen field value is being used directly as part of the resulting file name.

Among the answer choices, fixed length text is the best and most appropriate field type for this purpose. A fixed length text field is designed to store concise string values that work well as filenames. Artifact ID is not a field type in this context, but rather a system identifier. Date fields can exist, but they are not the standard answer for naming PDFs in an exam question framed around field type suitability. Single choice stores coded values and is not the expected best answer here. This question appears to test practical Relativity administration knowledge rather than every technically possible field serialization outcome. Since Mass PDF naming relies on a field value and file names are most appropriately based on text metadata, the correct exam- aligned answer is fixed length text . The Relativity documentation supports the field-based naming capability, and the selection of fixed length text is the most reasonable administrative interpretation from the provided options.

NEW QUESTION # 79

.....

Are you still satisfied with your present job? Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no, you are a right place now. Because our RCA exam torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our RCA Guide questions, you will pass the RCA exam and achieve your target.
