The more efficient the materials you get, the higher standard you will be among competitors. So, high quality and high accuracy rate CLO-002 practice materials are your ideal choice this time. By adding all important points into CLO-002 practice materials with attached services supporting your access of the newest and trendiest knowledge, our CLO-002 practice materials are quite suitable for you right now.

### CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q540-Q545):

#### NEW QUESTION # 540

Which of the following concepts will help lower the attack surface after unauthorized user-level access?

- A. Audit
- **B. Hardening**
- C. Sanitization
- D. Validation

**Answer: B**

Explanation:

Hardening is the concept that will help lower the attack surface after unauthorized user-level access. Hardening is the process of securing a system by reducing its vulnerability to attacks.

Hardening involves applying patches, updates, and configuration changes to eliminate or mitigate known weaknesses. Hardening also involves disabling or removing unnecessary services, features, and accounts that could be exploited by attackers. Hardening can help lower the attack surface by reducing the amount of code running, the number of entry points available, and the potential damage that can be caused by unauthorized access.

#### NEW QUESTION # 541

Which of the following technologies are related to Web services?

- **A. HTML, JSON, XML**
- B. HTML, IDM, JSON
- C. DM, JSON, XML
- D. HTML, IDM, XML

**Answer: A**

#### NEW QUESTION # 542

The cloud consumer compliance team requires the IT department to patch and update cloud resources properly. Which of the following cloud service delivery models will BEST suit this need?

- A. DRaaS
- **B. IaaS**
- C. DBaaS
- D. SaaS

**Answer: B**

Explanation:

Infrastructure as a service (IaaS) is a cloud service delivery model that provides on-demand infrastructure resources to organizations via the cloud, such as compute, storage, networking, and virtualization<sup>4</sup>. IaaS is the most suitable cloud service delivery model for patching and updating cloud resources properly, as it gives the cloud consumer compliance team more control and flexibility over the operating system, middleware, virtual machines, and any apps or data<sup>5</sup>. IaaS also enables automation and orchestration of the provisioning process, as well as scalability and reliability of the infrastructure<sup>6</sup>.

#### NEW QUESTION # 543

The Chief Executive Officer (CEO) of a fast-growing, global startup has realized the need for more structured service delivery. The CEO asks all departments to adopt international standards.

Which of the following is an outcome of this exercise?

- A. Department-specific policies
- B. Communication plan
- C. Data sovereignty
- D. Standard operating procedures

**Answer: D**

Explanation:

Standard operating procedures (SOPs) provide structured guidelines and processes for consistent service delivery across departments and organizations. By adopting international standards, the company can establish SOPs that ensure uniformity, quality, and efficiency in its operations, which is particularly important for a fast-growing, global startup. SOPs help align departments with best practices and compliance requirements, ensuring that service delivery is structured and standardized.

#### NEW QUESTION # 544

Which of the following risk results if cloud computing providers limit their Service Level Agreement (SLA) liabilities?

- A. Compliance risk
- B. Legal risk
- C. Security risk
- D. Privacy risk

**Answer: B**

#### NEW QUESTION # 545
