# 2026 ADA-C01–100% Free New Dumps Book | Trustable SnowPro Advanced Administrator Trustworthy Pdf

P.S. Free 2026 Snowflake ADA-C01 dumps are available on Google Drive shared by Itbraindumps: https://drive.google.com/open?id=1FiRmYcM9wMvvoXQ27J8TWr6mDhkKLMqz

Our specialists check daily to find whether there is an update on the ADA-C01 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our ADA-C01 test torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our ADA-C01 Exam Materials are absolutely safe and virus-free. If you encounter installation problems, we have professional IT staff to provide you with remote online guidance. We always put your needs in the first place.

Our Snowflake ADA-C01 exam questions are designed to provide you with the most realistic ADA-C01 experience possible. Each question is accompanied by an accurate answer, prepared by our team of experts. We also offer free Snowflake ADA-C01 Exam Questions updates for 1 year after purchase, as well as a free ADA-C01 practice exam questions demo before purchase.

Pass Guaranteed Quiz Updated Snowflake - ADA-C01 - New SnowPro Advanced Administrator Dumps Book

If you want to practice the ADA-C01 exam questions with different eletronic devices. We believe our APP version of ADA-C01 training braindump will be very convenient for you. In addition, the online version of our ADA-C01 training materials can work in an offline state. If you buy our ADA-C01 Study Guide, you have the chance to use our ADA-C01 study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our ADA-C01 exam questions.

Snowflake SnowPro Advanced Administrator Sample Questions (Q68-Q73):

NEW QUESTION # 68
The ACCOUNTADMIN of Account 123 works with Snowflake Support to set up a Data Exchange. After the exchange is populated with listings from other Snowflake accounts, what roles in Account 123 are allowed to request and get data?

- A. Any role that the listing provider has designated as authorized
- B. Only the ACCOUNTADMIN role, and no other roles
- C. Any role with IMPORT SHARE and CREATE DATABASE privileges
- D. Any role with USAGE privilege on the Data Exchange

Answer: D

Explanation:
Explanation
To request and get data from a Data Exchange, the role in Account 123 must have the USAGE privilege on the Data Exchange object. This privilege allows the role to view the listings and request access to the data.
According to the Snowflake documentation, "To view the listings in a data exchange, a role must have the USAGE privilege on the data exchange object. To request access to a listing, a role must have the USAGE privilege on the data exchange object and the IMPORT SHARE privilege on the account." The other options are either incorrect or not sufficient to request and get data from a Data Exchange. Option A is incorrect, as the ACCOUNTADMIN role is not the only role that can request and get data, as long as other roles have the necessary privileges. Option C is incorrect, as the IMPORT SHARE and CREATE DATABASE privileges are not required to request and get data, but only to create a database from a share after the access is granted.
Option D is incorrect, as the listing provider does not designate the authorized roles in Account 123, but only approves or denies the requests from Account 123.

NEW QUESTION # 69
A company enabled replication between accounts and is ready to replicate data across regions in the same cloud service provider.
The primary database object is : PROD_AWS_EAST. Location : AWS_EAST
The secondary database object is : PROD_AWS_WEST. Location : AWS_WEST
What command and account location is needed to refresh the data?

- A. Location : AWS_EAST
  Command : REFRESH DATABASE PROD_AWS_WEST REFRESH;
- B. Location : AWS EAST
  Command: ALTER DATABASE PROD_AWS_WEST REFRESH;
- C. Location : AWS_WEST
  Command : REFRESH DATABASE PROD_AWS WEST REFRESH;
- D. Location : AWS_WEST
  Command : ALTER DATABASE PROD AWS WEST REFRESH;

Answer: C

Explanation:
Explanation
The REFRESH DATABASE command is used to refresh a secondary database with the latest data and metadata from the primary database1. The command must be executed in the target account where the secondary database resides2. Therefore, the answer is A, as the location is AWS_WEST and the command is REFRESH DATABASE PROD_AWS_WEST REFRESH. The other options are incorrect because they either use the wrong location, the wrong command, or the wrong database name.

NEW QUESTION # 70
Which type of listing in the Snowflake Marketplace can be added and queried immediately?

- A. Personalized listing
- B. Regional listing
- C. Standard listing
- D. Monetized listing

Answer: C

Explanation:
According to the Snowflake documentation1, a standard listing is a type of listing that provides free access to the full data product, with no payment required. A standard listing can be added and queried immediately by the consumer, as long as they accept the terms and conditions of the listing. A monetized listing is a type of listing that charges for access to the data product, using the pricing models offered by Snowflake. A monetized listing requires the consumer to provide payment information and agree to the billing

terms before accessing the data product. A regional listing is not a type of listing, but a way to specify the regions where the listing is available. A personalized listing is a type of listing that provides limited trial access to the data product, with unlimited access to the full data product available upon request. A personalized listing requires the consumer to request access from the provider and wait for the provider to grant access before accessing the data product. Therefore, the only type of listing that can be added and queried immediately is the standard listing.

