

# Test NCP-CI-AWS Passing Score | Exam NCP-CI-AWS Answers

What's more, part of that PassLeader NCP-CI-AWS dumps now are free: <https://drive.google.com/open?id=1SmlLAfvpA6RIq-gTN8hg4n04kLtp7os>

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the NCP-CI-AWS exam, the experts and professors from our company designed the best NCP-CI-AWS Study Materials. The IT experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the NCP-CI-AWS study materials.

It is really not easy to pass NCP-CI-AWS exam, but once you get the exam certification, it is not only a proof of your ability, but also an internationally recognised passport for you. You cannot blindly prepare for NCP-CI-AWS exam. Our PassLeader technical team have developed the NCP-CI-AWS Exam Review materials in accordance with the memory learning design concept, which will relieve your pressure from the preparation for NCP-CI-AWS exam with scientific methods.

## High-quality Test NCP-CI-AWS Passing Score Offer You The Best Exam Answers | Nutanix Nutanix Certified Professional - Cloud Integration - AWS

Providing our customers with up to 1 year of free Nutanix NCP-CI-AWS questions updates is also our offer. These Nutanix NCP-CI-AWS free dumps updates will help you prepare according to the latest NCP-CI-AWS test syllabus in case of changes. 24/7 customer support is available at PassLeader to assist users of the NCP-CI-AWS Exam Questions through the journey. Above all, PassLeader also offers a full refund guarantee (terms and conditions apply) to our customers. Don't miss these amazing offers. Download Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) actual exam Dumps today!

### Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>

- **Configuring an NC2 on AWS Environment:** This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q25-Q30):

### NEW QUESTION # 25

An administrator is deploying a new NC2 cluster on AWS and needs to ensure full connectivity is established between the company's on-premises datacenter and the AWS cloud.

Which two AWS offering will satisfy this requirement? (Choose two.)

- A. ExpressRoute
- **B. Direct Connect**
- C. Dedicated interconnect
- **D. AWS VPN**

**Answer: B,D**

Explanation:

To establish full connectivity between the company's on-premises datacenter and the AWS cloud, the following AWS offerings will satisfy this requirement:

**AWS VPN:** This service allows you to create a secure connection between your on-premises network or other remote network and your AWS VPC using an IPsec VPN tunnel. It is suitable for low to moderate bandwidth requirements and provides secure, encrypted connections.

**Direct Connect:** AWS Direct Connect is a dedicated network connection from your premises to AWS. It provides a private, high-bandwidth, low-latency connection which is ideal for high-throughput applications and workloads that need consistent network performance.

AWS VPN Documentation

AWS Direct Connect Documentation

### NEW QUESTION # 26

Which statement is true regarding additional EBS volumes attached to a cluster for storage capacity?

- A. Hibernation is not supported when EBS volumes are attached to nodes in a cluster.
- B. Cluster Protect is not supported when EBS volumes are attached to nodes in a cluster.
- **C. EBS storage attached to nodes in a cluster can only be increased.**
- D. EBS storage attached to nodes in a cluster can only be decreased.

**Answer: C**

Explanation:

NC2 on AWS allows for the dynamic addition of Amazon EBS volumes to bare-metal nodes to expand the cluster's storage capacity beyond the local NVMe drives. According to Nutanix architectural guidelines, once these EBS volumes are attached and integrated into the storage pool, the capacity can only be increased.

Reducing the storage capacity by removing or shrinking attached EBS volumes is not a supported operation because it would risk data loss and disrupt the Distributed Storage Fabric (DSF) which expects consistent disk availability. Therefore, administrators should carefully size their initial EBS requirements, knowing that they can scale up to meet demand but cannot scale back the capacity of individual existing volumes without a complex data migration or cluster redeployment.

### NEW QUESTION # 27

An administrator is tasked with enabling inbound internet access to two Virtual Servers in an NC2 cluster on AWS for the HTTPs protocol.

The cluster is configured with:

\* 8 nodes

\* Prism Central

\* 3 x User VM subnets

All subnets have been configured and can communicate with Internet-based resources as well as on-premises servers. The company d to allow Internet access, so the administrator must implement an AWS solution.

Which approach will enable the necessary communication?

- A. Create a AWS Network Load Balancer, configure the listener TCP port as 443, create a target group and register an HP as the endpoint.
- B. Create a WS Network Load Balancer, configure the listener TCP port as 80, create a target group and register the servers as the endpoint
- C. Create a AWS Network Load Balancer, configure the listener TCP port as 433, create a target group and register an EIP as the Endpoint.
- D. Create a AWS Network Load Balancer, configure the listener TCP port as 80, create a target group and register the servers as targets.

**Answer: A**

Explanation:

\* To enable inbound internet access to Virtual Servers in an NC2 cluster on AWS for the HTTPS protocol, the administrator should use an AWS Network Load Balancer (NLB).

\* Configure the NLB listener to listen on TCP port 443, which is the standard port for HTTPS traffic.

\* Create a target group in AWS, and register the servers (Virtual Servers in the NC2 cluster) as targets within this group.

\* Ensure the NLB is properly configured with an Elastic IP (EIP) if required, to provide a static IP address for the load balancer.

\* Verify that the security groups and network ACLs associated with the load balancer and the target group allow inbound traffic on port 443.

Refer to AWS documentation on Network Load Balancers and Nutanix NC2 on AWS integration guides for step-by-step instructions on setting up and configuring the necessary components for enabling HTTPS access.

#### NEW QUESTION # 28

An administrator is deploying Disaster Recovery for two NC2 clusters on AWS. The organization would prefer to use synchronous replication.

What are two supported configurations for this type of implementation? (Choose two.)

- A. Two NC2 on AWS clusters in the same region using native networking on the primary cluster, and Flow Virtual Networking on the other remote cluster.
- B. Two NC2 on AWS clusters in different regions using native networking on the primary cluster, and Flow Virtual Networking on the other remote cluster.
- C. Two NC2 on AWS clusters in the same region, using native networking on both clusters.
- D. Two NC2 on AWS clusters in different regions, using native networking on both clusters.

**Answer: A,C**

#### NEW QUESTION # 29

An administrator needs to backup Prism Central configuration data to an Amazon S3 bucket.

Which pcdr-cli command parameters is needed to satisfy this task?

- A. recover
- B. protect
- C. list-protection-targets
- D. deployment-info

**Answer: B**

Explanation:

To backup Prism Central configuration data to an Amazon S3 bucket, the pcdr-cli command with the protect parameter is used. This parameter is specifically designed for creating protection policies and backing up Prism Central data.

Nutanix Prism Central Documentation

Nutanix pcdr-cli Command Reference

## NEW QUESTION # 30

.....

Knowledge of the NCP-CI-AWS study materials contains is very comprehensive, not only have the function of online learning, also can help the user to leak fill a vacancy, let those who deal with qualification exam users can easily and efficient use of the NCP-CI-AWS study materials. By visit our website, the user can obtain an experimental demonstration, free after the user experience can choose the most appropriate and most favorite NCP-CI-AWS Study Materials download. Users can not only learn new knowledge, can also apply theory into the actual problem, but also can leak fill a vacancy, can say such case selection is to meet, so to grasp the opportunity!
