\* It requires minimal expertise, enabling non-experts to analyze process performance effectively.

\* It accelerates problem resolution by recommending specific actions to address identified challenges." (SAP Signavio Process Intelligence User Guide, section on "Benefits of Guided Analysis").

\* Explanation:

\* Option B (Supports focusing on one area at a time and drilling down to root causes):Guided analysis helps users concentrate on specific process aspects (e.g., a bottleneck) and provides tools to investigate underlying causes, such as high wait times at a specific step.

\* Option D (No expertise needed to analyze process performance):By offering predefined analytical paths and recommendations, guided analysis allows users with limited process mining knowledge to derive meaningful insights.

\* Option E (Faster resolution of process challenges by knowing which actions to take): Guided analysis provides actionable recommendations, such as eliminating redundant steps or applying specific filters, speeding up the resolution of process issues.

\* Option A (Assessing potential value of a performance indicator) is incorrect because guided analysis focuses on analyzing existing KPIs, not quantifying their potential value, which is a separate financial or strategic exercise.

\* Option C (Provides communication with experts on the process) is incorrect as guided analysis is an automated feature and does not facilitate direct communication with experts.
