

AI-102시험패스가능덤프100%합격보장가능한최신덤프자료

참고: Itexamdump에서 Google Drive로 공유하는 무료, 최신 AI-102 시험 문제집이 있습니다:
<https://drive.google.com/open?id=1NESORB-xZhhRAVPsY5Jq3ioqNHPvbl0>

현재 많은 IT인사들이 같은 생각하고 있습니다. 그것은 바로Microsoft AI-102인증시험자격증 취득으로 하여 IT업계의 아주 중요한 한걸음이라고 말합니다. 그만큼Microsoft AI-102인증시험의 인기는 말 그대로 하늘을 찌르고 있습니다,

IT인증시험에 도전해보려는 분들은 회사에 다니는 분들이 대부분입니다. 승진을 위해서나 연봉협상을 위해서나 자격증 취득은 지금시대의 필수입니다. Itexamdump의Microsoft인증 AI-102덤프는 회사다니느라 바쁜 나날을 보내고 있는 분들을 위해 준비한 시험준비공부자료입니다. Itexamdump의Microsoft인증 AI-102덤프를 구매하여 pdf버전을 공부하고 소프트웨어버전으로 시험환경을 익혀 시험보는게 두렵지 않게 해드립니다. 문제가 적고 가격이 저렴해 누구나 부담없이 애용 가능합니다. Itexamdump의Microsoft인증 AI-102덤프를 데려가 주시면 기적을 안겨드릴게요.

>> AI-102시험패스 가능 덤프 <<

AI-102자격증참고서 & AI-102최고합격덤프

Itexamdump 는 전문적으로 Microsoft전문인사들에게 도움을 드리는 사이트입니다. 많은 분들의 반응과 리뷰를 보면 우리Itexamdump의 AI-102제품이 제일 안전하고 최신이라고 합니다. Itexamdump의 학습가이드는 아주 믿음이 가는 문제집들만 있으니까요. Itexamdump 덤프의 문제와 답은 모두 제일 정확합니다. 왜냐면 우리의 전문가들은 매일 최신버전을 갱신하고 있기 때문입니다.

Microsoft AI-102 시험은 AI 엔지니어, 데이터 과학자, 솔루션 건축가 또는 개발자로 일하고 Azure Machine Learning, Azure Cognitive Services 및 Azure Bot Service와 같은 Azure 서비스에 대한 경험이있는 전문가를위한 것입니다. 또한 AI에서 경력을 쌓고 있으며 인정된 인증을 통해 자신의 기술과 지식을 검증하려는 개인에게도 적합합니다.

최신 Azure AI Engineer Associate AI-102 무료샘플문제 (Q299-Q304):

질문 # 299

How are client applications granted access to a cognitive services endpoint?

- A. The application must specify a valid subscription key for the Azure resource.
- B. Access to cognitive services is granted to anonymous users by default.
- C. The user must enter a username and password associated with the Azure subscription.

정답: A

설명:

Access to a cognitive services resource is restricted through the use of subscription keys.

질문 # 300

You have an Azure subscription that contains an Azure AI Content Safety resource named Resource1 and a storage account named storage1.

You create a blob container named container1 and upload a sample set of image files to container1.

You need to validate whether Resource1 can identify images that contain potential violence.

How should you complete the cURL command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
curl --location --request POST
'https://resource1.cognitiveservices.azure.com'
'/contentsafety'
'/contentmoderator'
'/contentsafety'
'/vision'
'/image:analyze'
'/detect'
'/image:analyze'
'/ProcessImage'
?api-version=2024-09-01' \

