Salesforce Certified Experience Cloud Consultant Sample Questions (Q166-Q171):

NEW QUESTION # 166
Ursa Major Solar created a public knowledge base where both authenticated customers and unauthenticated guest users can view Known articles as a self-service option to troubleshoot issues.
When creating a Knowledge article, which checkbox should be selected so that all users can view the articles?

- A. Visible to Anyone
- B. Visible to Partner
- C. Visible to Customer
- D. Visible to Public Knowledge Base

Answer: C

NEW QUESTION # 167
Cloud Kicks has packaged its Customer Support Community. The community includes navigation menu items that link to standard and custom objects.
Which two points should the Experience Cloud consultant consider when reviewing the package? Choose 2 answers

- A. Custom list views for standard objects are not included as dependencies.
- B. Custom list views for custom objects are included as dependencies.
- C. Custom list views for standard objects are included as dependencies.
- D. Custom list views for custom objects are not included as dependencies.

Answer: A,D

Explanation:
When you package your Experience Cloud site, some components and settings are included as dependencies, while others are not.
For example:
Custom list views for custom objects are not included as dependencies. You need to manually add them to your package or recreate them in the target org.
Custom list views for standard objects are not included as dependencies. You need to manually add them to your package or recreate them in the target org.

NEW QUESTION # 168
Northern Trail Outfitter is looking to implement a public Knowledge base. The company has 1, 000 articles stored in an external systems.
Some of the articles are more than 2 years old.
What should a consultant recommend to optimize the public knowledge base?

- A. Bulk-import all articles to Salesforce and achieve duplicate and outdated articles.
- B. Manually add the top performing articles to Salesforce and select Authenticated Sites as the Channel.
- C. Manually add the top performing articles to Salesforce and select the Public Knowledge Base channel.
- D. Bulk-import the top performing articles to Salesforce and select the public knowledge base channel.

Answer: D

Explanation:
To optimize the public knowledge base, a consultant should recommend to bulk-import the top performing articles to Salesforce and select the public knowledge base channel. This will allow NTO to import only the most relevant and useful articles from the external system and make them available to public users on its site. The public knowledge base channel is a feature that allows NTO to share articles with unauthenticated users on its site.

NEW QUESTION # 169
AW Computing is using the Build Your Own (LWR) template to create a site for its customers. The site will showcase blog posts written by AW Computing thought leaders.
Which component should the site creator use to dynamically populate the site with blog posts as new ones are added?

- A. Grid component with list.views
- B. CMS Connect (JSON)

- C. CMS - Single
- **D. Grid component with CMS Collections**

Answer: D

Explanation:
To dynamically populate the site with blog posts as new ones are added, CK should use a Grid component with CMS Collections. A Grid component is a component that displays content in a grid layout with rows and columns. A CMS Collection is a collection of content items that are created and managed in Salesforce CMS. CK can use a Grid component and select a CMS Collection as the content source. This will allow CK to showcase blog posts written by AW Computing thought leaders on its site and automatically update them as new ones are added.

NEW QUESTION # 170

hat are three best practices when configuring self-registration for an Experience Cloud site? Choose 3 answers

- A. Assign the standard site profile as the default for self-registration.
- **B. Create a separate profile for your self-service site and your partner portal.**
- C. Use the same profile for your self-service site and your partner portal.
- **D. Use a restrictive default profile to begin with.**
- **E. Assign a cloned standard site profile as the default for self-registration.**

Answer: B,D,E

Explanation:
Three best practices when configuring self-registration for an Experience Cloud site are A, B, and C. Self-registration is a feature that allows users to create their own accounts on your Experience Cloud site without an invitation. To configure self-registration, you need to assign a default profile for self-registered users, which determines their access level and permissions on your site. A best practice is to assign a cloned standard site profile as the default, which gives you more control over the settings and customization of the profile. Another best practice is to use a restrictive default profile to begin with, which limits the access and visibility of self-registered users until they are verified or approved by an administrator. A third best practice is to create a separate profile for your self-service site and your partner portal, which allows you to differentiate the access and functionality of different types of users on your sites.

NEW QUESTION # 171

......

our experts have rewritten the textbooks according to the exam outline of Experience-Cloud-Consultant, and have gathered all the key difficulties and made key notes, so that you can review them in a centralized manner.
