## Reliable Microsoft MD-102 Braindumps Ebook & Practice MD-102 Test

With MD-102 test guide, you only need a small bag to hold everything you need to learn. In order to make the learning time of the students more flexible, MD-102 exam materials specially launched APP, PDF, and PC three modes. With the APP mode, you can download all the learning information to your mobile phone. In this way, whether you are in the subway, on the road, or even shopping, you can take out your mobile phone for review. MD-102 study braindumps also offer a PDF mode that allows you to print the data onto paper so that you can take notes as you like and help you to memorize your knowledge.

## Microsoft Endpoint Administrator Sample Questions (Q334-Q339):

### NEW QUESTION # 334

You have a Microsoft 365 E5 subscription that contains a group named Group1.

You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.

You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.  
What should you configure?

- A. an assignment that uses a Sign-in risk condition
- **B. Session access controls**
- C. an assignment that uses a User risk condition
- D. Grant access controls

**Answer: B**

Explanation:

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.

The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.

Sign-in frequency control

Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.

Browse to Azure Active Directory > Security > Conditional Access.

Select New policy.

Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.

Choose all required conditions for customer's environment, including the target cloud apps.

Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

Save your policy.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-session-life>

### NEW QUESTION # 335

You have an Azure AD tenant that contains the devices shown in the following table.

Which devices can be activated by using subscription activation?

- **A. Device1 and Device3 only**
- B. Device 1 only
- C. Device1 and Device2 only
- D. Device1, Device2, Device3, and Device4

**Answer: A**

### NEW QUESTION # 336

You have an Azure AD tenant that contains the users shown in the following table.

You have the devices shown in the following table.

You have a Conditional Access policy named CAPolicy1 that has the following settings:

\* Assignments

o Users or workload identities: User 1, User1

o Cloud apps or actions: Office 365 Exchange Online

o Conditions: Device platforms: Windows, iOS

\* Access controls

o Grant Require multi-factor authentication

You have a Conditional Access policy named CAPolicy2 that has the following settings:

Assignments

o Users or workload identities: User2, User2

o Cloud apps or actions: Office 365 Exch

o Conditions

\* Device platforms: Android, iOS

\* Filter for devices

\* Device matching the rule: Exclude filtered devices from policy

\* Rule syntax: device.displayName- contains "I"

- \* Access controls
- \* Grant Block access

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

☐

**Answer:**

Explanation:

☐

### NEW QUESTION # 337

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.

The research department has several computers that have specialized hardware and software installed.

You need to prevent the video drivers from being updated automatically by using Windows Update.

Solution: From the Device Installation and Restrictions settings in a Group Policy object (GPO), you enable Prevent installation of devices using drivers that match these device setup classes, and then you enter the device GUID.

Does this meet the goal?

- A. Yes
- **B. No**

**Answer: B**

Explanation:

Prevent installation of devices using drivers that match these device setup classes.

This policy setting allows you to specify a list of device setup class globally unique identifiers (GUIDs) for driver packages that Windows is prevented from installing. By default, this policy setting takes precedence over any other policy setting that allows Windows to install a device.

Reference:

[https://admx.help/?Category=Windows\\_10\\_2016&Policy=Microsoft.Policies.DeviceInstallation::DeviceInstall\\_Classes\\_Deny](https://admx.help/?Category=Windows_10_2016&Policy=Microsoft.Policies.DeviceInstallation::DeviceInstall_Classes_Deny)

### NEW QUESTION # 338

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

Automatically enroll new devices and provision system apps without requiring end-user authentication.

Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐
