Using our products does not take you too much time but you can get a very high rate of return. Our Arch-303 quiz guide is of high quality, which mainly reflected in the passing rate. We can promise higher qualification rates for our Arch-303 exam question than materials of other institutions. Because our products are compiled by experts from various industries and they are based on the true problems of the past years and the development trend of the industry. What's more, according to the development of the time, we will send the updated materials of Arch-303 Test Prep to the customers soon if we update the products. Under the guidance of our study materials, you can gain unexpected knowledge. Finally, you will pass the exam and get a Salesforce certification.

The Salesforce Certified B2C Commerce Architect (Arch-303) questions is currently in use by many customers, and they are preparing for the test effectively. The applicants who used it previously to prepare for the Arch-303 certification exam have rated our Arch-303 Dumps as one of the best. Our customers receive Salesforce Certified B2C Commerce Architect (Arch-303) questions updates for up to 365 days after their purchase.

## Released Salesforce Arch-303 Questions Tips For Better Preparation [2026]

Salesforce Arch-303 practice test software contains many Salesforce Arch-303 practice exam designs just like the real Salesforce Certified B2C Commerce Architect (Arch-303) exam. These Arch-303 practice exams contain all the Arch-303 questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final Arch-303 Exam. Salesforce Certified B2C Commerce Architect (Arch-303) practice test is customizable so that you can change the timings of each session. PDF4Test desktop Salesforce Arch-303 practice test questions software is only compatible with windows and easy to use for everyone.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q31-Q36):

### NEW QUESTION # 31

While validating a LINK Cartridge for inclusion into the solution, an Architect notices that the UNK cartridge documentation requires the Architect to add a script node to a Pipeline in the storefront cartridge. The script is also a valid CommonJS module. Which approach can the Architect use to Integrate this cartridge into a site that uses Controllers only?

- A. Add the script that is required via a require statement in the Controller, add the appropriate arguments, and execute the correct method.
- B. Copy and paste the script that is required directly into the Controller, add the appropriate arguments, then execute the correct method
- C. Add the script that is required via an import\$script statement in the Controller, add the appropriate arguments, and execute the correct method.
- D. Add the script that is required via a Module, exports statement in the Controller add the appropriate arguments, and execute the correct method.

**Answer: A**

Explanation:

In a site using Controllers, the most efficient way to integrate a script from a LINK cartridge that is also a valid CommonJS module is by using a require statement. This method enables the Architect to modularly load the necessary script, passing in any arguments that the script needs to function correctly within the existing Controller framework. This approach maintains modularity and adherence to the CommonJS module pattern, making it the most suitable for seamless integration.

### NEW QUESTION # 32

Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job that updates this tracking number for exported orders, which were last modified yesterday.

Part of this job's code looks like the following:

Based on the above description and code snippet, which coding best practice should the Architect enforce?

- A. Standard order import should be used instead of modifying multiple order objects with custom code.
- B. Post-processing of search results is a bad practice that needs to be corrected.
- C. The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.
- D. Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.

**Answer: D**

Explanation:

Given that the OMS provides a web-service interface and updates tracking numbers for orders modified the previous day, it is crucial to manage the potential risks of service unavailability or delays that could lead to thread exhaustion in Salesforce Commerce Cloud. Implementing a circuit breaker pattern helps to manage failures gracefully by halting the interaction with the OMS if it becomes unresponsive, thereby preventing the service from impacting the entire system. Additionally, configuring timeouts ensures that the service calls do not hold up resources indefinitely. These strategies help maintain system stability and responsiveness, particularly when dealing with external systems over which there may be limited control.

### NEW QUESTION # 33

A business wants to migrate its customer service provider from provider A to provider B. Provider B offers a LINK cartridge to integrate with its commerce solution.

Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices
- B. Document how the customer online journey flows from landing on the page to placing of the order
- C. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- D. Document the data objects, the interface, and data synchronization frequency between the systems.
- E. Document the data mapping between commerce and customer service provider.

**Answer: A,C,D**

Explanation:

When integrating a new LINK cartridge for a customer service provider, the following documents are essential:

\* Option A (Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices): This ensures that the cartridge is implemented in a manner that is consistent with established best practices, enhancing maintainability and compatibility.

\* Option B (Document the data objects, the interface, and data synchronization frequency between the systems): It's crucial to define how data will flow between the new customer service provider and the commerce system, including the frequency of synchronization to ensure data integrity and timeliness.

\* Option D (Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs): Customizing the cartridge to fit the specific needs and existing setup of the commerce system ensures that the integration adds the intended value without disrupting existing operations.

These artifacts will guide the structured integration and customization of the LINK cartridge, ensuring it meets the business's operational and strategic needs.

### NEW QUESTION # 34

An Architect is documenting the technical design for a single B2C Commerce storefront. The Client has a business requirement to provide pricing that is customized to specific groups:

- \* 50 different pricing groups of customers
- \* 30 different pricing groups of employees
- \* 10 different pricing groups of vendors

Which items should the Architect include in the design in order to set applicable price books based on these requirements? Choose 2 answers

- A. - One customer group and 50 subgroups for customers- One customer group and 30 subgroups for employees- One customer group and 10 subgroups for vendors
- B. - One campaign and multiple promotions for each customer group
- C. - One promotion and 50 campaigns for customers- One promotion and 30 campaigns for employees- One promotion and 10 campaigns for vendors
- D. - 50 customer groups for customers- 30 customer groups for employees- 10 customer groups for vendors

**Answer: B,D**

Explanation:

For handling multiple pricing groups with specific discounts or prices for different customer groups, the optimal approach involves setting up separate customer groups for customers, employees, and vendors (Answer A). This setup allows the storefront to apply specific price books to each group accurately based on their designation. Furthermore, utilizing campaigns and multiple promotions tailored to each customer group (Answer C) facilitates targeted marketing efforts and pricing strategies effectively. These practices ensure that each group receives relevant pricing adjustments and promotional offers, thereby enhancing the shopping experience and managing financial transactions efficiently within Salesforce B2C Commerce.

### NEW QUESTION # 35

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should update all the deprecated API calls in the already integrated LINK cartridge and test thoroughly.
- B. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.
- C. The Architect should check to see if the LINK cartridge has been updated already, integrate it, apply the customizations, and test thoroughly.
- D. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.

**Answer: C**

Explanation:

When facing a deprecated API that is used in a LINK integration cartridge, the recommended approach is to check for an updated version of the cartridge that may have replaced the deprecated API with a supported one.

If an update is available:

- \* Integrate the updated cartridge into the site, ensuring compatibility with the current site configuration.
- \* Re-apply customizations that were made to the original cartridge to maintain functional consistency.
- \* Thorough testing should be conducted to ensure that the integration works seamlessly without causing disruptions in the site's functionality.

This approach minimizes effort by leveraging updates provided by the cartridge vendor while ensuring the site remains functional and compliant with current API standards.

### NEW QUESTION # 36

.....
