我們Fast2test為你在真實的環境中找到真正的SAP的C\_S4TM\_2023考試準備過程，如果你是初學者和想提高你的教育知識或專業技能，Fast2test SAP的C\_S4TM\_2023考試考古題將提供給你，一步步實現你的願望，你有任何關於考試的問題，我們Fast2test SAP的C\_S4TM\_2023幫你解決，在一年之內，我們提供免費的更新，請你多關注一下我們網站。

## 最新的 SAP Certified Associate C\_S4TM\_2023 免費考試真題 (Q22-Q27):

### 問題 #22

What are generated in SAP ERP and transferred to SAP TM as requirements for planning in the context of shipping? Please choose the correct answer.

- A. SAP Manufacturing
- B. Discrete manufacturing
- C. Seamless integration
- D. Sales orders.

答案: D

### 問題 #23

You want to optimize the load that you have planned for one of your trucks. From which of the following can you start the load planning function? Note: There are 2 correct answers to this question.

- A. Freight order
- B. Freight booking
- C. Transportation cockpit
- D. Vehicle resource

答案: A,C

#### 解題說明:

In SAP S/4HANA Transportation Management, the load planning function optimizes the assignment of freight units to vehicles to maximize capacity utilization. According to the SAP documentation, load planning can be initiated from:

- \* Freight order (A): Load planning can be started directly from a freight order, allowing planners to optimize the load for the specific transport assigned to a truck.
- \* Transportation cockpit (D): The transportation cockpit provides a centralized interface for planning activities, including initiating load planning for one or more trucks.

The other options are incorrect:

- \* Vehicle resource (B) represents the truck itself but is not a direct entry point for starting load planning.
- \* Freight booking (C) is used for ocean or air transport and does not typically support load planning for trucks.

### 問題 #24

Which of the following can you use to determine a stage sequence in a forwarding order? Note: There are 2 correct answers to this question.

- A. Stage type
- B. Movement type
- C. Stage profile
- D. Shipping type

答案: B,C

#### 解題說明:

Transportation Management for Logistics Service Provider (LSP)

### 問題 #25

What is automatically determined based on the object being transferred from ERP when location data is created via the CIF. Please choose the correct answer.

- A. MES Access
- B. Intuitive mobile
- C. Give operators
- D. The location type

答案: D

### 問題 #26

Your customer wants to use the cost distribution function to include transportation costs in the material valuation. Which of the following documents can support this requirement? Note: There are 3 correct answers to this question.

- A. Purchase order
- B. Outbound delivery
- C. Sales order
- D. Inbound delivery
- E. Stock transport order

答案: A,D,E

解題說明:

In SAP S/4HANA Transportation Management, the cost distribution function allows transportation costs to be included in the material valuation, typically through integration with Materials Management (MM).

According to the SAP documentation, the following documents support this requirement:

- \* Purchase order (B): Purchase orders can include transportation costs as part of the procurement process, enabling these costs to be distributed to the material valuation in MM.
- \* Stock transport order (C): Stock transport orders, used for inter-plant or inter-company stock transfers, support the inclusion of transportation costs in the material valuation, as these costs are relevant to the transfer process.
- \* Inbound delivery (E): Inbound deliveries, which represent the receipt of goods, can incorporate transportation costs from freight settlement documents, allowing these costs to be distributed to the material valuation.

The other options are incorrect:

- \* Sales order (A) is used in sales and distribution to trigger transportation requirements but does not directly support cost distribution for material valuation.
- \* Outbound delivery (D) is relevant for shipping goods but is not typically used to distribute transportation costs to material valuation, as this is more applicable to inbound processes.
