PDFDumps has designed Implementing and Configuring Cisco Identity Services Engine (300-715) pdf dumps format that is easy to use. Anyone can download the Cisco 300-715 pdf questions file and use it from any location or at any time. Cisco PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual Implementing and Configuring Cisco Identity Services Engine (300-715) exam questions in this Cisco 300-715 pdf dumps file. These Cisco 300-715 exam questions have a high chance of coming in the actual 300-715 test. You have to memorize these 300-715 questions and you will pass the Implementing and Configuring Cisco Identity Services Engine (300-715) test with brilliant results.

Cisco 300-715 Certification Exam is designed to test the knowledge and skills of IT professionals in implementing and configuring the Cisco Identity Services Engine (ISE). 300-715 exam covers a wide range of topics related to ISE such as network access, authentication, authorization, policy enforcement, and device profiling. Passing the exam demonstrates that a candidate has the necessary expertise to work with ISE solutions and can help organizations secure their network infrastructures.

Endpoint Compliance: As for the next subject area, the students have to possess the expertise in the following:

- Setting the compliance module
- Describing endpoint compliance, posture services, and client provisioning
- Setting Cisco Identity Services Engine posture agents and operational modes
- Describing supplicant, supplicant options, authenticator, and server
- Setting posture conditions and policy as well as client provisioning

What Topics Does 300-715 SISE Gauge?

This test will address a range of areas related to IT such as:

- **BYOD** — in this part, applicants will have to explain the different features of Cisco BYOD including BYOD flow, solution tools, requirements, and cases for use, incorporate wireless LAN controllers & switches alongside internal CA to set up BYOD device on-boarding, change whitelists & blacklists, and adjust certificates for BYOD.
- **Profiler** — for this portion, candidates must show that they can deploy probes, install profiler services, incorporate CoA, and lastly, set up endpoint identity management.
- **Policy Execution** — under such a category, candidates need to demonstrate they can set up LDAP and native AD, elaborate on the numerous options of identity storage available such as OTP, AD, PKI, LDAP, Local, Smart Card, set up 802.1X phasing deployment by using minimum impact, monitor form, and closed form, set up devices that can access the network, deploy MABs, adjust CiscoTrustSec, change authorization profiles, adjust authentication policies, and finally, adjust network access for both wireless and wired 802.1X.
- **Endpoint Agreements** — in such a section, examinees will have to show they can explain posture services, elaborate endpoint agreements, describe client provisioning, set up client provisioning, posture conditions, function modes, and ISE posture agents, explain IT elements such as servers, authenticators, and supplicants, and lastly, adjust the agreement module.
- **Device Administration & Network Access** — for this final domain, candidates must demonstrate they have the ability to set up command authorization, set up TACACS+ device administration alongside contrast AAA protocols.

The high quality and high efficiency of 300-715 study guide make it stand out in the products of the same industry. Our study materials have always been considered for the users. If you choose our 300-715 exam questions, you will become a better self. 300-715 actual exam want to contribute to your brilliant future. Our study materials are constantly improving themselves. If you have any good ideas, our study materials are very happy to accept them. 300-715 Exam Materials are looking forward to having more partners to join this family. We will progress together and become better ourselves.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q35-Q40):

NEW QUESTION # 35

An administrator is trying to collect metadata information about the traffic going across the network to gain added visibility into the hosts. This information will be used to create profiling policies for devices using Cisco ISE so that network access policies can be used. What must be done to accomplish this task?

- A. Configure NetFlow to be sent to the Cisco ISE appliance.
- B. Configure the RADIUS profiling probe within Cisco ISE
- **C. Configure the DHCP probe within Cisco ISE**
- D. Configure SNMP to be used with the Cisco ISE appliance

Answer: C

NEW QUESTION # 36

Which two Cisco ISE deployment models require two nodes configured with dedicated PAN and MNT personas? (Choose two.)

- A. five PSN nodes with one PxGrid node
- **B. two PSN nodes with one PxGrid node**
- C. seven PSN nodes with one PxGrid node
- **D. three PSN nodes**
- E. six PSN nodes

Answer: B,D

Explanation:

Maximum PSNs + PXG nodes = 5

NEW QUESTION # 37

Refer to the exhibit. An engineer must configure BYOD in Cisco ISE. A single SSID must be used to allow BYOD devices to connect to the network. These configurations have been performed on Wireless LAN Controller already:

RADIUS server

BYOD-Dot1x SSID

Which two configurations must be done in Cisco ISE to meet the requirement? (Choose two.)

- A. FlexConnect ACL
- B. Profiling policy
- C. External identity source
- **D. Authentication policy**
- **E. Redirect ACL**

Answer: D,E

NEW QUESTION # 38

An engineer is implementing Cisco ISE and needs to configure 802.1X. The port settings are configured for port-based

authentication.

Which command should be used to complete this configuration?

- A. dot1x system-auth-control
 - B. aaa authentication dot1x default group radius
 - C. dot1x pae authenticator
 - D. authentication port-control auto

Answer: A

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/ise/2-6/install_guide/b_ise_InstallationGuide26.pdf

NEW QUESTION # 39

What is an advantage of using EAP-TLS over EAP-MS-CHAPv2 for client authentication?

- A. EAP-TLS uses multiple forms of authentication, while EAP-MS-CHAPv2 only uses one.
 - B. EAP-TLS secures the exchange of credentials, while EAP-MS-CHAPv2 does not.
 - C. EAP-TLS uses a username and password for authentication to enhance security, while EAP-MS-CHAPv2 does not.
 - D. EAP-TLS uses a device certificate for authentication to enhance security, while EAP-MS-CHAPv2 does not.

Answer: D

NEW QUESTION # 40

• • • • •

The development and progress of human civilization cannot be separated from the power of knowledge. You must learn practical knowledge to better adapt to the needs of social development. Now, our 300-715 learning materials can meet your requirements. You will have good command knowledge with the help of our study materials. The certificate is of great value in the job market. Our 300-715 Study Materials can exactly match your requirements and help you pass exams and obtain certificates. As you can see, our products are very popular in the market. Time and tides wait for no people.
