PECB Certified ISO/IEC 27001 Lead Auditor exam Sample Questions (Q146-Q151):

NEW QUESTION # 146

Prior to initiating the audit activities, the auditors considered the auditee's context, critical processes, and expectations. Which auditing principle has been applied?

- A. Due professional care
- B. Integrity
- C. Professional skepticism

Answer: A

Explanation:

Comprehensive and Detailed In-Depth

A . Correct Answer:

Due professional care refers to auditors carefully considering all relevant factors before initiating an audit.

In this scenario, the auditors assessed the auditee's context, processes, and expectations, which aligns with ISO 19011:2018 Clause 4 (Principles of Auditing: Due Professional Care).

B . Incorrect:

Professional skepticism is about challenging evidence and avoiding assumptions, not about contextual planning.

C . Incorrect:

Integrity refers to acting honestly and ethically, which is not the focus here.

Relevant Standard Reference:

ISO 19011:2018 Clause 4.5 (Due Professional Care)

NEW QUESTION # 147

Scenario 7: Lawsy is a leading law firm with offices in New Jersey and New York City. It has over 50 attorneys offering sophisticated legal services to clients in business and commercial law, intellectual property, banking, and financial services. They believe they have a comfortable position in the market thanks to their commitment to implement information security best practices and remain up to date with technological developments.

Lawsy has implemented, evaluated, and conducted internal audits for an ISMS rigorously for two years now.

Now, they have applied for ISO/IEC 27001 certification to ISMA, a well-known and trusted certification body.

During stage 1 audit, the audit team reviewed all the ISMS documents created during the implementation.

They also reviewed and evaluated the records from management reviews and internal audits.

Lawsy submitted records of evidence that corrective actions on nonconformities were performed when necessary, so the audit team interviewed the internal auditor. The interview validated the adequacy and frequency of the internal audits by providing detailed insight into the internal audit plan and procedures.

The audit team continued with the verification of strategic documents, including the information security policy and risk evaluation criteria. During the information security policy review, the team noticed inconsistencies between the documented information describing governance framework (i.e., the information security policy) and the procedures.

Although the employees were allowed to take the laptops outside the workplace, Lawsy did not have procedures in place regarding the use of laptops in such cases. The policy only provided general information about the use of laptops. The company relied on employees' common knowledge to protect the confidentiality and integrity of information stored in the laptops. This issue was documented in the stage 1 audit report.

Upon completing stage 1 audit, the audit team leader prepared the audit plan, which addressed the audit objectives, scope, criteria, and procedures.

During stage 2 audit, the audit team interviewed the information security manager, who drafted the information security policy. He justified the Issue identified in stage 1 by stating that Lawsy conducts mandatory information security training and awareness sessions every three months.

Following the interview, the audit team examined 15 employee training records (out of 50) and concluded that Lawsy meets requirements of ISO/IEC 27001 related to training and awareness. To support this conclusion, they photocopied the examined employee training records.

Based on the scenario above, answer the following question:

The audit team photocopied the examined employee training records to support their conclusion. Should the audit team obtain an approval from Lawsy before taking this action? Refer to scenario 7.

- A. Yes, the audit team should obtain the approval of the auditee when verifying the existence of a process in all cases, including when taking notes and photocopying documents
- **B. Yes, the audit team can photocopy documents observed during the audit if the auditee agrees to it**
- C. No, the audit team has the authority to photocopy documents in order to verify the conformity of a certain document to the audit criteria

Answer: B

Explanation:

Yes, the audit team should obtain approval from Lawsy before photocopying documents. This is a best practice to ensure that the auditee agrees to the duplication of documents, which might contain sensitive or confidential information. Although auditors can observe and note down information, copying documents typically requires explicit permission to maintain trust and ensure compliance with confidentiality agreements.

NEW QUESTION # 148

You are the person responsible for managing the audit programme and deciding the size and composition of the audit team for a specific audit. Select the two factors that should be considered.

- A. The duration preferred by the auditee
- B. Customer relationships
- C. The audit scope and criteria
- D. The overall competence of the audit team needed to achieve audit objectives
- E. The cost of the audit
- F. Seniority of the audit team leader

Answer: C,D

Explanation:

Explanation

The overall competence of the audit team:

The audit scope and criteria: The audit scope defines the extent and boundaries of the audit, such as the locations, processes, functions, and time period to be audited. The audit criteria are the set of policies, procedures, standards, or requirements used as a reference against which the audit evidence is compared.

The audit scope and criteria determine the complexity and extent of the audit, and thus influence the number and expertise of the auditors needed to cover all the relevant aspects of the audit.

The overall competence of the audit team needed to achieve audit objectives: The audit team should have the appropriate knowledge, skills, and experience to conduct the audit effectively and efficiently, and to provide credible and reliable audit results.

