## Salesforce Order Management Administrator Accredited Professional Sample Questions (Q52-Q57):

### NEW QUESTION # 52

Universal Containers (UC) is evaluating Salesforce Order Management for managing its overarching process because their current system is written mostly in Apex code and has proved difficult to modify, deploy and debug. What are three advantages of using Flow Builder vs writing Apex code to manage the main flow of Order data?

- A. It allows for non-coding members of staff to contribute suggestions for optimizations and better overall customer experience

- B. The admin can easily debug specific business cases visually.
- C. It will notify the admin before a third party integration's data interface has changed
- D. The admin can attach a debugger to live customer sessions
- E. Because it is visual it is also self-documenting as changes are made

**Answer: B,D,E**

Explanation:

Three advantages of using Flow Builder vs writing Apex code to manage the main flow of Order data are:

The admin can attach a debugger to live customer sessions. This allows the admin to monitor and troubleshoot the flow execution in real time, without affecting the customer experience or data integrity.

The admin can easily debug specific business cases visually. This allows the admin to test the flow with different input values and see how the flow behaves in a graphical interface, without writing any code.

Because it is visual it is also self-documenting as changes are made. This allows the admin to easily understand and maintain the flow logic, as well as track the changes and versions of the flow.
