It is a globally recognized certification that demonstrates a deep understanding of the Health Cloud platform and the ability to implement it effectively. With this certification, professionals can prove their expertise to potential employers and clients, and differentiate themselves in a competitive job market.

Salesforce Health Cloud Accredited Professional Sample Questions (Q93-Q98):

NEW QUESTION # 93
Which objects are leveraged to track patient referrals?

- A. Care Program Enrollee
- B. Lead
- C. Care Request
- D. Cases

Answer: B

Explanation:
According to the Health Cloud Implementation Guide, Lead is the object that is leveraged to track patient referrals. Lead is a standard object that represents a potential customer or patient who has expressed interest in a product or service. Leads can be converted into person accounts or contacts when they are qualified. Care Request, Care Program Enrollee, and Cases are not objects that are used to track patient referrals.

NEW QUESTION # 94
Care Requests seek authorization from a health plan for drugs, services, and admissions. They can also contain request for review, appeals, complaints and grievances. Which Care Request review ensure that a member is getting the right care in timely and cost-effective way?

- A. Disposition Review
- B. Retrospective Review
- C. Concurrent Review
- D. Care Review
- E. Preauthorization Review

Answer: C

NEW QUESTION # 95
In which three ways does Health cloud meet compliance and regulatory requirements? (Choose three.)

- A. Health cloud is HIPAA certified
- B. Health cloud is HITRUST certified
- C. Health cloud is HL-7 Compliant
- D. Health Cloud helps HLS organization achieve HIPAA Compliance

- E. Health cloud is GDPR certified

Answer: A,C,D

NEW QUESTION # 96
What is the recommended approach to create patients' records used in HC?

- A. Patient object to convert leads into contacts.
- B. Create as Person Accounts or Leads for referrals
- C. Use Patient Data Import Wizard for importing up to 50,000 records.
- D. Create patient records using Patient Loader WizarD.

Answer: B

NEW QUESTION # 97
Bloomington Caregivers want to offer its patients remote monitoring to bring data from patient devices into Health Cloud.
Which set of records should an administrator populate to implement this functionality?

- A. Code Sets, Biometrics, Care Observations, Chart Metrics
- B. Units of Measure, Code Sets, Remote Monitoring Device Types, Care Episodes
- C. Units of Measure, Remote Monitoring Device Types, Care Observations, Code Sets
- D. code Sets, Units of Measure, Care Metric Targets, Care Observations

Answer: C

Explanation:
To enable Bloomington Caregivers to offer remote monitoring and integrate patient device data into Salesforce Health Cloud, an administrator should configure the following records:
Units of Measure:
Purpose: Define the measurement units for various health metrics (e.g., kilograms for weight, mmHg for blood pressure).
Configuration: Create records in the UnitOfMeasure object to standardize how data from patient devices is interpreted and displayed.
Remote Monitoring Device Types:
Purpose: Catalog the types of devices patients use for remote monitoring (e.g., glucometers, heart rate monitors).
Configuration: Define device types to manage and organize incoming data effectively.
Care Observations:
Purpose: Record and store the health metrics and observations collected from patient devices.
Configuration: Utilize the CareObservation object to capture data such as blood glucose readings or heart rate measurements.
Code Sets:
Purpose: Standardize the types of health metrics being monitored (e.g., defining what constitutes a blood glucose measurement).
Configuration: Create code sets to ensure consistency in data categorization and reporting.
Implementation Steps:
Set Up Remote Monitoring in Health Cloud:
Navigate to Health Cloud settings to configure remote monitoring features.
Create code sets for each health metric to be monitored.
Define units of measure corresponding to these code sets.
Establish care observations to capture and store incoming data.
Configure remote monitoring device types to manage various patient devices.
By setting up these records, Bloomington Caregivers can effectively implement remote monitoring, allowing seamless integration of patient device data into Health Cloud. This setup facilitates real-time health data tracking, enhancing patient care and engagement.
