## Oracle 1Z0-1126-1 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.</li></ul>  |
| Topic 3 | <ul style="list-style-type: none"><li>Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.</li></ul>  |

|         |   |
|---------|---|
| Topic 4 | <ul style="list-style-type: none"> <li>Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.</li> </ul>               |
| Topic 5 | <ul style="list-style-type: none"> <li>Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.</li> </ul> |

### Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

Which events could impact the importing and customizing of Base Guide content?

- A. Planning for application role mapping, display groups, and translations
- B. Fusion quarterly releases, environment refresh schedules, and OGL testing window**
- C. Change management strategy, cloud implementation plan, and training needs analysis

**Answer: B**

Explanation:

Events like Fusion quarterly releases, environment refresh schedules, and the OGL testing window (option A) directly impact importing and customizing Base Guide content by altering application functionality, data states, or testing availability. These technical events can necessitate content updates or delay customization efforts. Option B involves planning activities, not events, while option C addresses broader strategies, not specific impacts on Base Guides. Option A's focus on external, time-bound factors highlights their critical influence on maintaining content accuracy and relevance during development.

#### NEW QUESTION # 25

What can information from the Application dashboard be used for?

- A. Identify high-usage days to launch messages.**
- B. Show decision-makers' feedback from end users.
- C. Deliver a full picture on the types of content.

**Answer: A**

Explanation:

The Application dashboard in OGL provides data on application usage patterns, such as peak times or high-traffic days, which can be leveraged to strategically launch messages or notifications when users are most active (option A). This timing optimization enhances visibility and engagement. Option B (types of content) aligns with the Content dashboard, not Application, while option C (feedback) pertains to the Feedback dashboard. The Application dashboard's focus on usage trends rather than content specifics or feedback makes it a tactical tool for communication planning, ensuring messages reach users at optimal moments based on their

interaction habits.

#### NEW QUESTION # 26

What is an example of project goals for go live?

- A. Assist users in logging in, touring the application, and taking care of essential tasks for day one.
- B. Complete the relevant digital learning in MyLearn.
- C. Identify OGL templates that will be relevant and in alignment with the project strategy.

**Answer: A**

Explanation:

A key go-live project goal is to assist users in logging in, touring the application, and handling essential tasks on day one (option B), ensuring immediate usability and minimal disruption. Identifying templates (option A) is a design-phase activity, while completing digital learning (option C) is preparatory, not a go-live goal. Option B focuses on practical user enablement, aligning with OGL's purpose of guiding users through critical first-day actions, making it a tangible, user-centric target for a successful launch.

#### NEW QUESTION # 27

Which of the following is an example of licensed OGL content?

- A. Process guides
- B. Display groups
- C. Fusion role mapping
- D. Machine translations
- E. Base guides

**Answer: A**

Explanation:

Process Guides (option B) are a prime example of licensed OGL content, provided as prebuilt, Oracle-authored resources within the Oracle Content library. Base Guides (option C) are also licensed but less specific as a standalone answer here, while machine translations (option A), display groups (option D), and Fusion role mapping (option E) are either features or configurations, not content types. Process Guides offer standardized process documentation, reflecting Oracle's licensed offerings to support implementations, making them a clear fit.

#### NEW QUESTION # 28

Which OGL analytics dashboard provides information about user logins and activity including unique users over time?

- A. Content dashboard
- B. Activity dashboard
- C. Feedback dashboard
- D. Users dashboard

**Answer: D**

Explanation:

The Users dashboard in OGL focuses on user-specific metrics, such as login frequency, unique users over time, and overall activity within the console. This makes it the go-to tool for understanding who is accessing OGL and how often, providing a longitudinal view of user adoption. The Feedback dashboard (option A) deals with user ratings, the Content dashboard (option B) tracks content inventory, and the Activity dashboard (option C) focuses on guide usage, not user logins. The Users dashboard's emphasis on login and activity data offers critical insights for assessing system reach and engagement, perfectly matching the question's scope.