--header 'Ocp-Apim-Subscription-Key: 33e5df16c33f43a5942926d8a8ac32b6' \
--header 'Content-Type: application/json' \
--data-raw '{
  "image": {
    "blobUrl": "https://storage1.blob.core.windows.net/container1"
  }
}'
```

정답:

설명:

Topic 2, Wide World Importers

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Existing Environment

A company named Wide World Importers is developing an e-commerce platform.

You are working with a solutions architect to design and implement the features of the e-commerce platform. The platform will use microservices and a serverless environment built on Azure.

Wide World Importers has a customer base that includes English, Spanish, and Portuguese speakers.

Applications

Wide World Importers has an App Service plan that contains the web apps shown in the following table.

Name	Description
Product Management	An app used by employees to create and manage products. The app and the expected inputs from the employees are in English.
Inventory Tracking	An app used by employees to manage inventory when dispatching orders, receiving refunds, and receiving consignments from suppliers.

Azure Resources

You have the following resources:

An Azure Active Directory (Azure AD) tenant

The tenant supports internal authentication.

All employees belong to a group named AllUsers.

Senior managers belong to a group named LeadershipTeam.

An Azure Functions resource

A function app posts to Azure Event Grid when stock levels of a product change between OK, Low Stock, and Out of Stock. The function app uses the Azure Cosmos DB change feed.

An Azure Cosmos DB account

The account uses the Core (SQL) API.

The account stores data for the Product Management app and the Inventory Tracking app.

An Azure Storage account

The account contains blob containers for assets related to products.

The assets include images, videos, and PDFs.

An Azure Cognitive Services resource named wwics

A Video Indexer resource named wwivi

Requirements

Business Goals

Wide World Importers wants to leverage AI technologies to differentiate itself from its competitors.

Planned Changes

Wide World Importers plans to start the following projects:

A product creation project: Help employees create accessible and multilingual product entries, while expediting product entry creation.

A smart e-commerce project: Implement an Azure Cognitive Search solution to display products for customers to browse.

A shopping-on-the-go project: Build a chatbot that can be integrated into smart speakers to support customers.

Business Requirements

Wide World Importers identifies the following business requirements for all the projects:

Provide a multilingual customer experience that supports English, Spanish, and Portuguese.

Whenever possible, scale based on transaction volumes to ensure consistent performance.

Minimize costs.

Governance and Security Requirements

Wide World Importers identifies the following governance and security requirements:

Data storage and processing must occur in datacenters located in the United States.

Azure Cognitive Services must be inaccessible directly from the internet.

Accessibility Requirements

Wide World Importers identifies the following accessibility requirements:

All images must have relevant alt text.

All videos must have transcripts that are associated to the video and included in product descriptions.

Product descriptions, transcripts, and all text must be available in English, Spanish, and Portuguese.

Product Creation Requirements

Wide World Importers identifies the following requirements for improving the Product Management app:

Minimize how long it takes for employees to create products and add assets.

Remove the need for manual translations.

Smart E-Commerce Requirements

Wide World Importers identifies the following requirements for the smart e-commerce project:

Ensure that the Cognitive Search solution meets a Service Level Agreement (SLA) of 99.9% availability for searches and index writes.

Provide users with the ability to search insight gained from the images, manuals, and videos associated with the products.
 Support autocompletion and autosuggestion based on all product name variants.
 Store all raw insight data that was generated, so the data can be processed later.
 Update the stock level field in the product index immediately upon changes.
 Update the product index hourly.
 Shopping On-the-Go Requirements
 Wide World Importers identifies the following requirements for the shopping on-the-go chatbot:
 Answer common questions.
 Support interactions in English, Spanish, and Portuguese.
 Replace an existing FAQ process so that all Q&A is managed from a central location.
 Provide all employees with the ability to edit Q&As. Only senior managers must be able to publish updates.
 Support purchases by providing information about relevant products to customers. Product displays must include images and warnings when stock levels are low or out of stock.
 Product JSON Sample
 You have the following JSON sample for a product.

