The passing score for the exam is 66%, and individuals who pass the exam receive the Linux Essentials Certificate, which is recognized globally by employers and organizations in the IT industry.

## Lpi Linux Essentials Certificate Exam - version 1.6 Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Which of the following commands extracts the contents of the compressed archive file1.tar.gz?

- A. tar -czf file1.tar.gz
- B. tar --extract file1.tar.gz
- C. ztar file1.tar.gz
- D. detar file1.tar.gz
- E. tar -xzf file1.tar.gz

**Answer: E**

Explanation:

The correct command to extract the contents of the compressed archive file1.tar.gz is tar -xzf file1.tar.gz. This command uses the following options:

-x means extract files from an archive.

-z means filter the archive through gzip, which is a compression program that reduces the size of files.

-f means use the following archive file name, which is file1.tar.gz in this case.

The other commands are incorrect for the following reasons:

tar -czf file1.tar.gz creates a compressed archive file1.tar.gz from the files specified after the command, not extract it.

ztar file1.tar.gz is not a valid command, as ztar is not a standard program or option for tar.

tar --extract file1.tar.gz is missing the -z option to handle the gzip compression, and also the -f option to specify the file name.

detar file1.tar.gz is not a valid command, as detar is not a standard program or option for tar.

## NEW QUESTION # 12

Why are web browser cookies considered dangerous?

- A. Cookies consume significant amounts of storage and can exhaust disk space.
- B. Cookies store critical data which is lost when a cookie is deleted.
- **C. Cookies support identification and tracking of users.**
- D. Cookies are always public and accessible to anyone on the internet.
- E. Cookies can contain and execute viruses and malware.

**Answer: C**

Explanation:

Explanation

Web browser cookies are small pieces of data that are stored by a website on a user's browser. They are used to remember information about the user, such as preferences, login details, shopping cart items, etc. Cookies can also be used to identify and track users across different websites, which can have implications for privacy and security. For example, cookies can be used to show targeted ads based on the user's browsing history, or to collect personal information without the user's consent. Cookies are not inherently dangerous, but they can pose some risks if they are misused or compromised by malicious actors. References:

## NEW QUESTION # 13

What is defined by a Free Software license?

- A. Details of the technical documentation each contributor has to provide.
- B. Limits on the purposes for which the licensed software may be used.
- C. The programming languages which may be used to extend the licensed program.
- **D. Conditions for modifying and distributing the licensed software.**
- E. A complete list of libraries required to compile the licensed software.

**Answer: D**

Explanation:

Explanation

A free software license is a notice that grants the recipient of a piece of software extensive rights to modify and redistribute that software. These actions are usually prohibited by copyright law, but the rights-holder (usually the author) of a piece of software can remove these restrictions by accompanying the software with a software license which grants the recipient these rights. Software using such a license is free software (or free and open-source software) as conferred by the copyright holder. Free software licenses grant users the freedom to use it for any purpose, study and change the source code and copy and redistribute the software with or without modifications. Free software must come with source code or provide access to it, while the freedom to redistribute includes

the right to give away copies gratis as well as sell copies1 References: 1: Free-software license - Wikipedia

#### NEW QUESTION # 14

Which of the following commands creates an archive file work.tar from the contents of the directory ./work/?

- A. tar -cf work.tar ./work/
- B. tar -create work.tgz -content ./work/
- C. tar work > work.tar
- D. tar work.tar < ./work/
- E. tar --new work.tar ./work/

**Answer: A**

Explanation:

The correct command to create an archive file work.tar from the contents of the directory ./work/ is tar -cf work.tar ./work/. This command uses the -c option to create a new archive, the -f option to specify the file name, and the ./work/ argument to indicate the source directory. The other commands are incorrect for various reasons:

A . tar --new work.tar ./work/ is incorrect because there is no --new option in the tar command. The correct option for creating a new archive is --create or -c.

C . tar -create work.tgz -content ./work/ is incorrect because the -content option is not valid. The correct option for specifying the source files or directories is --files-from or -T. Also, the work.tgz file name implies compression, but the command does not use any compression option such as -z, -j, or -J.

D . tar work.tar < ./work/ is incorrect because the tar command does not accept input redirection from the standard input. The correct way to use the tar command is to provide the options and arguments after the command name.

E . tar work > work.tar is incorrect because the tar command does not produce output redirection to the standard output. The correct way to use the tar command is to use the -f option to specify the output file name. #### NEW QUESTION # 15

What is true about links in a Linux file system?

- A. A symbolic link can point to a file on another file system.
- B. A hard link can only point to a directory and never to a file.
- C. A symbolic link can only point to a file and not to a directory.
- D. Only the root user can create hard links.
- E. When the target of the symbolic link is moved, the link is automatically updated.

**Answer: A**

#### NEW QUESTION # 16

.....

Now, do you want to enjoy all these Lpi 010-160 Exam benefits? Looking for a simple and quick way to pass the Linux Essentials Certificate Exam - version 1.6 (010-160) exam?
