A company is deploying a pair of Cisco Secure Firewall Threat defence devices named FTD1 and FTD2.
FTD1 and FTD2 have been configured as an active/standby pair with a failover link but without a stateful link. What must be implemented next to ensure that users on the internal network still communicate with outside devices if FTD1 fails?

- A. Set maximum secured addresses to two on the switch interfaces on FTD1 and FTD2.
- B. Configure the spanning-tree PortFasI feature on SW1 and FTD2
- C. Disable port security on the switch interfaces connected to FTD1 and FTD2.
- D. Connect and configure a stateful link and thon deploy the changes.

Answer: D

Explanation:
In a failover configuration with Cisco Secure Firewall Threat Defense (FTD) devices, ensuring that users on the internal network can continue to communicate with outside devices if the primary device (FTD1) fails requires the implementation of a stateful failover link. The stateful failover link allows the secondary device (FTD2) to maintain session information and state data, ensuring seamless failover and minimizing disruptions.
Steps to implement a stateful failover link:
* Physically connect a stateful failover link between FTD1 and FTD2.
* Configure the stateful failover link in the FMC.
* Ensure that both devices are properly synchronized and that stateful failover is enabled.
* Deploy the changes to both FTD devices.
By configuring a stateful link, the secondary FTD can take over active sessions without requiring users to re- establish their connections, thus ensuring continuous communication.

NEW QUESTION # 230
A company wants a solution to aggregate the capacity of two Cisco FTD devices to make the best use of resources such as bandwidth and connections per second. Which order of steps must be taken across the Cisco FTDs with Cisco FMC to meet this requirement?

- A. Configure the Cisco FTD interfaces and cluster members, add members to Cisco FMC, and create the cluster in Cisco

FMC
- B. Add members to Cisco FMC, configure Cisco FTD interfaces in Cisco FMC, configure cluster members in Cisco FMC, create cluster in Cisco FMC, and configure cluster members in Cisco FMC
- C. Configure the Cisco FTD interfaces, add members to FMC, configure cluster members in FMC, and create cluster in Cisco FMC
- D. Add members to the Cisco FMC, configure Cisco FTD interfaces, create the cluster in Cisco FMC, and configure cluster members in Cisco FMC

Answer: A

Explanation:
In Chassis manager, you (STEP1) config the interfaces, create the cluster and add nodes, then you (STEP2) switch to FMC to add the units to FMC and build the cluster there.
