최신 Enterprise Architecture OGEA-103 무료 샘플문제 (Q61-Q66):

질문 # 61

What should be put in place through organization structures, roles, responsibilities, skills and processes to carry out architectural activity effectively?

- A. An EA Capability
- B. An EA repository
- C. An Enterprise Architecture
- D. An EA framework

정답: A

설명:

An EA Capability is the ability of an organization to perform enterprise architecture effectively and efficiently. It involves establishing and maintaining the appropriate organization structures, roles, responsibilities, skills, processes, tools, and governance mechanisms to support the development and use of enterprise architecture. An EA Capability enables the organization to align its business and IT strategies, deliver value from its investments, manage change and complexity, and improve its performance and agility¹² Reference: 1: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 44: Introduction 2: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 45: Establishing and Maintaining an Enterprise Architecture Capability

질문 # 62

Which of the following statements about architecture partitioning are correct*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 1 & 3
- B. 2 & 4
- C. 2 & 3
- D. 1 & 4

정답: A

설명:

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture.

Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries. Reference: The TOGAF Standard | The Open Group Website, Section 2.5 Architecture Partitioning.

질문 # 63

Which of the following best describes the purpose of the Architecture Requirements Specification?

- A. It contains an assessment of the current architecture requirements
- B. It defines the scope and approach to complete an architecture project
- C. It provides a set of statements that outline what a project must do to comply with the architecture
- D. It is sent from the sponsor and triggers the start of an architecture development cycle

정답: C

설명:

The Architecture Requirements Specification is one of the TOGAF deliverables that provides a set of quantitative statements that

outline what an implementation project must do in order to comply with the architecture¹². It is a companion to the Architecture Definition Document, which provides a qualitative view of the solution and aims to communicate the intent of the architect. The Architecture Requirements Specification provides a quantitative view of the solution, stating measurable criteria that must be met during the implementation of the architecture³. It typically forms a major component of an implementation contract or contract for more detailed Architecture Definition⁴. Reference:

질문 # 64

Which of the following describes a purpose of Architecture Principles?

- A. To establish a common understanding of how to control the business in pursuit of strategic objectives
- B. To form a contract between sponsoring organization and the enterprise architects
- C. To describe likely impacts resulting from successful deployment of the target architecture.
- D. To provide a better understanding about the enterprise's culture and values

정답: A

설명:

Explanation

Architecture Principles are general rules and guidelines that inform and support the way in which an organization sets about fulfilling its mission. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions. One of the purposes of Architecture Principles is to establish a common understanding of how to control the business in pursuit of strategic objectives, by providing a framework for evaluating and agreeing on the changes that affect the enterprise's architecture³ References: 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 23:

질문 # 65

Which section of the TOGAF template for Architecture Principles should highlight the business benefits of adhering to the principle?

- A. Statement
- B. Rationale
- C. Implications
- D. Name

정답: B

설명:

According to the TOGAF Standard, 10th Edition, the rationale section of the architecture principles template should highlight the business benefits of adhering to the principle, as well as the business risks of not adhering to it ¹. The rationale section should explain the reasoning behind the principle, and provide evidence or arguments to support it. The rationale section should also link the principle to the business drivers, goals, and objectives of the enterprise, and show how the principle contributes to the value and success of the enterprise.

The other options are not correct, as they have different purposes in the architecture principles template. The name section should provide a short and memorable name for the principle, such as "Information is an Asset" or "Business Continuity" ¹. The statement section should provide a concise and formal statement of the principle, such as "The enterprise's information is recognized as a core asset, and is managed accordingly" or

"The enterprise's ability to provide critical services and products must be maintained in the event of a disaster" ¹. The implications section should identify the impact of the principle on the enterprise, such as the changes, costs, benefits, and risks that may result from applying or violating the principle ¹.
