

# Pass Guaranteed Quiz Microsoft - AZ-801 - Perfect Configuring Windows Server Hybrid Advanced Services Questions Pdf

BTW, DOWNLOAD part of Test4Sure AZ-801 dumps from Cloud Storage: <https://drive.google.com/open?id=1hkwk9D-OapUKTYvbmQ5Jn5F-8fvwegZo>

The "Test4Sure" is one of the top-rated and reliable platforms that offer real, valid, and updated Configuring Windows Server Hybrid Advanced Services (AZ-801) exam questions in three different formats. The names of these formats are Test4Sure AZ-801 PDF dumps file, desktop practice test software, and web-based practice test software. All these three Test4Sure AZ-801 Exam Questions formats are easy to use and perfectly work with desktop computers, laptops, tabs, or even on your smartphone devices.

Microsoft AZ-801 Exam is a certification test designed for IT professionals who are interested in configuring and managing Windows Server Hybrid Advanced Services. AZ-801 exam is considered to be a specialist-level certification that validates the candidates' advanced knowledge and skills in hybrid and cloud solutions, identity management, virtualization, and networking infrastructure.

## AZ-801 Questions Pdf Pass Certify| Valid AZ-801 Test Discount: Configuring Windows Server Hybrid Advanced Services

Do you want your IT capability to be most authoritatively recognized? One of the best method is to pass the AZ-801 certification exam. The AZ-801 exam software designed by our Test4Sure will help you master AZ-801 Exam skills. Besides, abundant materials, user-friendly design and one-year free update after payment are the best favor for you to pass AZ-801 exam.

The AZ-801 Exam is part of the Microsoft Certified: Azure Solutions Architect Expert certification path, which is designed to validate an individual's expertise in designing and implementing Azure solutions. Configuring Windows Server Hybrid Advanced Services certification path requires candidates to pass two exams, one of which must be either the AZ-900 or AZ-104 exam, and the other must be a specialized certification exam such as the AZ-801. Configuring Windows Server Hybrid Advanced Services certification path is ideal for IT professionals who want to build their expertise in designing and managing Azure solutions and want to demonstrate their skills to potential employers.

## Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q238-Q243):

