Google-Workspace-Administrator시험패스 가능한 인증덤프 - Google-Workspace-Administrator높은 통과율 덤프공부자료

Google Google-Workspace-Administrator인증시험에 응시하고 싶으시다면 좋은 학습자료와 학습 가이드가 필요합니다.Google Google-Workspace-Administrator시험은 it업계에서도 아주 중요한 인증입니다. 시험패스를 원하신다면 충분한 시험준비는 필수입니다.

최신 Workspace Administrator Google-Workspace-Administrator 무료샘플문제 (Q46-Q51):

질문 # 46

What steps does an administrator need to take to enforce TLS with a particular domain?

- A. Set up secure transport compliance with the receiving domain.
- B. Set up DKIM authentication with the receiving domain.
- C. Configure an alternate secure route with the receiving domain.
- D. Enable email safety features with the receiving domain.

정답: A

설명:

<https://support.google.com/a/answer/2520500>

hl=en&~:text=Add%2C%20Secure%20transport%20(TLS)%20compliance%2C%20setting%2C%20to%20always%20use%20TLS%20for%20email%20sent%20to%20and%20from%20domains%20a

질문 # 47

Your chief compliance officer is concerned about API access to organization data across different cloud vendors. He has tasked you with compiling a list of applications that have API access to Google Workspace data, the data they have access to, and the number of users who are using the applications. How should you compile the data being requested?

- A. Review the API permissions installed apps list, and export the list.
- B. Review the authorized applications for each user via the Google Workspace Admin panel.
- C. Review the token audit log, and compile a list of all the applications and their scopes.
- D. Create a survey via Google forms, and collect the application data from users.

정답: C

설명:

* Access Admin Console: Log into your Google Workspace Admin Console.

* Navigate to Reports: Go to the Reports section in the Admin Console.

* Token Audit Log: Within the Reports, access the "Token Audit" log. This log provides details on OAuth tokens issued to applications by your users.

* Review Applications: Review the list of applications that have been granted access to your Google Workspace data. This will include information about the scopes (types of data) that each application can access.

* Compile List: Create a list of all the applications from the token audit log. Include details about the data they have access to and the number of users using each application.

* Export Data: You can export this data to a spreadsheet for further analysis and reporting to your chief compliance officer.

References

* Google Support: Token audit log

질문 # 48

Your executive team has asked you to export all available data for 1,200 of your 1,500 Google Workspace Domain users. How should you proceed to export the data with the least amount of effort?

- A. Create a shared drive for the exports. Instruct end users to manually use Google Takeout to export the data and place the exported files in the shared drive.
- B. Perform a search in Google Vault for the 500 users and export all of the results.
- C. Contact Google Cloud Support to enable the Data Export tool for your organization, because you have more than 1,000 users, then use the tool to export data for the domain, and remove any unnecessary user data.
- D. Contact Google Cloud support to perform the export for you.

정답: C

설명:

If there are more than 1,000 users in your organization, Contact Google Workspace support before you use the Data Export tool. The Google Workspace support team does not access or process the data that will be exported via the Data Export tool.
