

# Don't Miss Golden Opportunity–Download CompTIA N10-009 Dumps Now at Affordable Rates

## EXAMFORSURE

### N10-009 Dumps Demo Questions:

#### Demo Question: 1

**Note:** This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.  
Solution: From the Office 365 admin center, you assign User2 the Security Reader role.  
From the Exchange admin center, you assign User2 the Help Desk role.  
Does this meet the goal?

- A. Yes
- B. NO

**Answer: B**

P.S. Free & New N10-009 dumps are available on Google Drive shared by PracticeDump: <https://drive.google.com/open?id=1N2VKqwU0RW0i5jo3R-3pJyBJ8ytPg8q5>

We have technicians to check the website every day, and therefore if you choose us, you can enjoy a safe online shopping environment. In addition, N10-009 exam materials are compiled and verified by professional specialists, and therefore the questions and answers are valid and correct. N10-009 learning materials cover most of knowledge points for the exam, and you can master them as well as improve your professional ability in the process of learning. You can receive the download link and password within ten minutes after paying for N10-009 Exam Dumps, if you don't receive, you can contact us, and we will solve this problem for you.

### CompTIA N10-009 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>Networking Concepts: For network administrators and IT support professionals, this domain covers</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>Cloud concepts and connectivity options, and Common networking ports.</li></ul>  |
| Topic 3 | <ul style="list-style-type: none"><li>OSI reference model concepts, Comparison of networking appliances, applications, and functions</li></ul>   |
| Topic 4 | <ul style="list-style-type: none"><li>Network Operations: For IT operations staff and network operations center (NOC) technicians, this part of the exam covers the purpose of organizational processes and procedures and use of network monitoring technologies.</li></ul> |
| Topic 5 | <ul style="list-style-type: none"><li>Network Implementation: For network technicians and junior network engineers, this section covers Characteristics of routing technologies, Configuration of switching technologies and features, and</li></ul>                         |

## Valid N10-009 Dumps, Exam Dumps N10-009 Zip

Our N10-009 exam materials have three different versions: the PDF, Software and APP online. All these three types of N10-009 learning quiz win great support around the world and all popular according to their availability of goods, prices and other term you can think of. N10-009 practice materials are of reasonably great position from highly proficient helpers who have been devoted to their quality over ten years to figure your problems out and help you pass the exam easily.

### CompTIA Network+ Certification Exam Sample Questions (Q109-Q114):

#### NEW QUESTION # 109

Which of the following is most closely associated with a dedicated link to a cloud environment and may not include encryption?

- A. VPN
- B. Captive portal
- C. Internet gateway
- D. Direct Connect

**Answer: D**

Explanation:

Direct Connect refers to a dedicated network connection between an on-premises network and a cloud service provider (such as AWS Direct Connect). This link bypasses the public internet, providing a more reliable and higher-bandwidth connection. It may not inherently include encryption because it relies on the security measures of the dedicated physical connection itself.

In contrast, other options like VPN typically involve encryption as they traverse the public internet.

#### NEW QUESTION # 110

A network engineer is completing a new VoIP installation, but the phones cannot find the TFTP server to download the configuration files. Which of the following DHCP features would help the phone reach the TFTP server?

- A. Exclusions
- B. Scope
- C. Options
- D. Lease time

**Answer: C**

Explanation:

DHCP Options: DHCP options allow additional configuration parameters, such as the address of a TFTP server, to be provided to clients during the DHCP lease process. This is essential for VoIP phones to locate the server for configuration files.

Exclusions (A): Prevents certain IP addresses from being assigned by DHCP but does not direct devices to servers.

Lease time (B): Determines how long an IP address is assigned but does not impact TFTP settings.

Scope (D): Defines a range of IP addresses but does not include additional server information.

#### NEW QUESTION # 111

A network administrator is developing a method of device monitoring with the following requirements:

Allows for explicit, by user, privilege management

Includes centralized logging of changes

Offers widely accessible remote management

Provides support of service accounts

Which of the following will most closely meet these requirements?

- A. SIEM
- **B. API**
- C. SNMP
- D. SSO

**Answer: B**

Explanation:

Comprehensive and Detailed Step-by-Step

API (Application Programming Interface) enables secure and granular access control, remote management, and logging, making it ideal for network monitoring.

SNMP (A) is mainly used for device monitoring but lacks centralized logging and user-based privilege control.

SIEM (C) is a security monitoring tool focused on log collection, not device management.

SSO (D) is related to authentication, not monitoring.

Reference: CompTIA Network+ N10-009 Official Documentation - Network Monitoring & Management Technologies.

### NEW QUESTION # 112

An organization moved its DNS servers to new IP addresses. After this move, customers are no longer able to access the organization's website. Which of the following DNS entries should be updated?

- A. CNAME
- B. AAAA
- C. MX
- **D. NS**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

When an organization moves its DNS servers to new IP addresses, the NS (Name Server) records must be updated. The NS record defines which DNS servers are authoritative for a domain. If these records still point to the old IP addresses, clients will continue to query the outdated servers, leading to connectivity issues.

Breakdown of Options:

- \* A. AAAA- This record maps a domain name to an IPv6 address. Since the issue is with DNS resolution, not IP versioning, this is incorrect.
- \* B. CNAME- A CNAME (Canonical Name) record is used for domain aliasing, not for defining authoritative name servers.
- \* C. MX-Mail Exchange (MX) records direct email traffic to the correct mail server, which does not impact general website accessibility.
- \* D. NS-Correct answer. NS records must be updated to reflect the new authoritative DNS servers.

### NEW QUESTION # 113

Due to concerns around single points of failure, a company decided to add an additional WAN to the network. The company added a second MPLS vendor to the current MPLS WAN and deployed an additional WAN router at each site. Both MPLS providers use OSPF on the WAN network, and EIGRP is run internally. The first site to go live with the new WAN is successful, but when the second site is activated, significant network issues occur. Which of the following is the most likely cause for the WAN instability?

- **A. Asymmetrical routing**
- B. An incorrect IP address
- C. A changed CDP neighbor
- D. A switching loop

**Answer: A**

Explanation:

Asymmetrical routing occurs when packets take different paths to and from the destination, leading to instability in network communication. The use of two different MPLS providers with OSPF can lead to this type of routing issue, especially if the paths aren't carefully configured and managed. This can cause unexpected routing behaviors and instability in a dual-WAN setup.
