

# Guide 300-425 Torrent - 300-425 Exams

Top Tips to Ensure  
You Pass the Cisco  
300-425 ENWLSD  
Exam on First Try

What's more, part of that PDF4Test 300-425 dumps now are free: <https://drive.google.com/open?id=1dakOZKWmZk-mK64D8HmuH2ZIZ1ZsuHRO>

To address the problems of 300-425 exam candidates who are busy, PDF4Test has made the 300-425 dumps PDF format of real Designing Cisco Enterprise Wireless Networks (300-425) exam questions. This format's feature to run on all smart devices saves your time. Because of this, the portability of 300-425 dumps PDF aids in your preparation regardless of place and time restrictions. The second advantageous feature of the 300-425 Questions Pdf document is the ability to print Designing Cisco Enterprise Wireless Networks (300-425) exam dumps to avoid eye strain due to the usage of smart devices.

Cisco 300-425 exam is focused on assessing the candidate's ability to design and implement wireless network solutions that meet the requirements of large-scale enterprise organizations. 300-425 exam covers a wide range of topics, including wireless site surveys, wireless network design, wireless security, and wireless network implementation. Candidates who pass 300-425 exam will have the skills and knowledge required to design and implement wireless networks that are secure, reliable, and scalable.

Cisco 300-425 exam covers a variety of topics related to wireless network design and implementation, including site surveys, network topology, security, and troubleshooting. Successful candidates must demonstrate a deep understanding of wireless network technologies, such as 802.11 standards, RF technology, and antenna types. They must also have a strong grasp of network design principles, such as scalability, high availability, and redundancy.

Cisco 300-425 Exam is designed to test the knowledge and skills of network professionals in designing enterprise wireless networks using Cisco technologies. 300-425 exam is part of the Cisco Certified Design Expert (CCDE) certification program and is intended for those who are seeking to advance their careers in network design and architecture.

## 300-425 Exams, Interactive 300-425 EBook

The client only needs 20-30 hours to learn our 300-425 learning questions and then they can attend the test. Most people may devote their main energy and time to their jobs, learning or other important things and can't spare much time to prepare for the test. But if clients buy our 300-425 Training Materials they can not only do their jobs or learning well but also pass the test smoothly and easily because they only need to spare little time to learn and prepare for the 300-425 test.

## Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q193-Q198):

### NEW QUESTION # 193

Which two considerations must a network engineer have when planning for voice over wireless roaming?  
(Choose two.)

- A. Roaming time increases when using 802.1x + Cisco Centralized Key Management.
- B. Roaming occurs when the phone has seen at least four APs.
- C. Roaming with only 802.1x authentication requires full reauthentication.

- D. Full reauthentication introduces gaps in a voice conversation.
- E. Roaming occurs when the phone has reached -80 dBs or below.

Answer: C,D

Explanation:

Voice over wireless roaming is sensitive to delays and interruptions. Full reauthentication, as mentioned in option A, can cause noticeable gaps in a voice conversation because it requires time to re-establish security credentials. This process can interrupt the seamless experience expected in voice communications. Option E is also correct because roaming with only 802.1x authentication indeed requires full reauthentication, which can introduce significant delays affecting voice quality. References: For more detailed information, refer to the CCNP Enterprise Wireless Design ENWLSD 300-425 and Implementation ENWLSI 300-430 Official Cert Guide.

#### NEW QUESTION # 194

An engineer performs a Layer 1 survey by using Metageek chanalyzer only on the current operating channel. Which operating mode is configured for a Cisco CleanAIR AP?

- A. Sniffer
- B. Monitor
- C. Local
- D. SE-connect

Answer: C

Explanation:

#### Local Mode

Each Cisco CleanAir-enabled access point radio provides air quality and interference detection reports for the current operating channel only. Local mode does not disrupt client connections. When a hybrid-REAP access point is connected to the controller, its Cisco CleanAir functionality is identical to local mode.

#### NEW QUESTION # 195

Refer to the exhibit.

A WLC SSO pair is set up. Which failure scenario causes a split-brain scenario?

- A. VSL is down.
- B. RP is down.

- C. One distribution port on the active WLC is down.
- D. Two distribution ports on the active WLC are down.

**Answer: A**

Explanation:

The Virtual Switching Link (VSL) is essential for communication between the active and standby Wireless LAN Controllers (WLCs) in a Stateful Switch Over (SSO) setup. If the VSL goes down, it can lead to a split-brain scenario where both WLCs assume they are active, causing network disruptions and inconsistencies in client handling. References: Designing Cisco Enterprise Wireless Networks (ENWLSD 300-425) Official Cert Guide.

#### **NEW QUESTION # 196**

An engineer must assess an existing company WLAN to determine the possibility for future IEEE 802.11ac Wave 2 wireless deployment. The existing WLAN is IEEE 802.11a/n and has IEEE 802.11n and 802.11a clients. The engineer must advise the customer about support for these older clients on the new APs. What happens with client compatibility?

- A. 802.11ac is not backward compatible with 802.11a or 802.11n.
- B. 802.11ac is backward compatible with 802.11a but not with 802.11n.
- **C. 802.11ac is backward compatible with 802.11a and 802.11n.**
- D. 802.11ac is backward compatible with 802.11n but not with 802.11a.

**Answer: C**

Explanation:

IEEE 802.11ac Wave 2 APs are backward compatible with 802.11a/n clients, allowing these devices to connect and communicate with the newer APs, albeit at their respective maximum supported speeds.

#### **NEW QUESTION # 197**

An engineer working for an enterprise deployed multiple Cisco WLCs. A controller that sits in the R&D division is connected through a firewall and is part of the same mobility group. The engineer must ensure that the mobility tunneling is available through the firewall and test it as R&D engineers roam the production ..within their department. How is this requirement met?

- A. mapping on UDP port 16667 and mapping on Protocol 97 between management ports
- B. mapping on UDP port 16666 and mapping on Protocol 96 between management ports
- C. mapping on UDP port 16667 and mapping on Protocol 96 between management ports
- **D. mapping on UDP port 16666 and mapping on Protocol 97 between management ports**

**Answer: D**

Explanation:

For mobility tunneling through a firewall in a Cisco wireless network environment, UDP port 16666 must be open along with IP Protocol number '97', which is used for Encapsulating Security Payload (ESP) traffic typically found in IPsec tunnels. By ensuring these ports are mapped correctly through the firewall, R&D engineers can roam within their department while maintaining a secure mobility tunnel. #### **NEW QUESTION # 198**

.....

We provide Cisco 300-425 web-based self-assessment practice software that will help you to prepare for the Cisco Designing Cisco Enterprise Wireless Networks exam. Cisco 300-425 Web-based software offers computer-based assessment solutions to help you automate the entire Designing Cisco Enterprise Wireless Networks exam testing procedure. The stylish and user-friendly interface works with all browsers, including Mozilla Firefox, Google Chrome, Opera, Safari, and Internet Explorer. It will make your Cisco Designing Cisco Enterprise Wireless Networks exam preparation simple, quick, and smart. So, rest certain that you will discover all you need to study for and pass the Cisco 300-425 Exam on the first try.
