1z0-1075-25 Pass Leader Dumps - 1z0-1075-25 Examinations Actual Questions

Of course, we also need to realize that it is very difficult for a lot of people to pass the exam without valid 1z0-1075-25 study materials in a short time, especially these people who have not enough time to prepare for the exam, that is why many people need to choose the best and most suitable 1z0-1075-25 Study Materials as their study tool. We believe that if you have the good 1z0-

1075-25 study materials when you are preparing for the exam, it will be very useful and helpful for you to pass exam and gain the related certification successfully.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q12-Q17):

NEW QUESTION # 12

You have been asked to set up cost estimates for 10 different purchased items. Which two tasks can you perform to achieve this?

- **A. Import a spreadsheet.**
- B. Use the Mass Edit functionality.
- C. Call a web service.
- D. Run the "Update Item Cost Estimate" ESS process.
- **E. Enter cost estimates directly into the UI.**

Answer: A,E

Explanation:

To set up cost estimates for multiple purchased items in Oracle Manufacturing Cloud, the following tasks can be performed:

* Import a spreadsheet (A) : You can import cost estimates for multiple items at once using a preformatted spreadsheet, which allows for efficient data entry.

* Enter cost estimates directly into the UI (E) : Cost estimates can also be manually entered directly through the user interface for individual items, providing flexibility when fewer items need to be updated.

Incorrect options:

* Calling a web service (B) is not the correct method for setting up cost estimates.

* Mass Edit functionality (C) and Update Item Cost Estimate process (D) do not directly apply to entering new cost estimates for purchased items.

Oracle Cloud Cost Management documentation outlines the available methods, including spreadsheet imports and manual UI entry, for setting up cost estimates for purchased items.

NEW QUESTION # 13

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab.

What are two reasons for the Reservations tab not being displayed for WO-1025?

- **A. It is not a Configured Item work order.**
- B. It is not a Plan-to-Produce work order.
- C. It is not a Drop-Ship work order.
- D. It is not a Pick-to-Order work order.
- **E. It is not a Back-to-Back work order.**

Answer: A,E

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

NEW QUESTION # 14

A Manufacturing Engineer in a plant is creating an alternate manufacturing process for an item using its existing work definitions. After copying from the existing work definition, WD1, to the alternate work definition, WD2, the engineer finds that the operation items were not copied in the alternate manufacturing process WD2. What is the reason for this?

- A. Start Date was not populated in the new WD2 during creation.
- B. Item and Structure Name in the existing WD1 were retained in the new WD2 during creation.
- **C. Item and Structure Name were changed in the new WD2 during creation.**
- D. Production Priority was not populated in the new WD2 during creation.

Answer: C

Explanation:

When creating an alternate work definition (WD2) by copying from an existing one (WD1), if the Item and Structure Name were changed during the creation of WD2, the operation items would not be copied. This is because operation items are tied to specific item structures. Changing the structure results in a disconnect between the original operation items and the new work definition.

* Item and Structure Name are critical in ensuring that the operation items (components and materials) are transferred when copying work definitions. If these names are changed, the system does not assume the same items should be used.

Oracle Manufacturing Cloud documentation explains that maintaining consistency in the Item and Structure Name is key when copying work definitions to ensure all operation items are carried over.

NEW QUESTION # 15

In a Manufacturing Cloud implementation, users are finding it difficult to track information about work orders executed across various work centers.

Which three information types in the Work Order Traveler can help users in this situation?

- A. Hard pegging of items
- **B. Product serial Information**
- **C. Work definition details**
- D. Item on-hand quantity
- **E. Reservation against sales orders**

Answer: B,C,E

Explanation:

The Work Order Traveler in Oracle Manufacturing Cloud provides detailed information about work orders to help users track and manage work orders across various work centers. The following types of information are especially useful:

* Work definition details (D) : This provides detailed information about the operations and resources required to complete the work order, helping users understand the manufacturing process and requirements.

* Product serial information (E) : Tracking serial numbers for products is critical, especially in industries where traceability and product lifecycle management are important.

* Reservation against sales orders (A) : This information links work orders to specific sales orders, providing clarity on how the work order aligns with customer demand.

Incorrect options:

* Hard pegging of items (B) and Item on-hand quantity (C) are not typically tracked through the Work Order Traveler report, as this report focuses more on the work order 's execution rather than inventory management.

Oracle Manufacturing Cloud documentation on the Work Order Traveler report explains the different types of information provided to help users track work orders and manage production.

NEW QUESTION # 16

Which statement is NOT true about using a Quick Complete action for an operation transaction?

- A. It is used on serial tracked operations and non-serial tracked operations with or without inspections.
- B. You can use it for simultaneous reporting of one or more transactions.
- C. You can use it to collect Inspection results.
- **D. You can use it to transact only one serial number at a time.**
- E. You can use It to transact one or more serial numbers.

Answer: D

Explanation:

The Quick Complete action allows for fast, simplified transaction processing for work orders and operations.

The statement that is not true is:

* Statement E is incorrect because Quick Complete can be used to transact multiple serial numbers at a time, not just one. This feature is designed to handle both serial-tracked and non-serial-tracked operations efficiently.

Correct statements:

* Statement A : Quick Complete supports simultaneous reporting of multiple transactions, allowing for streamlined processing.

* Statement B : It can be used for both serial-tracked and non-serial-tracked operations, whether or not inspections are involved.

* Statement C : Multiple serial numbers can be transacted at once using this feature.

* Statement D : While Quick Complete can handle inspection-related transactions, it is not specifically for collecting inspection results.

Oracle Cloud documentation on Quick Complete explains how this feature works for processing multiple transactions and handling serial-numbered items.

NEW QUESTION # 17

.....

If you buy online classes, you will need to sit in front of your computer on time at the required time; if you participate in offline counseling, you may need to take an hour or two of a bus to attend class. But if you buy 1z0-1075-25 test guide, things will become completely different. Unlike other learning materials on the market, Oracle Manufacturing Cloud 2025 Implementation Professional torrent prep has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can do exercises. With Oracle Manufacturing Cloud 2025 Implementation Professional torrent prep, you no longer have to put down the important tasks at hand in order to get to class; with 1z0-1075-25 Exam Questions, you don't have to give up an appointment for study.

1z0-1075-25 Pass Leader Dumps: <https://www.newpassleader.com/Oracle/1z0-1075-25-exam-preparation-materials.html>

There's no better way to effectively prepare other than using actual Oracle 1z0-1075-25 Oracle Cloud questions provided by us, In addition, 1z0-1075-25 exam materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points, 1z0-1075-25 exam dumps cover most of the knowledge points for the exam, and you can have a good command of the knowledge points by using 1z0-1075-25 exam dumps, Oracle 1z0-1075-25 Reliable Test Pattern The Course structure was excellent.

Google does a good job of finding just about anything. Also, we have our own research center and experts team, There's no better way to effectively prepare other than using actual Oracle 1z0-1075-25 Oracle Cloud questions provided by us.
