

# NIS-2-Directive-Lead-Implementer 시험패스인증덤프공부 & NIS-2-Directive-Lead-Implementer 퍼펙트 최신버전 공부자료

참고: PassTIP에서 Google Drive로 공유하는 무료, 최신 NIS-2-Directive-Lead-Implementer 시험 문제집이 있습니다:  
[https://drive.google.com/open?id=1WGithYWbm0bX\\_cjh0H1KW2AQLTkHynub](https://drive.google.com/open?id=1WGithYWbm0bX_cjh0H1KW2AQLTkHynub)

지금 같은 상황에서 몇년간PECB NIS-2-Directive-Lead-Implementer시험자격증만 소지한다면 일상생활에서많은 도움이 될것입니다. 하지만 문제는 어떻게PECB NIS-2-Directive-Lead-Implementer시험을 간단하게 많은 공을 들이지 않고 시험을 패스할것인가이다? 우리PassTIP는 여러분의 이러한 문제들을 언제든지 해결해드리겠습니다. 우리의NIS-2-Directive-Lead-Implementer시험마스터방법은 바로IT전문가들이제공한 시험관련 최신연구자료들입니다. 우리PassTIP 여러분은NIS-2-Directive-Lead-Implementer시험관련 최신버전자료들을 얻을 수 있습니다. PassTIP을 선택함으로써 여러분은 성공도 선택한것이라고 볼수 있습니다.

## PECB NIS-2-Directive-Lead-Implementer 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>Communication and awareness: This section covers skills of Communication Officers and Training Managers in developing and executing communication strategies and awareness programs. It emphasizes fostering cybersecurity awareness across the organization and effective internal and external communication during cybersecurity events or compliance activities.</li> </ul>

주제 4	<ul style="list-style-type: none"> <li>• Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.</li> </ul>

PassTIP 는 아주 우수한 IT인증자료사이트입니다. 우리PassTIP에서 여러분은 PECB NIS-2-Directive-Lead-Implementer 인증 시험관련 스킬과 시험자료를 얻을 수 있습니다. 여러분은 우리PassTIP 사이트에서 제공하는 PECB NIS-2-Directive-Lead-Implementer 관련 자료의 일부분 문제와 답 등 샘플을 무료로 다운받아 체험해 볼 수 있습니다. 그리고 PassTIP에서는 PECB NIS-2-Directive-Lead-Implementer 자료 구매 후 추후 업데이트되는 동시에 최신버전을 무료로 발송해 드립니다. 우리는 PECB NIS-2-Directive-Lead-Implementer 인증 시험 관련 모든 자료를 여러분들에서 제공할 것입니다. 우리의 IT전문 팀은 부단한 업계 경험과 연구를 이용하여 정확하고 디테일 한 시험 문제와 답으로 여러분을 어시스트 해 드리겠습니다.

### 최신 NIS 2 Directive NIS-2-Directive-Lead-Implementer 무료 샘플 문제 (Q73-Q78):

#### 질문 # 73

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, what is the level of process maturity of SafePost?

- A. Initial
- B. Managed
- C. Defined

정답: A

#### 질문 # 74

Scenario 5: Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy

storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Based on scenario 5, the CISO reports directly to the CEO of Astral Nexus Power. Is this in alignment with best practices?

- A. No, the current organizational structure impedes inter-departmental collaboration which would enable balanced distribution of tasks
- **B. Yes, it is advisable for the CISO to report directly to the top management to facilitate the process of decision-making with respect to cybersecurity**
- C. No, this type of structure does not allow the CISO to properly exercise the mandate with regards to cybersecurity

**정답: B**

#### **질문 # 75**

Which reporting method is best suited for presenting raw data in an easy-to-read format, including features like nested grouping, rolling summaries, and dynamic drill-through or linking?

- **A. Reports**
- B. Tactical and operational dashboards
- C. Scorecards or strategic dashboards

**정답: A**

#### **질문 # 76**

Which statement regarding the EU-CyCLONe is correct?

- A. It serves as a bridge operational and technical levels during large-scale incidents and crises
- B. It serves as a bridge between operational and political levels during large-scale incidents and crises
- **C. It serves as a bridge between technical and political levels during large-scale incidents and crises**

**정답: C**

#### **질문 # 77**

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined

model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, which framework is StellarTech's structured approach to managing risks aligned with?

- A. ENISA Risk Management Framework
- **B. ISO 31000**
- C. COSO ERM Framework

정답: B