The audit team competence should include the following elements:

Generic competence: The ability to apply the principles and methods of auditing, such as planning, conducting, reporting, and following up the audit, as well as the personal behaviour and attributes of the auditors, such as ethical conduct, fair presentation, professional care, independence, and impartiality.

Discipline and sector-specific competence: The ability to understand and apply the audit criteria and the relevant technical or industry aspects of the audited organization, such as the information security management system (ISMS) requirements, the information security risks and controls, the legal and regulatory obligations, the organizational context and culture, the processes and activities, the products and services, etc.

Audit team leader competence: The ability to manage the audit team and the audit process, such as coordinating the audit activities, communicating with the audit programme manager and the auditee, resolving any audit-related problems, ensuring the quality and consistency of the audit work and the audit report, etc.

The person responsible for managing the audit programme should not consider the following factors when deciding the size and composition of the audit team for a specific audit, as they are either irrelevant or inappropriate for the audit process:

Customer relationships: The audit team should not be influenced by any personal or professional relationships with the auditee or other interested parties, as this may compromise the objectivity and impartiality of the audit. The audit team should avoid any conflicts of interest or self-interest that may affect the audit results or the audit decisions.

Seniority of the audit team leader: The audit team leader should be selected based on their competence and experience, not on their seniority or rank within the organization or the audit programme. The audit team leader should have the authority and responsibility to manage the audit team and the audit process, regardless of their seniority or position.

The cost of the audit: The cost of the audit should not be the primary factor for determining the size and composition of the audit team, as this may compromise the quality and effectiveness of the audit. The audit team should have sufficient resources and time to conduct the audit in accordance with the audit objectives, scope, and criteria, and to provide accurate and reliable audit results and recommendations.

The duration preferred by the auditee: The duration of the audit should be based on the audit objectives, scope, and criteria, and the availability and cooperation of the auditee, not on the preference or convenience of the auditee. The audit team should have enough time to conduct the audit in a thorough and systematic manner, and to collect and evaluate sufficient and relevant audit evidence.

NEW QUESTION # 149

An organisation is looking for management system initial certification. Please identify the sequence of the activities to be undertaken by the organisation.

To complete the sequence click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, you may drag and drop the options to the appropriate blank section.

□

Answer:

Explanation:

□ Explanation:

The correct sequence of activities is:

- * Establish the management system
- * Plan the audit programme
- * Conduct internal audits
- * Hold a Management Review
- * Engage a Certification Body for stage 1 and stage 2 audits
- * Complete any corrective actions

Comprehensive but Short Explanation: = According to the PECB Candidate Handbook - ISO/IEC 27001 Lead Auditor, the steps for achieving certification are as follows1:

- * Establish the management system: This involves defining the scope, objectives, policies, procedures, and controls of the ISMS, as well as ensuring the availability of resources and top management commitment.
- * Plan the audit programme: This involves defining the audit objectives, criteria, scope, frequency, methods, and responsibilities for conducting internal audits of the ISMS.
- * Conduct internal audits: This involves verifying the conformity and effectiveness of the ISMS, as well as identifying any nonconformities or opportunities for improvement.
- * Hold a Management Review: This involves reviewing the performance and suitability of the ISMS, as well as deciding on any changes or actions needed to improve it.
- * Engage a Certification Body for stage 1 and stage 2 audits: This involves selecting a reputable and accredited certification body to conduct an external audit of the ISMS, consisting of two stages: a documentation review and an on-site assessment.
- * Complete any corrective actions: This involves addressing any nonconformities or findings identified by the certification body, and providing evidence of their implementation and effectiveness.

NEW QUESTION # 150

Which two of the following statements are true?

- A. During a third-party audit, the auditor evaluates how the organisation ensures that it is made aware of changes to the legal requirements
- B. As part of a certification body audit the auditor is responsible for verifying the organisation's legal compliance status
- C. The role of a certification body auditor involves evaluating the organisation's processes for ensuring compliance with their legal requirements

Answer: A,C

Explanation:

The following statements are true:

The role of a certification body auditor involves evaluating the organization's processes for ensuring compliance with their legal requirements. This is part of the auditor's responsibility to assess the effectiveness and conformity of the organization's ISMS against the ISO/IEC 27001:2022 standard and the applicable legal and regulatory requirements.

During a third-party audit, the auditor evaluates how the organization ensures that they are made aware of changes to the legal requirements. This is part of the auditor's responsibility to verify that the organization has established and maintained a process for identifying and updating their legal and other requirements related to information security. The following statement is false:

As part of a certification body audit, the auditor is responsible for verifying the organization's legal compliance status. This is not true, as the auditor is not authorized or qualified to provide legal advice or judgment on the organization's compliance status. The auditor can only report on the evidence of compliance or noncompliance observed during the audit, but the ultimate responsibility for ensuring legal compliance lies with the organization.
