EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q135-Q140):

NEW QUESTION # 135

During the discovery step of implementation, an unconfigured PowerStore is unavailable. Which firewall ports must be open for a successful discovery?

- A. TCP and UDP ports 443 and 80
- B. TCP port 8443 and UDP port 5353
- **C. TCP port 5353 and UDP port 5353**
- D. TCP port 80 and UDP port 80

Answer: C

Explanation:

To properly discover a Dell PowerStore appliance using the Discovery Utility, you need to ensure that the following ports are open: TCP/UDP 5353: This port is used for mDNS (Multicast DNS) which is the protocol used by the PowerStore Discovery Utility to

locate unconfigured PowerStore appliances. mDNS is essential for the appliance discovery process. (Grok 2)

* mDNS (Multicast DNS): PowerStore uses mDNS for discovery, especially when the array is unconfigured. mDNS allows devices to discover each other on a local network without needing a pre-configured DNS server. This is essential for the initial setup and discovery of a new PowerStore system.

* Port 5353: This is the standard port used for mDNS communication. Both TCP and UDP port 5353 need to be open for mDNS to function correctly.

NEW QUESTION # 136

What is a result of removing a remote replication session?

- A. Replica is deleted from the replication destination.
- B. Remote system relationship is removed.
- C. Replica data state is preserved on source system snapshot.
- **D. Replica remains on the replication destination.**

Answer: D

NEW QUESTION # 137

What is the purpose of migration throttling in PowerStore Migration?

- A. To accelerate the migration process
- B. To restrict data movement to only one source
- C. To prevent access to migrated data
- **D. To limit the impact on network performance**

Answer: D

NEW QUESTION # 138

A PowerStore T administrator discovers that only one port on each node is active and passing traffic. The other port is healthy and online, but total bandwidth is only half of what the customer expects.

Which two actions could resolve the issue? (Choose two.)

- **A. Configure Dynamic LAG**
- **B. Configure LACP**
- C. Configure VLT
- D. Configure RSTP

Answer: A,B

NEW QUESTION # 139

What is the default exposed LUN0 used for?

- A. vVol protocol endpoint
- B. NVMe Discovery Controller
- **C. Storage Array Controller Device**
- D. Internal migration reserve LUN

Answer: C

Explanation:

LUN 0 and the Storage Array Controller Device (SACD)

In PowerStore, LUN 0 has a specific and important function: it's used for the Storage Array Controller Device (SACD).

SACD: The SACD is a virtual device that provides access to the PowerStore appliance's internal management and control functions. It's essential for tasks like: Monitoring the health and status of the array Managing and configuring storage resources Troubleshooting issues LUN 0 as the Access Point: LUN 0 serves as the access point to the SACD. It allows authorized users and management tools to communicate with the SACD and perform necessary management operations.

Why other options are incorrect:

B). vVol protocol endpoint: PowerStore uses LUNs 254 and 255 for the vVol (vSphere Virtual Volumes) protocol endpoint.

C). Internal migration reserve LUN: PowerStore doesn't use a specific LUN for internal migration reserves. Migration operations utilize the cluster network and available storage resources dynamically.

D). NVMe Discovery Controller: NVMe discovery in PowerStore doesn't rely on a dedicated LUN. It uses standard NVMe-oF discovery mechanisms over the network. Important Notes Not a Typical LUN: LUN 0 is not a standard LUN that can be used for storing data. It's a specialized LUN dedicated to the SACD.

Automatic Exposure: PowerStore exposes LUN 0 by default. You don't need to manually create or configure it.

Dell PowerStore Reference

PowerStore: Host Configuration Guide: This guide provides information about connecting hosts to PowerStore, including details about specialized LUNs like the SACD. You can find the latest version of this guide on the Dell Support site.
