**ARA-C01 Study Prep Materials Has Gained Wide Popularity among Different Age Groups - PassLeaderVCE**

The biggest advantage of our ARA-C01 study question to stand the test of time and the market is that our sincere and warm service. To help examinee to pass ARA-C01 exam, we are establishing a perfect product and service system between us. We can supply right and satisfactory ARA-C01 exam questions you will enjoy the corresponding product and service. We can't say we are the absolutely 100% good, but we are doing our best to service every customer. Only in this way can we keep our customers and be long-term cooperative partners. Looking forward to your ARA-C01 Test Guide use try!

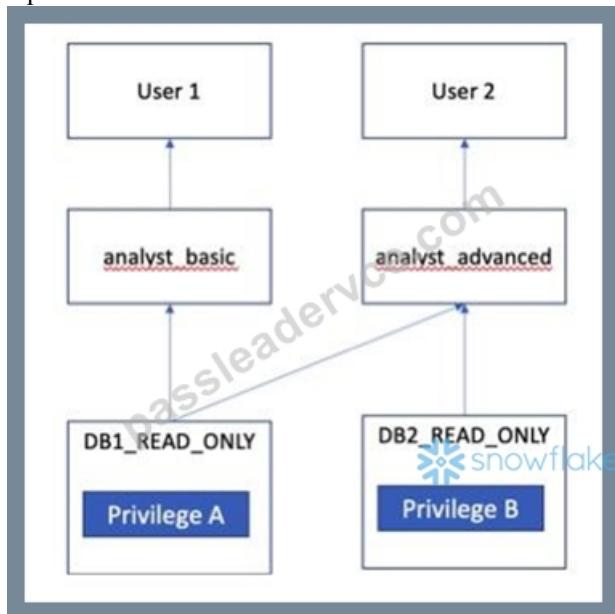

## Snowflake SnowPro Advanced Architect Certification Sample Questions (Q121-Q126):

### NEW QUESTION # 121

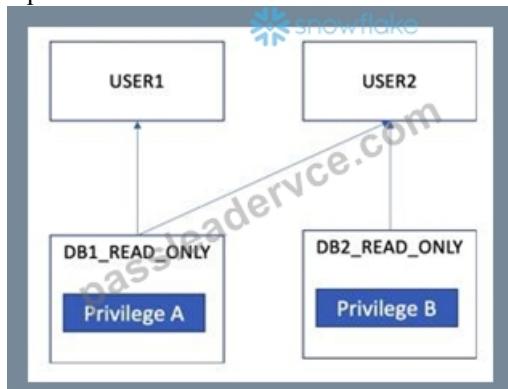

Suppose you have two databases D1 and D2. These databases contain data required by business analysts in your organization. Based on their functional responsibilities, entry level analysts should have read only access to D1, but access to D2 should be given to advanced analysts only.

Which option will you choose to setup the access?

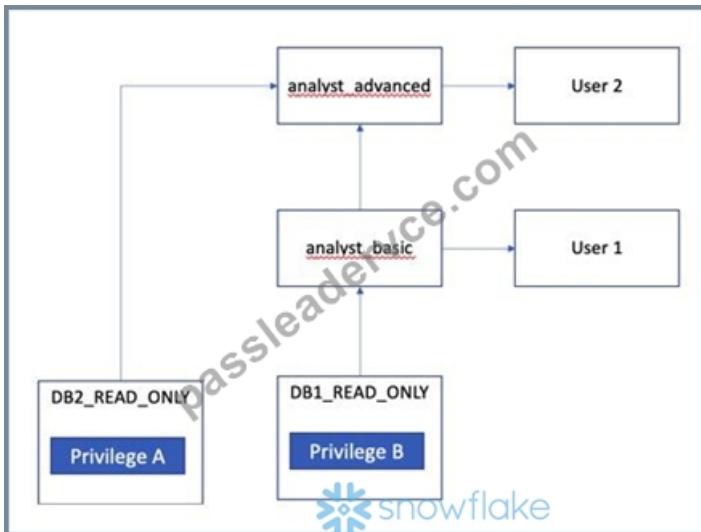

Option 1:

Option 2:

Option 3:

- A. Option 1
- B. Option 2
- C. Option 3

**Answer: C**

#### NEW QUESTION # 122

Which statements describe characteristics of the use of materialized views in Snowflake? (Choose two.)

- A. They can support MIN and MAX aggregates.
- B. They can include ORDER BY clauses.
- C. They cannot include nested subqueries.
- D. They can support inner joins, but not outer joins.
- E. They can include context functions, such as CURRENT\_TIME().

**Answer: A,C**

Explanation:

Explanation

According to the Snowflake documentation, materialized views have some limitations on the query specification that defines them. One of these limitations is that they cannot include nested subqueries, such as subqueries in the FROM clause or scalar subqueries in the SELECT list. Another limitation is that they cannot include ORDER BY clauses, context functions (such as CURRENT\_TIME()), or outer joins. However, materialized views can support MIN and MAX aggregates, as well as other aggregate functions, such as SUM, COUNT, and AVG.

#### NEW QUESTION # 123

Materialized views are recommended for all of the scenarios except

- A. The query is on an external table
- B. Query results contain results that require significant processing
- C. The view's base table changes frequently
- D. Query results contain a small number of rows and/or columns relative to the base table

**Answer: C**

#### NEW QUESTION # 124

A company needs to have the following features available in its Snowflake account:

1. Support for Multi-Factor Authentication (MFA)
2. A minimum of 2 months of Time Travel availability
3. Database replication in between different regions
4. Native support for JDBC and ODBC
5. Customer-managed encryption keys using Tri-Secret Secure
6. Support for Payment Card Industry Data Security Standards (PCI DSS)

In order to provide all the listed services, what is the MINIMUM Snowflake edition that should be selected during account creation?

- A. Standard
- B. Virtual Private Snowflake (VPS)
- **C. Business Critical**
- D. Enterprise

#### Answer: C

Explanation:

According to the Snowflake documentation<sup>1</sup>, the Business Critical edition offers the following features that are relevant to the question:

- \* Support for Multi-Factor Authentication (MFA): This is a standard feature available in all Snowflake editions<sup>1</sup>.
- \* A minimum of 2 months of Time Travel availability: This is an enterprise feature that allows users to access historical data for up to 90 days<sup>1</sup>.
- \* Database replication in between different regions: This is an enterprise feature that enables users to replicate databases across different regions or cloud platforms<sup>1</sup>.
- \* Native support for JDBC and ODBC: This is a standard feature available in all Snowflake editions<sup>1</sup>.
- \* Customer-managed encryption keys using Tri-Secret Secure: This is a business critical feature that provides enhanced security and data protection by allowing customers to manage their own encryption keys<sup>1</sup>.
- \* Support for Payment Card Industry Data Security Standards (PCI DSS): This is a business critical feature that ensures compliance with PCI DSS regulations for handling sensitive cardholder data<sup>1</sup>.

Therefore, the minimum Snowflake edition that should be selected during account creation to provide all the listed services is the Business Critical edition.
