

# Correct SAP New C\_TS422\_2023 Study Guide With Interarctive Test Engine & Professional C\_TS422\_2023 Test Registration

P.S. Free 2025 SAP C\_TS422\_2023 dumps are available on Google Drive shared by PracticeTorrent:  
[https://drive.google.com/open?id=1x9nS5hAcclhnHvW\\_HiKYGKFFDTcssMf03](https://drive.google.com/open?id=1x9nS5hAcclhnHvW_HiKYGKFFDTcssMf03)

Furthermore, it is our set of C\_TS422\_2023 brain dumps that stamp your success with a marvelous score. The dumps include C\_TS422\_2023 study questions that likely to be set in real C\_TS422\_2023 exam. They provide you a swift understanding of the key points of C\_TS422\_2023 covered under the syllabus contents. Going through them enhances your knowledge to the optimum level and enables you to ace exam without any hassle. No need of running after unreliable sources such as free courses, online C\_TS422\_2023 courses for free and C\_TS422\_2023 dumps that do not ensure a passing guarantee to the C\_TS422\_2023 exam candidates.

## SAP C\_TS422\_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Introduction to SAP S</li><li>• 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S</li><li>• 4HANA, its main components, business applications, and user experience strategy.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Demand Management in SAP S</li> <li>• 4HANA: This section covers a comparison of production methods in various manufacturing environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Advanced Planning in SAP S</li> <li>• 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Production Orders in SAP S</li> <li>• 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Process Orders in SAP S</li> <li>• 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Capacity Planning in SAP S</li> <li>• 4HANA: This section covers a discussion of SAP S</li> <li>• 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Master Data in SAP S</li> <li>• 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Lean Manufacturing in SAP S</li> <li>• 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Introduction to SAP S</li> <li>• 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.</li> </ul>

## C\_TS422\_2023 Test Registration & C\_TS422\_2023 Prep Guide

Our C\_TS422\_2023 exam questions have been designed by the experts after an in-depth analysis of the exam and the study interest and hobbies of the candidates. You avail our C\_TS422\_2023 study guide in three formats, which can easily be accessed on all digital devices without any downloading any additional software. And they are also auto installed. It is very fast and conveniente. Our C\_TS422\_2023 learning material carries the actual and potential exam questions, which you can expect in the actual exam.

## SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q42-Q47):

### NEW QUESTION # 42

In documentation for MRP in Advanced Planning you read that new orders are created through infinite planning. What does this mean for the capacity requirements of a new order?

- A. MRP assigns the capacity requirements automatically after the last scheduled operation for each work center.
- B. MRP creates the capacity requirements at the earliest possible time.
- C. MRP assigns the capacity requirements automatically to work centers with the earliest available capacity.
- D. MRP creates the capacity requirements without considering existing load on the work centers.

**Answer: A**

### NEW QUESTION # 43

Where do you maintain the work center that represents the production line for repetitive manufacturing?

Note: There are 2 correct answers to this question

- A. Routing
- B. Repetitive manufacturing profile
- C. Production version
- D. Production cost collector

**Answer: B,C**

Explanation:

The work center that represents the production line for repetitive manufacturing is maintained in two places: the repetitive manufacturing profile and the production version. The repetitive manufacturing profile is a control parameter that defines the basic settings for repetitive manufacturing, such as the planning type, the backflushing method, the confirmation type, and the production line determination. The production version is a combination of a bill of material (BOM) and a routing or a rate routing that specifies how a material is produced. The production version also contains the work center that represents the production line for the material. The production version is assigned to the material master and is used in the planning and execution of repetitive manufacturing. Reference: Repetitive Manufacturing Profile | SAP Help Portal, Production Version | SAP Help Portal, Make-to-Stock Repetitive Manufacturing | SAP Help Portal.

### NEW QUESTION # 44

Where do you maintain the work center that represents the production line for repetitive manufacturing? Note:

There are 2 correct answers to this question.

- A. Routing
- B. Repetitive manufacturing profile
- C. Production version
- D. Production cost collector

**Answer: A,C**

Explanation:

In SAP S/4HANA repetitive manufacturing, the production line is represented by a work center, and this is maintained in:

\* Production version(B): The production version (material master, MRP 4 view, transaction C223) links a material to a specific production line by referencing a work center (via the routing or rate routing).

The "Production Line" field explicitly identifies the work center used for repetitive production, tying it to the planning table (MF50).

\* Routing(D): In repetitive manufacturing, a rate routing (transaction CA21) or standard routing (CA01) defines the operations and assigns the work center (field: Work Center) that represents the production line. This work center is then referenced in the production version for planning and execution.

Production cost collector(A) (transaction KKF6N) collects costs for repetitive production but doesn't define the work center-it uses the production version's data. Repetitive manufacturing profile(C) (Customizing, transaction OSP2) controls REM settings (e.g., backflushing), not the specific work center assignment. This is per SAP's REM master data setup.

### NEW QUESTION # 45

How would you define pegging in the context of Advanced Planning?

- A. An evaluation to verify if there are material or capacity shortages in the