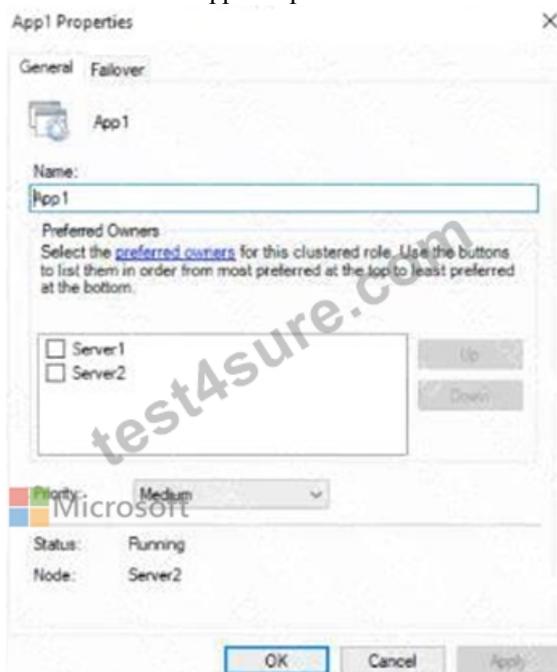

### NEW QUESTION # 238

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

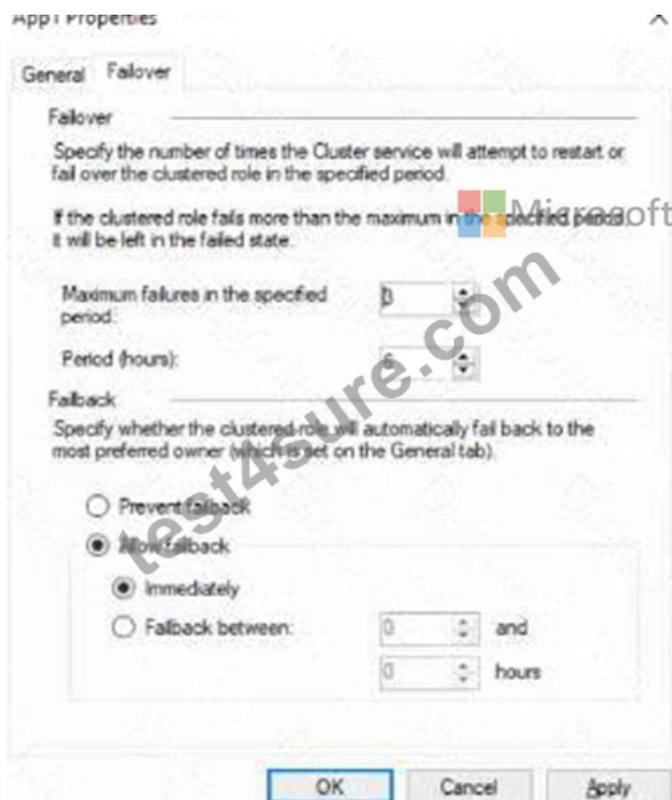

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a failover cluster named Cluster1 that hosts an application named App1.

The General tab in App1 Properties is shown in the General exhibit. (Click the General tab.)

The Failover tab in App1 Properties is shown in the Failover exhibit. (Click the Failover tab.)

Server1 shuts down unexpectedly.

You need to ensure that when you start Server1, App1 continues to run on Server2.

Solution: You increase Maximum failures in the specified period for the App1 cluster role.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

Explanation

The Maximum failures setting is used to determine when the cluster determines that a node is offline. It does not affect whether a cluster will fail back when a node comes online.

#### NEW QUESTION # 239

You need to meet the technical requirements for User1.

To which group in contoso.com should you add User1?

- A. Schema Admins
- B. Domain Admins
- C. Backup Operators
- D. Account Operators

**Answer: B**

Explanation:

Topic 2, Fabrikam inc

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes

before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is a manufacturing company that has a main office in Chicago and a branch office in Paris.

Existing Environment

Identity Infrastructure

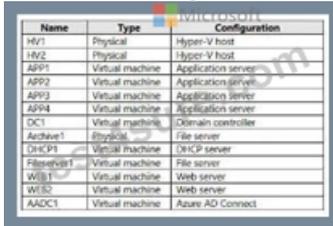

Fabrikam has an Active Directory Domain Services (AD DS) forest that syncs with an Azure Active Directory (Azure AD) tenant.

The AD DS forest contains two domains named corp.fabrikam.com and europe.fabrikam.com.

corp.fabrikam.com

Chicago Office On-Premises Servers

The office in Chicago contains on-premises servers that run Windows Server 2016 as shown in the following table.

Name	Type	Configuration
HV1	Physical	Hyper-V host
HV2	Physical	Hyper-V host
APP1	Virtual machine	Application server
APP2	Virtual machine	Application server
APP3	Virtual machine	Application server
APP4	Virtual machine	Application server
DC1	Virtual machine	Domain controller
Archive1	Physical	File server
DHCP1	Virtual machine	DHCP server
FileServer1	Virtual machine	File server
WEB1	Virtual machine	Web server
WEB2	Virtual machine	Web server
AADC1	Virtual machine	Azure AD Connect

All the servers in the Chicago office are in the corp.fabrikam.com domain.

All the virtual machines in the Chicago office are hosted on HV1 and HV2. HV1 and HV2 are nodes in a failover cluster named Cluster1.

WEB1 and WEB2 run an Internet Information Services (IIS) website. Internet users connect to the website by using a URL of <https://www.fabrikam.com>.

All the users in the Chicago office run an application that connects to a UNC path of \\Fileserver1\Data.

Paris On-Premises Servers

The office in Paris contains a physical server named dc2.europe.fabrikam.com that runs Windows Server 2016 and is a domain controller for the europe.fabrikam.com domain.

Network Infrastructure

The networks in both the Chicago and Paris offices have local internet connections. The Chicago and Paris offices are connected by using VPN connections.

The client computers in the Chicago office get IP addresses from DHCP1.

Security Risks

Fabrikam identifies the following security risks:

- \* Some accounts connect to AD DS resources by using insecure protocols such as NTLMv1, SMB1, and unsigned LDAP.
- \* Servers have Windows Defender Firewall enabled. Server administrators sometimes modify firewall rules and allow risky connections.

Requirements

Security Requirements

Fabrikam identifies the following security requirements:

- \* Prevent server administrators from configuring Windows Defender Firewalls rules.
- \* Encrypt all the data disks on the servers by using BitLocker Drive Encryption (BitLocker).
- \* Ensure that only authorized applications can be installed or run on the servers in the forest.
- \* Implement Microsoft Sentinel as a reporting solution to identify all connections to the domain controllers that use insecure protocols.

