Microsoft PL-200 Quiz - PL-200 Studienanleitung & PL-200 Trainingsmaterialien

Das Ziel der Microsoft PL-200 Prüfungssoftware ist: Bei Ihrer Vorbereitung der Microsoft PL-200 Prüfung Ihnen die effektivste Hilfe zu bieten, um Ihre Geld nicht zu verschwenden und Ihre Zeit zu sparen. Unsere Software hat schon zahllose Prüfungsteilnehmer geholfen, Microsoft PL-200 Prüfung zu bestehen. Wenngleich die Bestehensquote sehr hoch ist, versprechen wir, dass wir alle Ihrer Gebühren für die Microsoft PL-200 Software erstatten wollen, falls Sie die Prüfung nicht bestehen. Wir tun so, um Sie beim Kauf unbesorgt zu machen.

Microsoft Power Platform Functional Consultant PL-200 Prüfungsfragen mit Lösungen (Q222-Q227):

222. Frage

You need to address the executive's concerns regarding unnecessary data access.

Which security changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

Assign records to the user doing the verification and change table security to basic.
Assign records to a service account and share the record with the team member doing the verification.
Assign records to a service account and add the team member doing the verification by using an access team.

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

Assign records to the QV team when the service request is completed.
Assign records to a service account when the service request is completed.
Assign records to the team member doing the verification when the service request is completed.

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

Assign records to the user doing the verification and change table security to basic.
Assign records to a service account and share the record with the team member doing the verification.
Assign records to a service account and add the team member doing the verification by using an access team.

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

Assign records to the QV team when the service request is completed.
Assign records to a service account when the service request is completed.
Assign records to the team member doing the verification when the service request is completed.

Explanation

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.
When to use access teams

- * The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.
- * The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.
- * A unique set of users requires access to a single record without having an ownership of the record.

Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

- * When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

A company's sales staff wants a simplified way to manage their opportunities in Dynamics 365 Sales without adding custom code. You need to provide a solution for each requirement. Which solutions should you provide? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Solution
Drag and drop opportunities to change the stage.	Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control.
Show each salesperson their opportunities in Calendar and Kanban view.	Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view.
Show each salesperson the number of open opportunities by stage in a standard view.	Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view.

Antwort:

Begründung:

Requirement	Solution
Drag and drop opportunities to change the stage.	Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control.
Show each salesperson their opportunities in Calendar and Kanban view.	Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view.
Show each salesperson the number of open opportunities by stage in a standard view.	Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view.

Explanation

Graphical user interface, text, application, email Description automatically generated

Requirement	Solution
Drag and drop opportunities to change the stage.	Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control.
Show each salesperson their opportunities in Calendar and Kanban view.	Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view.
Show each salesperson the number of open opportunities by stage in a standard view.	Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view.

Box 1: Add a Kanban control.

The Kanban view allows your sales team to move opportunities from one stage to another by simply dragging them.

Box 2: Add both controls to the My Opportunities view.

Kanban views help salespeople to manage their opportunities and activities effectively. Add the Kanban control to the Opportunity and Activity entity so salespeople can use the Kanban views. The Kanban control works only on the Opportunity and Activity entities.

If you use unified interface, you can display any record in a calendar view via the calendar control.

- Go to Settings->Customization->Customize the System
- Open the configuration for the entity that you want to use the calendar control (Opportunities in our example)
- Click the View tab
- Click "Add Control" and select the calendar control.
- Click the dot for every interface from which you want the calendar control to be available.

Box 3: Use a List view

opportunities in Dynamics 365 Sales

226. Frage

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.

The changes must meet the following requirements:

- * Must be clearly identified so that they are not confused with system components and components from other solutions.
- * Must not affect any existing components in the test environment.

You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a new unmanaged solution and select the correct publisher.	
Create a new publisher.	
Select a managed solution and add the correct publisher.	
Add the table with all components to the solution.	
Choose an existing publisher.	
Add the table to the solution and add the new column.	
Run the solution checker on the solution.	

Antwort:

Begründung:

Actions	Answer area
Create a new unmanaged solution and select the correct publisher.	Create a new publisher.
Create a new publisher.	Create a new unmanaged solution and select the correct publisher.
Select a managed solution and add the correct publisher.	
Add the table with all components to the solution.	Add the table to the solution and add the new column.
Choose an existing publisher.	
Add the table to the solution and add the new column.	
Run the solution checker on the solution.	Run the solution checker on the solution.

Explanation

Answer area
Create a new publisher.
Create a new unmanaged solution and select the correct publisher.
Add the table to the solution and add the new column.
Run the solution checker on the solution.

Step 1: Create a new publisher

Solution publisher

Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.

Step 2: Create a new unmanaged solution and select the correct publisher
Unmanaged solutions are used in development environments while you make changes to your application.

Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table to the solution and add the new column.

Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.
