CIPS Whole Life Asset Management Sample Questions (Q91-Q96):

NEW QUESTION # 91
Which of the following are the key elements of total productive maintenance?

1. Reactive maintenance
2. Quality maintenance
3. Deferred maintenance
4. Autonomous maintenance

- A. 2 and 4 only
- B. 1 and 2 only
- C. 1 and 3 only
- D. 2 and 3 only

Answer: A

Explanation:
Total productive maintenance (TPM) is an innovative concept in the manufacturing industry that evolved from the idea of preventive maintenance to adopt practices of productive maintenance, maintenance prevention, and reliability Engineering. What we now refer to as TPM, has become an ingenious approach to achieve overall equipment effectiveness by involving the workforce behind the machines (i.e. the operators).

8 pillars of TPM

Moreover, to write the Up-to-date L4M7 Practice Braindumps, they never stop the pace of being better. As long as you buy our L4M7 study quiz, you will find that we update it from time to time according to the exam center.

CIPS Whole Life Asset Management Sample Questions (Q113-Q118):

NEW QUESTION # 113

With D is the annual demand (units), S is cost per order, H is annual carrying cost per unit; the formula for Economic Order Quantity is....?

- A. $\#(D*S*H)$
- B. $\#(D*S/2H)$
- C. $\#(D*S/3H)$
- D. $\#(2D*S/H)$

Answer: D

Explanation:

Formula and Calculation of Economic Order Quantity (EOQ)

The formula for EOQ is:

$$Q = \sqrt{\frac{2DS}{H}}$$

where:

- Q = EOQ units
- D = Demand in units (typically on an annual basis)
- S = Order cost (per purchase order)
- H = Holding costs (per unit, per year)

LO 2, AC 2.3

NEW QUESTION # 114

Which of the following lists all components, ingredients, and materials required to produce the final product?

- A. Engineering change notice
- B. Bill of materials
- C. Purchase order
- D. Master schedule

Answer: B

Explanation:

Master production schedule (MPS) plans items that have "direct" demand, or "independent demand." With independent demand, the demand comes from sales orders, service orders, or forecasts, and the demand comes directly from customer or forecasted requirements. It is the list that provides the timing of the production schedule and shows how much each machine can produce, how many shifts are used, etc.

A bill of materials (BOM) is a comprehensive inventory of the raw materials, assemblies, subassemblies, parts and components, as well as the quantities of each, needed to manufacture a product.

NEW QUESTION # 115

The development and implementation of whole-life asset management may be reserved for significant purchases, most typically determined by which of the following features?

1. Long-lasting
2. High spend
3. Quality checks
4. Product scarcity

- A. 1 and 4
- B. 2 and 5
- C. 3 and A
- **D. 1 and 2**

Answer: D

NEW QUESTION # 116

Using consignment stocking with suppliers can assist with flexible warehousing when space is at a premium in the warehouse. Another advantage of using the consignment stocking approach is that ...

- A. the goods do not have to be paid for until the customer uses them
- **B. the goods are not produced until the customer places a purchase order**
- C. it increases the amount of stock that needs to be held by the customer
- D. inventory management is easier as the stock belongs to the supplier

Answer: B

NEW QUESTION # 117

TCD Manufacturing has taken over the operations of a fabric processor in another country. TCD has planned to eliminate some traditional fabric processing that has high risks because of the chemicals used in the dyeing process. TCD is now preparing for new dyeing processes to be installed and needs to remove the current tanks and its associated equipment. Which of the following is appropriate to TCD's situation?

- **A. TCD should undertake an environmental risk assessment to establish the likely risks of the options available and any residual risks**
- B. TCD should identify the sale opportunities for the equipment and prioritise the potential income to offset any decommissioning costs
- C. TCD should use a contractor to remove the equipment at the lowest cost provided that the contract agrees to remedial action in the event of problems
- D. TCD should store the obsolete tanks on site for a period of 12 months before arranging removal

Answer: A

NEW QUESTION # 118

.....