NEW QUESTION # 71

What roles can be used to create network policies within Snowflake accounts? (Select THREE).

- A. SYSADMIN
- B. SECURITYADMIN
- C. Any role that owns the database where the network policy is created
- D. ACCOUNTADMIN
- E. ORGADMIN
- F. Any role with the global permission of CREATE NETWORK POLICY

Answer: B,D,F

Explanation:
Explanation
Network policies are used to restrict access to the Snowflake service and internal stages based on user IP address1. To create network policies, a role must have the global permission of CREATE NETWORK POLICY2. By default, the system-defined roles of SECURITYADMIN and ACCOUNTADMIN have this permission3. However, any other role can be granted this permission by an administrator4. Therefore, the answer is B, C, and E. The other options are incorrect because SYSADMIN and ORGADMIN do not have the CREATE NETWORK POLICY permission by default3, and network policies are not tied to specific databases5.

NEW QUESTION # 72

What is required for stages, without credentials, to limit data exfiltration after a storage integration and associated stages are created?

- A. ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = true;
  ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = true;
  ALTER ACCOUNT my_account SET
  PREVENT_UNLOAD_TO_INLINE_URL = false;
- B. ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = false;
  ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = false;
  ALTER ACCOUNT my_account SET
  PREVENT_UNLOAD_TO_INLINE_URL = true;
- C. ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = true;
  ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION FOR STAGE_OPERATION = true;
  ALTER ACCOUNT my_account SET
  PREVENT_UNLOAD_TO_INLINE_URL = true;
- D. ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION = false;
  ALTER ACCOUNT my_account SET
  REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION = false;
  ALTER ACCOUNT my_account SET
  PREVENT_UNLOAD_TO_INLINE_URL = false;

Answer: C

Explanation:
According to the Snowflake documentation1, stages without credentials are a way to create external stages that use storage integrations to access data files in cloud storage without providing any credentials to Snowflake. Storage integrations are objects that

define a trust relationship between Snowflake and a cloud provider, allowing Snowflake to authenticate and authorize access to the cloud storage. To limit data exfiltration after a storage integration and associated stages are created, the following account-level parameters can be set:

* REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION: This parameter enforces that all external stages must be created using a storage integration. This prevents users from creating external stages with inline credentials or URLs that point to unauthorized locations.
* REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION: This parameter enforces that all operations on external stages, such as PUT, GET, COPY, and LIST, must use a storage integration. This prevents users from performing operations on external stages with inline credentials or URLs that point to unauthorized locations.
* PREVENT_UNLOAD_TO_INLINE_URL: This parameter prevents users from unloading data from Snowflake tables to inline URLs that do not use a storage integration. This prevents users from exporting data to unauthorized locations.

Therefore, the correct answer is option D, which sets all these parameters to true. Option A is incorrect because it sets PREVENT_UNLOAD_TO_INLINE_URL to false, which allows users to unload data to inline URLs that do not use a storage integration. Option B is incorrect because it sets both REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_CREATION and REQUIRE_STORAGE_INTEGRATION_FOR_STAGE_OPERATION to false, which allows users to create and operate on external stages without using a storage integration. Option C is incorrect because it sets all the parameters to false, which does not enforce any restrictions on data exfiltration.

NEW QUESTION # 73

......

In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our ADA-C01 test practice question can be your new target. When we get into the job, our ADA-C01 training materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our ADA-C01 Certification guide can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development. Believe it or not that up to you, our ADA-C01 training materials are powerful and useful, it can solve all your stress and difficulties in reviewing the ADA-C01 exams.

ADA-C01 Trustworthy Pdf: https://www.itbraindumps.com/ADA-C01_exam.html

Our ADA-C01 guide question dumps will never let you down, The Snowflake ADA-C01 certification exam is one of the top-rated and valuable credentials in the Snowflake world, Snowflake ADA-C01 Trustworthy Pdf experts carefully design the dumps to help you pass the exam, If you want to be familiar with the real exam and grasp the rhythm in the real test, you can choose our Snowflake ADA-C01 study materials to study, We provide updatedADA-C01 exam dumps pdf.

Articles and Other Publishing, Build a powerful online sales engine to track customers through the entire relationship, Our ADA-C01 Guide question dumps will never let you down.

The Snowflake ADA-C01 certification exam is one of the top-rated and valuable credentials in the Snowflake world, Snowflake experts carefully design the dumps to help you pass the exam.

SnowPro Advanced Administrator Valid Exam Reference & ADA-C01 Free Training Pdf & SnowPro Advanced Administrator Latest Practice Questions

If you want to be familiar with the real exam and grasp the rhythm in the real test, you can choose our Snowflake ADA-C01 study materials to study, We provide updatedADA-C01 exam dumps pdf.