On-Premises Migration Plan

Fabrikam plans to migrate all the existing servers and identifies the following migration requirements:

- \* Move the APP1 and APP2 virtual machines in the Chicago office to a new Hyper-V failover cluster named Cluster2 that will run Windows Server 2022.
- \* Cluster2 will contain two new nodes named HV3 and HV4.
- \* All virtual machine files will be stored on a Cluster Shared Volume (CSV).
- \* Migrate Archive1 to a new failover cluster named Cluster3 that will run Windows Server 2022.
- \* Cluster3 will contain two physical nodes named Node1 and Node2.
- \* The file shares on Cluster3 will be a failover cluster role in active-passive mode.
- \* Migrate all users, groups, and client computers from europe.fabrikam.com to corp.fabrikam.com.
- \* The migration will be performed by using the Active Directory Migration Tool (ADMT).
- \* A computer named ADMTcomputer will be deployed to the corp.fabrikam.com domain to run ADMT migration procedures.

- \* User accounts will retain their existing password.
- \* Migrate the data share from Fileserver1 to a new server named Fileserver2 that will run Windows Server 2022. After the migration, the data share must be accessible by using the existing UNC path.

#### Azure Migration Plan

Fabrikam plans to migrate some resources to Azure and identifies the following migration requirements:

- \* Create an Azure subscription named Sub1.
- \* Create an Azure virtual network named Vnet1.
- \* Use ExpressRoute to connect the Paris and Chicago offices to Vnet1.
- \* License all servers for Microsoft Defender for servers.
- \* Migrate APP3 and APP4 to Azure.
- \* Migrate the www.fabrikam.com website to an Azure App Service web app named WebApp1.
- \* Decommission WEB1 and WEB2.

#### DHCP Migration Plan

Fabrikam plans to replace DHCP1 with a new server named DHCP2 and identifies the following migration requirements:

- \* Ensure that DHCP2 provides the same IP addresses that are currently available from DHCP1.
- \* Prevent DHCP1 from servicing clients once services are enabled on DHCP2.
- \* Ensure that the existing leases and reservations are migrated.

### NEW QUESTION # 240

You have a server that runs Windows Server and has the Web Server (IIS) server role installed. Server1 hosts a single website that has the following configurations:

- \* Is accessible by using a URL of https://www.contoso.com:8443 and has an SSL certificate that was issued by a third-party certification authority (CA) in the Microsoft Trusted Root Program
- \* Uses anonymous authentication
- \* Was developed by using PHP

You plan to use APP Service Migration Assistant to migrate the website to Azure App Service.

You need to migrate the website. The solution must minimize the number of changes made to the existing website.

What should you do manually to ensure that the website migration is successful? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On Server1:

- Change the authentication method.
- Change the listening port of the website.
- Redevelop the website code by using ASP.NET.

In Azure:

- Create an App Service plan.
- Copy the source files of the website.
- Configure a certificate and a custom domain name.

#### Answer:

Explanation:

On Server1:

- Change the authentication method.
- Change the listening port of the website.
- Redevelop the website code by using ASP.NET.

In Azure:

- Create an App Service plan.
- Copy the source files of the website.
- Configure a certificate and a custom domain name.

Explanation:

Graphical user interface, text, application Description automatically generated

On Server1:

Microsoft

- Change the authentication method.
- Change the listening port of the website.
- Redevelop the website code by using ASP.NET.

In Azure:

Microsoft

- Create an App Service plan.
- Copy the source files of the website.
- Configure a certificate and a custom domain name.

#### NEW QUESTION # 241

Your network contains an Active Directory Domain Services (AD DS) domain that has a Windows Server 2012 R2 forest and domain functional level. The domain contains the domain controllers shown in the following table.

Name	Operating System
DC1	Windows Server 2012 R2
DC2	Windows Server 2016
DC3	Windows Server 2016

You need to ensure that you can deploy a new domain controller that runs Windows Server 2025. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Remove DC2 and DC3.
- B. Upgrade DC1, DC2, and CO to Windows Server 2025.
- C. Remove DC 1.
- D. Raise the forest and domain functional level to Windows Server 2025.
- E. Raise the forest and domain functional level to Windows Server 2016.

Answer: C,E

#### NEW QUESTION # 242

You have an Azure subscription that uses Azure Monitor.

You need to create an alert rule that will generate an alert when an Azure virtual machine is turned off. Which type of signal should you use?

- A. Activity Log
- B. Service health
- C. Activity log
- D. Log

Answer: C

#### NEW QUESTION # 243

.....
