CLEAN PAIN AND DIRTY PAIN

Sometimes it is necessary to know pain, to be intimate with it, to help others to heal.
Rev. angel Kyodo williams

The attempt to escape from pain is what creates more pain.
Gabor Maté

Pain is the little voice in your head that tries to hold you back because it knows if you continue you will change.
Kobe Bryant

Denial is the ultimate comfort zone.
David Goggins

Healing and growth always involve discomfort. But so does refusing to heal or grow. Paradoxically, this refusal always creates more pain—both for the person who refuses to grow *and* for the people around them.

Here's another paradox of emotional pain: the only way to ease it is to accept it, work with it, and use it as fuel for growth.

Only by leaning *into* your pain can you move through it and out of it, and metabolize it.

When you accept this pain, and use it to stand in your integrity and activate the best parts of yourself, this is *clean pain*.[24] Clean pain can help you metabolize trauma, resolve conflicts, transform, and grow up.

Nonviolent resistance to oppression, terrorism, and inequality is a form of clean pain. So is Somatic Abolitionism.

Your other option is dirty pain, in which you respond from your most wounded and unexamined parts. You become cruel, or hollow, or conniving, or violent—or you physically or emotionally run away. This only prolongs your pain and deepens whatever conflict activated your initial discomfort.

Dirty pain is the pain of avoidance and denial. When we refuse to accept and metabolize clean pain, or try to blow that pain into other bodies, we create new conflict and difficulty. Meanwhile, our own pain remains unmetabolized.

Dirty pain can manifest as urgency, avoidance, blaming, accusations, hypervigilance, panic, hyperanxiety, hard-and-fast demands, gaslighting, extreme manipulation, desperate attempts to control other people, or violence. Sometimes it shows up as self-harm: drinking, drugging, other addictive behavior, or self-inflicted violence. All of these only make the existing conflict more difficult, more complicated, and more painful.

Just the same as the free demo, we have provided three kinds of versions of our Microsoft SC-100 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based SC-100 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our Microsoft Cybersecurity Architect SC-100 study guide.

We provide the best privacy protection to the client and all the information of our client to buy our SC-100 test prep is strictly kept secret. All our client come from the whole world and the people in some countries attach high importance to the privacy protection. Even some people worry about that we will sell their information to the third side and cause unknown or serious consequences. The aim of our service is to provide the SC-100 Exam Torrent to the client and help them pass the exam and not to disclose their privacy to others and seek illegal interests. So please rest assured that our Microsoft Cybersecurity Architect prep torrent is safe and won't do harm to you.

First-grade Microsoft SC-100 Latest Guide Files and Realistic Latest SC-100 Exam Test

Our SC-100 study guide is convenient for the clients to learn and they save a lot of time and energy for the clients. After the clients pay successfully for the SC-100 exam dump they can immediately receive our products in the form of mails in 5-10 minutes and then click on the links to use our software to learn. The clients only need 20-30 hours to learn and then they can attend the test. For those in-service office staff and the students who have to focus on their learning this is a good new because they have to commit themselves to the jobs and the learning and don't have enough time to prepare for the test. Learning the SC-100 prep material takes you less than a week and you can learn them in the weekends or use your leisure time to learn them.

Candidates who pass the Microsoft SC-100 exam earn the Microsoft Certified: Security, Compliance, and Identity Fundamentals certification. Microsoft Cybersecurity Architect certification demonstrates that the candidate has the knowledge and skills required to secure Microsoft technologies and protect against cyber threats. It also demonstrates that the candidate has an understanding of compliance requirements and can design and implement security solutions that meet those requirements. Overall, the Microsoft SC-100 exam is an excellent opportunity for individuals looking to validate their skills in cybersecurity and earn a valuable certification.

Microsoft SC-100 Certification Exam is intended for individuals who have a foundational understanding of cybersecurity principles and technologies. It covers a wide range of topics, including threat management, identity and access management, cloud security, data protection, and compliance. SC-100 exam is designed to test the candidate's ability to design, implement, and maintain secure solutions that meet the needs of their organization.

Microsoft Cybersecurity Architect Sample Questions (Q42-Q47):

NEW QUESTION # 42
Your company wants to optimize ransomware incident investigations.
You need to recommend a plan to investigate ransomware incidents based on the Microsoft Detection and Response Team (DART) approach.
Which three actions should you recommend performing in sequence in the plan? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Assess the current situation and identify the scope.
2 - Identify which line-of-business (LOB) apps are unavailable due to a ransomware incident.
3 - Identify the compromise recovery process.

NEW QUESTION # 43
What should you create in Azure AD to meet the Contoso developer requirements?

Answer:

Explanation:

Topic 2, Litware, inc. Case Study 2

Overview

Litware, inc. is a financial services company that has main offices in New York and San Francisco. litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.

Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.

Existing Environment

Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD D%) forest named Utvvare.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.

Planned Changes

Litware plans to implement the following changes:

* Create a management group hierarchy for each Azure AD tenant.

* Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.

* Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

Business Requirements

Litware identifies the following business requirements:

* Minimize any additional on-premises infrastructure.

* Minimize the operational costs associated with administrative overhead.

Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

* Enable the management of on-premises resources from Azure, including the following:

* Use Azure Policy for enforcement and compliance evaluation.

* Provide change tracking and asset inventory.

* Implement patch management.

* Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.
Microsoft Sentinel Requirements
Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAK) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOQ by using Microsoft Sentinel.
Identity Requirements
Litware identifies the following identity requirements:
* Detect brute force attacks that directly target AD DS user accounts.
* Implement leaked credential detection in the Azure AD tenant of Litware.
* Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
* Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for.
* The management of group properties, membership, and licensing The management of user properties, passwords, and licensing
* The delegation of user management based on business units.
Regulatory Compliance Requirements
Litware identifies the following regulatory compliance requirements:
* insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
* Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
* Use the principle of least privilege.
Azure Landing Zone Requirements
Litware identifies the following landing zone requirements:
* Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
* Provide a secure score scoped to the landing zone.
* Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
* Minimize the possibility of data exfiltration.
* Maximize network bandwidth.
The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.
Each landing zone will have the following characteristics:
* Be created in a dedicated subscription.
* Use a DNS namespace of litware.com.
Application Security Requirements
Litware identifies the following application security requirements:
* Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
* Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

NEW QUESTION # 44
Your company is exploring migrating data into Azure; they would like to have a central authentication solution when accessing the data; they have chosen Azure Active Directory.
Which two storage types natively support Active Directory authentication?

- A. Azure File Share
- B. Azure Data Lake Storage Gen2
- C. Azure Storage blob containers
- D. Azure Data Box

Answer: B,C

Explanation:
Option D is correct Because Azure Storage supports using Azure Active Directory (Azure AD) to authorize requests to blob data.
Option B is correct Because Azure Data Lake Storage Gen2 (ADLS Gen2) accounts support using OAuth 2.0 with an Azure Active Directory (Azure AD).
Option C is incorrect because To support AD DS authentication over SMB for Azure File Share; you need to register your storage account with AD DS.
Option A is incorrect because Azure Data Box is a device used to move large amounts of data to Azure; this process is known as seeding.
References:
https://docs.microsoft.com/en-us/azure/storage/blobs/authorize-access-azure-active-directory
https://docs.microsoft.com/en-us/azure/databricks/data/data-sources/azure/adls-gen2/azure- datalake-gen2-sp-access

NEW QUESTION # 45

Hotspot Question

You have an Azure subscription. The subscription contains an Azure SQL database named DB1 that stores customer data.

You have a Microsoft 365 subscription that uses Microsoft SharePoint Online, OneDrive, and Teams.

Users frequently create Microsoft Office documents that contain data from DB1.

You need to recommend a Microsoft Purview solution that meets the following requirements:

- Identifies Office documents that contain customer addresses and phone numbers sourced from DB1
- Generates an alert if a user downloads an above average number of

files that contain data from DB1

- Minimizes the number of false positives

What should you include in the solution for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Document fingerprinting

Identifies Office documents that contain customer addresses and phone numbers sourced from DB1 Document fingerprinting is a Microsoft Purview feature that takes a standard form that you provide and creates a sensitive information type (SIT) based on that form. Document fingerprinting makes it easier for you to protect sensitive information by identifying standard forms that are used throughout your organization.

Document fingerprinting includes the following benefits:

SITs created from document fingerprinting can be used as a detection method in DLP policies scoped to Exchange, SharePoint, OneDrive, Teams, and Devices.

Etc.

Box 2: Microsoft Purview insider risk management

Generates an alert if a user downloads an above average number of files that contain data from DB1 Microsoft Purview, Configure intelligent detections in insider risk management Use can use the Intelligent detections setting in Microsoft Purview Insider Risk Management to:

* Boost the score for unusual file download activities by entering a minimum number of daily events.

* Etc.

File activity detection

You can use this section to specify the number of daily events required to boost the risk score for download activity that's considered unusual for a user. For example, if you enter "25", if a user downloads 10 files on average over the previous 30 days, but a policy detects that they downloaded 20 files on one day, the score for that activity won't be boosted even though it's unusual for that user because the number of files they downloaded that day was less than 25.

NEW QUESTION # 46

You open Microsoft Defender for Cloud as shown in the following exhibit.

Use the drop-down menus to select the answer choice that complete each statements based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

|	
To increase the score for the Restrict unauthorized network access control, implement [answer choice].	Azure Active Directory (Azure AD) Conditional Access policies
	Azure Web Application Firewall (WAF)
	network security groups (NSGs)
To increase the score for the Enable endpoint protection control, implement [answer choice].	Microsoft Defender for Resource Manager
	Microsoft Defender for servers
	private endpoints

NEW QUESTION # 47

......

Are you sometimes nervous about the coming SC-100 exam and worried that you can't get used to the condition? Never worry, we can offer 3 different versions for you to choose: PDF, Soft and APP versions. You can use the Soft version of our SC-100 study materials to stimulate the exam to adjust yourself to the atmosphere of the real exam and adjust your speed to answer the questions. The other 2 versions also boost their own strength and applicable method and you could learn our SC-100 training quiz by choosing the most suitable version to according to your practical situation.
