## **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q12-Q17):**

### **NEW QUESTION # 12**

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade? Note: There are 2 correct answers to this question.

- A. Release Assessment and Scope Dependency Tool
- B. Test Automation Tool
- C. SAP Signavio Process Navigator Tool
- D. What's New Viewer Tool

**Answer: A,D**

Explanation:

To simplify system maintenance after a release upgrade in SAP S/4HANA Cloud Public Edition, SAP provides specific tools to help customers adapt to new features and changes. Below is an explanation of the correct answers:

- \* What's New Viewer Tool (A): The What's New Viewer Tool provides detailed information about new features, enhancements, and changes introduced in the latest release. It helps customers understand the impact of the upgrade on their business processes.
- \* Release Assessment and Scope Dependency Tool (C): This tool evaluates the dependencies between activated scope items and new features in the upgraded release. It ensures that customers are aware of any required adjustments to their configurations.
- \* SAP Signavio Process Navigator Tool (B): While SAP Signavio Process Navigator supports process modeling, it is not specifically designed for release upgrades or system maintenance.
- \* Test Automation Tool (D): Test automation tools focus on testing scenarios but do not provide insights into release-specific changes or dependencies.

### **NEW QUESTION # 13**

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- A. Lumira Dashboards
- B. Review Booklets
- C. SAC Stories
- D. Object Views
- E. Multidimensional Reports

**Answer: B,C,E**

Explanation:

The Manage KPIs and Reports app in SAP S/4HANA Cloud Public Edition allows users to create various types of analyses to monitor key performance indicators (KPIs) and generate reports. Below is an explanation of the correct answers:

- \* Review Booklets (A): Review booklets are collections of predefined reports and analyses that provide a comprehensive overview of specific business areas. They can be created and customized using the Manage KPIs and Reports app.
- \* Multidimensional Reports (C): Multidimensional reports allow users to analyze data from multiple perspectives, such as time, region, or product categories. These reports are supported by the app for detailed analysis.
- \* SAC Stories (D): SAC (SAP Analytics Cloud) Stories are interactive dashboards and reports that combine data visualization, analytics, and storytelling. The Manage KPIs and Reports app integrates with SAP Analytics Cloud to create and manage these stories.
- \* Lumira Dashboards (B): Lumira Dashboards were part of older SAP BusinessObjects solutions but are not supported in the context of SAP S/4HANA Cloud Public Edition's Manage KPIs and Reports app.
- \* Object Views (E): Object views refer to specific views of business objects in SAP systems, but they are not a type of analysis created through the Manage KPIs and Reports app.

#### NEW QUESTION # 14

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. SAP Business Suite
- B. SAP Fiori
- C. Core Data Services
- D. SAP HANA

**Answer: C**

#### NEW QUESTION # 15

What does the material type in a material (product) master data control?

- A. Organizational data that is allowed for a material
- B. Procurement type that is allowed for a material
- C. Price unit that is used for a material
- D. Automatic creation of a purchase requisition with a material

**Answer: B**

Explanation:

The material type in the material (product) master data plays a critical role in controlling various aspects of material management in SAP S/4HANA Cloud Public Edition. Specifically, it determines the procurement type that is allowed for a material.

- \* Procurement type that is allowed for a material (Option B): The material type defines whether a material can be procured externally (from vendors), internally (produced in-house), or both. For example, raw materials typically allow external procurement, while finished goods may allow internal production. The SAP Material Master Data Guide confirms this functionality.
- \* A. Price unit that is used for a material: The price unit is controlled by pricing conditions and material valuation settings, not by the material type.
- \* C. Organizational data that is allowed for a material: Organizational data (e.g., plant-specific or storage location-specific data) is defined during the creation of the material master record, not by the material type.
- \* D. Automatic creation of a purchase requisition with a material: The automatic creation of purchase requisitions is controlled by MRP (Material Requirements Planning) settings and procurement parameters, not directly by the material type.
- \* SAP Material Master Data Guide: Describes the role of material types in controlling procurement and other material-related settings. <https://help.sap.com>

\* SAP S/4HANA Cloud Procurement Guide: Provides details on how material types influence procurement processes.  
Why Option B is Correct: Why the Other Options Are Incorrect: Key References:

## NEW QUESTION # 16

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain technical catalogs
- B. Maintain restrictions
- C. Assign business catalogs to a business role
- D. Assign PFCG profiles to a business role

**Answer: B,C**

Explanation:

The Maintain Business Roles SAP Fiori app is used to manage business roles in SAP S/4HANA Cloud Public Edition. This app allows administrators to configure roles by assigning business catalogs and maintaining restrictions, ensuring that users have the appropriate access and permissions for their tasks.

\* Maintain restrictions (Option C): Restrictions can be defined within business roles to limit access to specific data or functionalities. For example, you can restrict access to certain purchase requisitions based on organizational units or cost centers. The SAP S/4HANA Cloud Security Guide confirms that maintaining restrictions is a key activity in the Maintain Business Roles app.

\* Assign business catalogs to a business role (Option D): Business catalogs are collections of SAP Fiori apps grouped by functionality. Assigning these catalogs to business roles ensures that users have access to the required applications. The SAP Fiori Apps Reference Library explicitly states that assigning business catalogs is a core function of the Maintain Business Roles app.

\* A. Maintain technical catalogs: Technical catalogs are managed in the backend system and are not maintained directly in the Maintain Business Roles app. This activity is typically handled by system administrators using tools like SAP Cloud ALM.

\* B. Assign PFCG profiles to a business role: In SAP S/4HANA Cloud Public Edition, PFCG (Profile Generator) profiles are not used because the system follows a role-based access control model. Instead, business roles and catalogs are used to manage access.

\* SAP S/4HANA Cloud Security Guide: Explains how to maintain restrictions and assign business catalogs in the Maintain Business Roles app. <https://help.sap.com>

\* SAP Fiori Apps Reference Library: Provides details about the Maintain Business Roles app and its functionalities.

\* SAP S/4HANA Cloud Role-Based Access Control Guide: Describes the role-based security model and how business roles are configured.

Why Options C and D Are Correct: Why the Other Options Are Incorrect: Key References:

## NEW QUESTION # 17

.....
