Taking SSM practice exams is also important because it helps you overcome your mistakes before the final attempt. When we talk about the SSM (6.0) - SAFe® Scrum Master (SSM) certification exam, the Scrum SSM practice test holds more scoring power

because it is all about how you can improve your SSM Exam Preparation. Exam-Killer offers desktop practice exam software and web-based SSM practice tests. These SSM practice exams help you know and remove mistakes.

To be eligible to take the Scrum SSM (SAFe 5 Scrum Master) Certification Exam, candidates must have at least one year of experience working in an Agile environment, preferably in a Scrum Master role. They should also have a good understanding of Agile principles and values, as well as the Scrum framework.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q89-Q94):

NEW QUESTION # 89

What is one anti-pattern that indicates a team is overcommitting to work?

- A. Capacity and load are exactly the same
- B. Flow time is decreasing
- C. Team members are pulling in work from future Iterations
- D. Team velocity increases over time

Answer: C

Explanation:

In the Scaled Agile Framework (SAFe), sustainable pace and predictable delivery are essential for high-performing Agile teams. An important signal that a team may be overcommitting to work is when team members begin pulling in work from future Iterations before completing the committed iteration backlog.

This behavior is an anti-pattern because it disrupts the cadence and predictability of the Agile Release Train (ART). It also undermines flow and focus, spreading the team's effort too thin across multiple iterations and reducing quality. Overcommitting leads to burnout, missed commitments, and lower morale, which negatively affect the team's long-term velocity and dependability.

According to SAFe:

"Teams should plan only as much work as they can complete within the iteration based on historical velocity and available capacity. Pulling work from future iterations indicates overcommitment or lack of focus on the planned goals." Therefore, C. Team members are pulling in work from future Iterations is the correct answer-it's a clear symptom of overcommitment and poor iteration discipline.

NEW QUESTION # 90

What is a typical measurement in Kanban?

- A. Queue length
- B. Velocity
- C. Average WIP
- D. Code quality

Answer: C

NEW QUESTION # 91

What type of anti-pattern is below: "The Agile Team has more than one Product Owner."

- A. Please note down your answer
- B. A Structural Anti-Pattern

Answer: A

NEW QUESTION # 92

(Select 3) Which of the following have acceptance criteria?

- A. Business Capabilities
- B. Portfolio Enabler Epics
- C. Enabler Features
- D. Strategic Themes
- E. Spikes

- F. Program Epics

Answer: A,C,E

NEW QUESTION # 93

Team A wants to use the IP Iteration to continue their "usual work." What is one benefit the Scrum Master/Team Coach could share with the team about using the IP Iteration as intended?

- A. The team can consider additional retrospective action items
- B. The team can perform needed system maintenance
- **C. The team can participate in hackathons**
- D. The team can find time to participate in ad hoc groups

Answer: C

Explanation:

Hackathons are one of the activities that can be done during the IP Iteration to foster innovation and learning. They allow the team members to work on whatever they want, with whomever they want, as long as the work reflects the mission of the company. The teams then demo their work to others at the end of the hackathon. Hackathons can help the team explore new ideas, technologies, and solutions that can benefit the business and the customers. They can also increase the team's engagement, creativity, and collaboration. Reference: Innovation and Planning Iteration - Scaled Agile Framework, Exam Study Guide: SSM (6.0) - SAFe® Scrum Master
