2026 Valid Salesforce-MuleSoft-Developer-I Latest Test Questions | Salesforce-MuleSoft-Developer-I 100% Free Authorized Exam Dumps

Salesforce-MuleSoft-Developer-I training materials are compiled by experienced experts, and therefore they cover most knowledge points of the exam, and you can also improve your ability in the process of learning. Salesforce-MuleSoft-Developer-I exam dumps not only contain quality but also contain certain quantity, and they will be enough for you to pass the exam and get the certificate. In addition, we are pass guarantee and money back guarantee if you fail to pass the exam. We offer you free update for 365 days after you purchase the Salesforce-MuleSoft-Developer-I training materials.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 2	Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 3	Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 4	Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 5	Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 6	Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.
Topic 7	Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 8	Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q126-Q131):

NEW QUESTION # 126

A Mule project contains a DataWeave module like WebStore.dwl that defines a function named loginUser.

The module file is located in the project's src/main/resources/libs/etl folder.

What is correct DataWeave code to import all of the WebStore.dwl file's functions and then call the loginUser function for the login "Todd.Pal@mulesoft.com"?

- A. 1. 1. import * from libs::etl 2. --- 3. WebStore::loginUser("Todd.Pal@mulesoft.com")

- B. 1. 1. import libs.etl2. 2. ---3. 3. WebStore.loginUser("Todd.Pal@mulesoft.com")
- C. 1. 1. import * from libs::etl::WebStore2. 2. ---3. 3. loginUser("Todd.Pal@mulesoft.com")
- D. 1. 1. import libs.etl.WebStore2. 2. ---3. 3. loginUser("Todd.Pal@mulesoft.com")

Answer: C

Explanation:

* To use custom modules, you need to import the module or functions you want to use by adding the import directive to the head of your DataWeave script, for example:

1) Does not identify any functions to import from the String module:

```
import dw::core::Strings
```

2) To identify a specific function to import from the String module:

```
import camelize, capitalize from dw::core::Strings
```

3) To import all functions from the String module:

```
import * from dw::core::Strings
```

The way you import a module impacts the way you need to call its functions from a DataWeave script. If the directive does not list specific functions to import or use * from to import all functions from a function module, you need to specify the module when you call the function from your script.

*In given scenario, it's mentioned to import all of the WebStore.dwl

So correct answer is:

Reference:<https://docs.mulesoft.com/mule-runtime/4.3/dw-functions>

NEW QUESTION # 127

Refer to the exhibit.

What is the correct way to create a user?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: A

NEW QUESTION # 128

Refer to the exhibits.

The main flow contains a Flow Reference to the child flow.

A web client sends a GET request to the main flow's HTTP Listener that includes a make query parameter.

What values are accessible in the child flow?

- A. payload
make query param model var
- B. payload
make query param
- C. payload
model var
- D. payload

Answer: A

NEW QUESTION # 129

A

web client submits a request to <http://localhost:8081/books/0471767840>. The value

"0471767840" is captured by a Set Variable transformer to a variable named bookISBN.

What is the DataWeave expression to access bookISBN later in the flow?

- A. bookISBN
- B. attributes.bookISBN

- C. flowVars.bookISBN
- **D. vars. bookISBN**

Answer: D

NEW QUESTION # 130

Refer to the exhibits. The main flow contains an HTTP Request in the middle of the flow. The HTTP Listeners and HTTP Request use default configurations.

A web client submits a request to the main flow's HTTP Listener that includes query parameters for the pedigree of the piano. What values are accessible to the Logger component at the end of the main flow?

- A. payload
pedigree query params
- **B. payload
producer var**
- C. payload
pedigree query params producer var
- D. payload

Answer: B

Explanation:

In this case as outbound call is made using HTTP: POST /child , all attributes will be replaced by this invocation. Hence query parameter will not be accessible at logger. Hence correct answer is option 2

NEW QUESTION # 131

.....

The majority of people encounter the issue of finding extraordinary Salesforce Salesforce-MuleSoft-Developer-I exam dumps that can help them prepare for the actual Salesforce Certified MuleSoft Developer (Mule-Dev-201) exam. They strive to locate authentic and up-to-date Salesforce Salesforce-MuleSoft-Developer-I Practice Questions for the Salesforce Salesforce-MuleSoft-Developer-I exam, which is a tough ask.
