NEW QUESTION # 119
Which of the following is a standard framework that provides recommendations for implementing information security controls for organizations that initiate, implement, or maintain information security management systems (ISMSs)?

- A. ISO/IEC 27035
- B. ISO/IEC 27002
- C. RFC 219G
- D. PCI DSS

Answer: B

Explanation:
ISO/IEC 27002 is a standard that provides best practice recommendations on information security controls for use by those responsible for initiating, implementing, or maintaining information security management systems (ISMSs). It covers areas such as risk assessment, human resource security, operational security, and communications security, among others, providing a framework for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving an ISM. ISO/IEC 27035 pertains to information security incident management, PCI DSS (Payment Card Industry Data Security Standard) deals with the security of cardholder data, and RFC 2196 is a guide for computer security incident response teams (CSIRTs), not a standard for implementing ISMSs.
References:The ECIH v3 curriculum includes the study of various standards and frameworks that support information security management and governance, including ISO/IEC 27002, highlighting its role in guiding organizations in implementing effective security controls.
