

100% Pass Quiz Nutanix - NCP-EUC Newest Valid Exam Objectives

What's more, part of that TestkingPass NCP-EUC dumps now are free: <https://drive.google.com/open?id=1GKHEH-45E4SQWXG4fanGs6OhixprFRjp>

At the TestkingPass, we strive to provide our customers with updated and real Nutanix NCP-EUC exam questions. We are committed to helping our students reach their goals and advance their careers through comprehensive, convenient, and cost-effective. Prepare for your Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam preparation material.

Nutanix NCP-EUC exam is a challenging certification that requires a significant amount of preparation and study. Candidates are encouraged to take advantage of the training and resources provided by Nutanix, including online training courses, study guides, and practice exams. NCP-EUC exam is available in a proctored format, ensuring that the certification is only awarded to individuals who have demonstrated their knowledge and skills in the field of end-user computing.

The NCP-EUC certification is highly valued in the IT industry and is recognized by organizations around the world. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification helps IT professionals to enhance their career prospects and provides them with the skills and knowledge required to deploy and manage Nutanix infrastructure for desktop and application virtualization. The NCP-EUC Exam is a challenging exam that requires a deep understanding of end-user computing and virtualization, but passing the exam is a great achievement that demonstrates the candidate's expertise in this area.

Nutanix NCP-EUC Exam Reference | Latest NCP-EUC Exam Cost

As you know, the NCP-EUC certificate is hard to get for most people. But our NCP-EUC study guide will offer you the most professional guidance. As old saying goes, opportunities are always for those who prepare themselves well. In the end, you will easily pass the NCP-EUC Exam through our assistance. Then you will find that your work ability is elevated greatly by studying our NCP-EUC actual exam. In the end, you will become an excellent talent.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q147-Q152):

NEW QUESTION # 147

An administrator receives complaints that non-persistent VDI sessions for an entire department have seen a dramatic change in performance. The most noticeable change is sluggish mouse and keyboard response within open sessions. No additional virtual desktop have been added to the environment in the previous 60 days.

What is the most likely culprit?

- A. Over-provisioning of virtual infrastructure
- B. Legacy network drivers or virtual agents
- C. Unoptimized master image
- D. Antivirus or Security Agent Scanning

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix VDI Troubleshooting and Performance Tuning best practices:

* Symptom Analysis: "Sluggish mouse and keyboard response" is a classic symptom of high CPU contention or high Latency on the host or VM. Since the environment was previously stable ("No additional virtual desktops added") and the change was "dramatic," it points to a new process consuming resources unexpectedly.

* The "Agent" Factor: In non-persistent VDI environments, a common cause for sudden performance degradation affecting an "entire department" is an Antivirus or Security Agent running a scheduled scan or a signature update simultaneously across all clones. This creates a "storm" of IOPS and CPU usage (often called an AV storm), starving the user sessions of the resources needed for basic input processing (mouse/keyboard).

* Why not others?

* Unoptimized master image (B): This would cause poor performance from day one, not a "dramatic change" after 60 days of stability.

* Legacy drivers (C): Drivers do not degrade suddenly; they would cause issues from the time of installation.

* Over-provisioning (D): This usually results in gradual degradation as user concurrency increases, not a sudden cliff-edge drop in performance if user counts haven't changed.

NEW QUESTION # 148

How should the administrator best organize gold images in a non-persistent Citrix MCS environment?

- A. Create a gold image for each separate business unit.
- B. Create a gold image based on the user subnet assignment,
- C. Create a base image without any applications and leverage Microsoft SCCM to deliver applications to the cloned virtual desktops.
- D. Build a single gold image with all the applications in the application catalog.

Answer: C

Explanation:

<https://www.nutanix.com/support-services/training-certification/certifications/certification-details-nutanix-certifi>

<https://docs.citrix.com/en-us/citrix-daas/install-configure/machine-catalogs-create.html> A gold image is a master image that contains the operating system, drivers, patches, and configurations for a virtual desktop. A non-persistent Citrix MCS environment is one where virtual desktops are created from a gold image and discarded after each user session.

Citrix Machine Creation Services (MCS) is a tool that uses a gold image to create and manage virtual machines for Citrix Virtual Apps and Desktops environments. MCS can create different types of machines, such as pooled random, static assigned, or dedicated².

One of the challenges of using MCS is managing multiple gold images for different user groups or application needs. Updating multiple gold images can be time-consuming and error-prone. Therefore, it is recommended to use a single base image without any applications and leverage another tool such as Microsoft System Center Configuration Manager (SCCM) to deliver applications dynamically to the cloned virtual desktops³.

This approach can simplify image management, reduce storage consumption, improve performance, and enhance user experience. SCCM can also provide additional features such as patch management, compliance enforcement, inventory reporting, etc.³

NEW QUESTION # 149

A previous administrator provisioned all of the virtual desktops in a virtual desktop Nutanix cluster using the following specifications:

* 6 vCPU

* 8 GB Memory

* 300 GB HDD

How can the current administrator best prepare next fiscal year's budget using Prism Central?

- A. Review the most recent in Audits.
- B. Review most recent in Tasks.
- C. Execute Capacity Runway scenario.
- D. Execute a Calm blueprint to add additional desktops.

Answer: C

Explanation:

In Nutanix Prism Central, the Capacity Runway scenario provides details on the available capacity for the next 12 months based on the current usage pattern. This feature can help the administrator to plan and prepare the budget for the next fiscal year. The administrator can use this information to decide whether more resources need to be added to the Nutanix cluster or if the existing resources are sufficient.

<https://www.nutanix.com/products/prism/prism-central>

Prism Central planning tools can help you estimate the capacity runway of your cluster by considering the storage, CPU, and memory capacity. However, you need to have at least 21 days of data from a cluster to calculate the baseline runway estimates⁴.

NEW QUESTION # 150

Which metric is available in customized reports when using the AHV Plug-in for Citrix Director?

- A. VM Average I/O latency
- B. VM Bandwidth latency
- C. VM CPU Ready time
- **D. VM Network utilization**

Answer: D

Explanation:

Nutanix AHV Plug-In for Citrix Director provides more information on Citrix generated desktops running on Nutanix AHV. Some of the metrics that are available in customized reports are:

VM CPU Usage

VM Memory Usage

VM Disk IOPS

VM Disk Bandwidth

NEW QUESTION # 151

A Windows IO VM fails to power on With an NVIDIA vCPU profile in ESXi 7. The VM is configured with NVIDIA profile by selecting Shared PCI Device, adding the NVIDIA GRID vCPU device, and selecting the Profile under VM settings.

The following error message is displayed in the vSphere web client:

```
An error was received from the ESX host while processing the VM state.  
Failed to start the virtual machine  
Module 'DevicePowerOn' power on failed.  
Could not initialize plugin '/usr/lib64/vmware/plugin/libnvidia-vgx.so' for vGPU 'grid_m60-4q'  
No graphics device is available for vGPU 'grid_m60-4q'.
```

What should be done to resolve this issue?

- A. Change the Graphics mode of the host from Shared to Shared Direct
- **B. Switch the GPU mode to graphics mode using gpumodeswitch command.**
- C. change the Graphics mode of the host from Shared Direct to Shared.
- D. Change the Graphics mode of the host from Shared to Shared Direct
- E. Switch the GPU mode to compute mode using gpumodeswitch command.

Answer: B

Explanation:

gpumodeswitch is a command-line tool that is used to switch supported NVIDIA GPUs between compute and graphics mode. Compute mode allows multiple VMs to share a GPU for CUDA workloads. Graphics mode allows a single VM to use a GPU for graphics workloads¹².