```

{
  "sku": "b1",
  "name": {
    "en": "Bicycle",
    "es": "Bicicleta",
    "pt": "Bicicleta"
  },
  "stocklevel": "Out of Stock",
  "description": {
    "en": "Bicycle",
    "es": "Bicicleta",
    "pt": "Bicicleta"
  },
  "image": {
    "uri": "https://upload.worldwideimporters.org/bicycle.jpg",
    "alttext": {
      "en": "Bicycle",
      "es": "Bicicleta",
      "pt": "Bicicleta"
    }
  },
  "createdUtc": "2020-02-14T06:08:39Z",
  "language": "en"
}

```

질문 # 301

You have an Azure Cognitive Search solution and an enrichment pipeline that performs Sentiment Analysis on social media posts. You need to define a knowledge store that will include the social media posts and the Sentiment Analysis results. Which two fields should you include in the definition? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. tables
- B. objects
- C. storageContainer
- D. files
- E. storageConnectionString

정답: C,E

설명:

In Azure Cognitive Search, a knowledge store is an optional capability that allows you to persist the enriched data from a skillset (enrichment pipeline) into an Azure Storage account. This is often used when you want to further analyze or visualize enriched content, e.g., sentiment analysis results from social media posts.

When defining a knowledge store, you need:

- * storageConnectionString
- * This is required so the enrichment pipeline can connect to your Azure Storage account.
- * Without it, the knowledge store cannot persist any data.
- * storageContainer
- * This specifies the container in Blob Storage where enriched documents or projections will be stored.

* This allows you to persist the original documents and enriched outputs such as sentiment analysis scores.

Other options (not correct in this case):

* tables # This is a projection type used within a knowledge store to structure output in Table Storage, but it's not required in the definition itself.

* files # Another projection type for storing enriched documents as files in Blob Storage, but again, not a required field in the definition itself.

* objects # A projection type used for representing enriched documents as JSON objects in Blob Storage.

Thus, while tables, files, and objects are used inside projections within a knowledge store, the definition itself always requires a storage connection string and storage container.

The answer:

* A. storageContainer

* C. storageConnectionString

* Knowledge store in Azure Cognitive Search

* How to define a knowledge store

질문 # 302

You are building a chatbot by using the Microsoft Bot Framework Composer as shown in the exhibit. (Click the Exhibit tab.)

The screenshot displays the Microsoft Bot Framework Composer interface. On the left, a dialog flow is shown starting with a 'BeginDialog' event, followed by a 'Bot Asks (Text)' control with the prompt 'What is your name?'. This is followed by a 'User input (Text)' control with the property '(SCOPE).name = Input(Text)'. On the right, the configuration for the 'Text' control is shown, including 'Text Input', 'Collection information', 'Property' (set to '(SCOPE).name'), 'Output format' (set to 'string'), and 'Value' (set to 'string'). The 'Expected responses (intent)' field is set to '#TextInput_Response_FuyF4'.

The chatbot contains a dialog named GetUserDetails. GetUserDetails contains a TextInput control that prompts users for their name. The user input will be stored in a property named name.

You need to ensure that you can dispose of the property when the last active dialog ends.

Which scope should you assign to name?

- A. curn
- B. user
- C. dialog
- D. conversation

정답: C

설명:

Explanation

The dialog scope associates properties with the active dialog. Properties in the dialog scope are retained until the dialog ends.

Reference:

<https://docs.microsoft.com/en-us/composer/concept-memory?tabs=v2x>

질문 # 303

You have a chatbot that was built by using the Microsoft Bot Framework. You need to debug the chatbot endpoint remotely. Which two tools should you install on a local computer? Each correct answer presents part of the solution.

(Choose two.)

NOTE: Each correct selection is worth one point.

- A. nginx
- **B. Bot Framework Emulator**
- C. Bot Framework Composer
- D. Fiddler
- **E. ngrok**
- F. Bot Framework CLI

정답: B,E

설명:

When you want to debug a chatbot endpoint remotely that was built using the Microsoft Bot Framework, you need tools that allow you to test and tunnel your bot service to your local development environment.

1. Bot Framework Emulator

This is the official testing and debugging tool for bots built with the Microsoft Bot Framework.

It allows developers to:

Connect to a bot running locally or remotely.

Inspect messages sent and received.

Debug conversations and payloads in detail.

Required for local testing of the bot.

Correct.

2. ngrok

Ngrok is a tunneling tool that exposes your local development server (localhost) to the internet via a secure tunnel.

This is essential when debugging remotely because the Bot Framework Service (Azure Bot Service) requires a publicly accessible HTTPS endpoint for communication.

With ngrok, your local bot endpoint (e.g., `http://localhost:3978/api/messages`) is mapped to a secure public endpoint (e.g., `https://randomstring.ngrok.io/api/messages`).

Correct.

Incorrect Options

A). Fiddler

A web debugging proxy. Useful for monitoring traffic, but not required for Bot Framework remote debugging.

Incorrect.

B). Bot Framework Composer

A tool for building conversational bots visually. Not required for debugging an existing endpoint.

Incorrect.

D). Bot Framework CLI

Used for bot project management and configuration. Not specifically required for remote debugging endpoints.

Incorrect.

F). nginx

A web server/reverse proxy. Not needed for this scenario.

Incorrect.

The Answer: C. Bot Framework Emulator, E. ngrok

Microsoft References

Debug a bot locally using Bot Framework Emulator

Use ngrok with Bot Framework Emulator

질문 # 304

.....

자기한테 딱 맞는 시험준비공부자료 마련은 아주 중요한 것입니다. Itexamdump는 AI-102업계에 많이 알려져있는

덤프제공 사이트입니다. Itexamdump덤프자료가 여러분의 시험준비자료로 부족한 부분이 있는지는 구매사이트에서 무료샘플을 다운로드하여 덤프의일부분 문제를 우선 체험해보시면 됩니다. Itexamdump에서 AI-102제공해드리는 퍼펙트한 덤프는 여러분이 한방에 시험에서 통과하도록 최선을 다해 도와드립니다.

AI-102자격증참고서: <https://www.itexamdump.com/AI-102.html>

Microsoft AI-102덤프를 구매하려면 먼저Microsoft AI-102샘플문제를 다운받아 덤프품질을 검증후 주문하시면 믿음이 생길것입니다, AI-102덤프로 AI-102시험을 준비하시면 시험패스 난이도가 낮아지고 자격증 취득율 이 높ی 올라갑니다.자격증을 많이 취득하여 취업이나 승진의 문을 두드려 보시면 빈틈없이 달힌 문도 활짝 열릴것입니다, Azure AI Engineer Associate AI-102덤프에 관하여, Microsoft AI-102시험패스 가능 덤프 공급한 점이 있으시면 온라인 서비스나 메일로 상담받으시면 됩니다, 우리Itexamdump 의Microsoft AI-102인증시험덤프는 Itexamdump전문적으로 Microsoft AI-102인증시험대비로 만들어진 최고의 자료입니다.

아무것도 모르는 무지한 정령왕들이 감히 내게 명령하는 것이냐?대화를 시도조차 하지 않는 당신에 대해 우리가 뭘 알 수 있겠어요, 난 너무 놀라 흔들의자에서 굴러떨어졌어, Microsoft AI-102덤프를 구매하려면 먼저Microsoft AI-102샘플문제를 다운받아 덤프품질을 검증후 주문하시면 믿음이 생길것입니다.

100% 합격보장 가능한 AI-102시험패스 가능 덤프 최신버전 덤프
