

Cisco 350-401 Latest Practice Materials - New 350-401 Test Vce Free

CISCO 350-401 CCNP ENTERPRISE CERTIFICATION PRACTICE TEST

P.S. Free 2026 Cisco 350-401 dumps are available on Google Drive shared by Braindumpsqa: https://drive.google.com/open?id=1GHXr3lfARAHkakgl5vjvGe2B_fRto1MO

The great reputation of our 350-401 study materials has earned the title “the model study material for the test certification” for us. Our assiduous pursuit for high quality of our products creates our top-ranking 350-401 study materials and constantly increasing sales volume. Our company has forged a group of professional experts with the excelsior craftsmanship and a mature service system. The quality of our 350-401 Study Materials is high because our experts team organizes and compiles them according to the real exam’s needs and has extracted the essence of all of the information about the test.

Cisco 350-401 ENCOR Exam consists of 90 to 110 questions that must be answered within 120 minutes. 350-401 exam is computer-based and can be taken at any Pearson VUE test center. 350-401 exam format includes multiple-choice questions, drag-and-drop questions, testlets, and simulations. Candidates who pass the exam will earn the Cisco Certified Specialist - Enterprise Core certification, which is a valuable credential for IT professionals who want to demonstrate their expertise in implementing and troubleshooting enterprise network solutions.

Passing the 350-401 ENCOR exam is a significant achievement that opens up numerous career opportunities for IT professionals. Cisco is a reputable company that is known for providing high-quality training and certification programs that are recognized worldwide. Therefore, obtaining the Cisco 350-401 Certification demonstrates to employers that one has the skills and knowledge required to implement and manage complex enterprise network solutions.

To successfully pass the Cisco 350-401 exam, candidates need to have a strong understanding of network architecture, design, and configuration. They should be familiar with network automation, security, and troubleshooting. 350-401 exam also covers advanced topics such as wireless access, virtualization, and network programmability.

New 350-401 Test Vce Free, Reasonable 350-401 Exam Price

Due to extremely high competition, passing the Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) exam is not easy; however, possible. You can use Braindumpsqa products to pass the 350-401 exam on the first attempt. The Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) exam on the first attempt. Braindumpsqa 350-401 Questions have helped thousands of candidates to achieve their professional dreams.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q91-Q96):

NEW QUESTION # 91

Refer to the exhibit.

Refer to the exhibit. POSTMAN is showing an attempt to retrieve network device information from Cisco Catalyst Center (formerly DNA Center) API. What is the issue?

- A. The JSON payload contains the incorrect UUID
- B. The URI string is incorrect
- C. Authentication has failed
- D. The token has expired

Answer: A

NEW QUESTION # 92

Which method is used by an AP to join HA controllers and is configured in NVRAM?

- A. Primary/Secondary/Tertiary/Backup
- B. IP Helper Addresses
- C. stored WLC information
- D. DNS

Answer: C

Explanation:

An access point (AP) uses stored WLC information in NVRAM to join high-availability (HA) wireless LAN controllers. This stored information includes the IP addresses of previously learned or statically configured WLCs, allowing the AP to attempt joining those controllers during the boot process. This ensures a seamless connection to an appropriate WLC for management and operation. Other options like Primary/Secondary/Tertiary configuration and DNS are additional mechanisms, but they are not directly related to the NVRAM-stored WLC information.

NEW QUESTION # 93

Wireless users report frequent disconnections from the wireless network. While troubleshooting a network engineer finds that after the user a disconnect, the connection re-establishes automatically without any input required. The engineer also notices these message logs .

Which action reduces the user impact?

- A. increase BandSelect
- B. enable coverage hole detection
- C. increase the AP heartbeat timeout
- D. increase the dynamic channel assignment interval

Answer: D

Explanation:

Explanation

These message logs inform that the radio channel has been reset (and the AP must be down briefly). With dynamic channel assignment (DCA), the radios can frequently switch from one channel to another but it also makes disruption. The default DCA interval is 10 minutes, which is matched with the time of the message logs. By increasing the DCA interval, we can reduce the number of times our users are disconnected for changing radio channels.

One of the best practices to secure REST APIs is using password hash. Passwords must always be hashed to protect the system (or minimize the damage) even if it is compromised in some hacking attempts. There are many such hashing algorithms which can prove really effective for password security e.g. PBKDF2, bcrypt and scrypt algorithms.

Other ways to secure REST APIs are: Always use HTTPS, Never expose information on URLs (Usernames, passwords, session tokens, and API keys should not appear in the URL), Adding Timestamp in Request, Using OAuth, Input Parameter Validation.

NEW QUESTION # 94

A customer has a wireless network deployed within a multi-tenant building. The network provides client access, location-based services, and is monitored using Cisco DNA Center.

The security department wants to locate and track malicious devices based on threat signatures.

Which feature is required for this solution?

- A. malicious rogue rules on Cisco DNA Center
- B. malicious rogue rules on the WLC
- C. Cisco aWIPS policies on the WLC
- D. Cisco aWIPS policies on Cisco DNA Center

Answer: D

Explanation:

As the aWIPS functionality is integrated into Cisco DNA Center, the aWIPS can configure and monitor WIPS policies and alarms and report threats.

NEW QUESTION # 95

Drag and drop the automation characteristics from the left onto the appropriate tools on the right.

Answer:

Explanation:

NEW QUESTION # 96

.....

The Cisco world is changing its dynamics at a fast pace. This trend also impacts the Cisco 350-401 certification exam topics. The new topics are added on regular basis in the Cisco 350-401 exam syllabus. You need to understand these updated 350-401 exam topics or any changes in the syllabus. It will help you to not miss a single Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) exam question in the final exam. The Braindumpsqa understands this problem and offers the perfect solution in the form of Braindumpsqa 350-401 updated exam questions.
