The Supporting Cisco Devices for Field Technicians (800-150) exam dumps are real and updated 800-150 exam questions that are verified by subject matter experts. They work closely and check all Supporting Cisco Devices for Field Technicians (800-150) exam dumps one by one. They maintain and ensure the top standard of Supporting Cisco Devices for Field Technicians (800-150) exam questions all the time.

## Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Cisco Software:</b> This section of the exam measures the skills of a Network Engineer and discusses Cisco’s software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Common Service Tasks and Tools:</b> This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Networking Foundations:</b> This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>• <b>IP stack,</b> and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>

## 800-150 Quiz Braindumps - 800-150 Pass-Sure torrent & 800-150 Exam Torrent

The customers don't need to download or install excessive plugins or software to get the full advantage from web-based Supporting Cisco Devices for Field Technicians (800-150) practice tests. Additionally, all operating systems also support this format. The third format is the desktop 800-150 practice exam software. It is ideal for users who prefer offline Supporting Cisco Devices for Field Technicians (800-150) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

### Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q97-Q102):

#### NEW QUESTION # 97

What are the steps to mount a Cisco device in a rack?

- A. Mount in rack.  
Install mounting brackets.  
Ground the device.
- B. Install mounting brackets.  
Ground the device.  
Mount in rack.
- C. Ground the device.  
Install mounting brackets.  
Mount in rack.
- **D. Install mounting brackets.  
Mount in rack.  
Ground the device.**

**Answer: D**

Explanation:

The correct sequence for mounting a Cisco device in a rack is:

**Install mounting brackets:** Attach the appropriate rack-mount brackets to the sides of the device using the screws provided. This step prepares the device for secure installation in the rack.

**Mount in rack:** Carefully place the device into the rack, aligning the brackets with the rack posts, and secure it using the appropriate rack-mount screws.

**Ground the device:** After the device is securely mounted, connect the grounding wire to the chassis grounding point and then to the facility ground. This step ensures safety and compliance with electrical standards.

This sequence is recommended to ensure both the physical security of the device and the safety of personnel during installation.

#### NEW QUESTION # 98

Which pod-based deployment model provides the most flexibility and scalability in a modern data center topology?

- A. End of Row (EoR)

- B. Fabric Extender model
- C. Spine-and-Leaf
- D. Top of Rack (ToR)

**Answer: C**

Explanation:

The Spine-and-Leaf architecture is the preferred pod-based deployment model in modern data centers because of its high scalability and flexibility. In this topology:

\* Leaf switches connect to servers and act as the access layer.

\* Spine switches function as the core layer, interconnecting all leaf switches.

This non-blocking, highly redundant model supports predictable latency, easy horizontal scaling, and load balancing, making it ideal for cloud-scale and virtualized environments.

\* Top of Rack (ToR) and End of Row (EoR) are physical cabling layouts that do not inherently provide the same level of architectural scalability.

\* Fabric Extender models extend switch ports but depend on upstream switches for intelligence, limiting flexibility.

**NEW QUESTION # 99**

Drag and drop the TFTP statements from the left onto the corresponding categories on the right.

**Answer:**

Explanation:

- lack of security features and user authentication
- simple setup and operation
- transferring small files without security concerns
- not suitable for transferring large files

**Advantages of TFTP**

- simple setup and operation
- transferring small files without security concerns

**Disadvantages of TFTP**

- lack of security features and user authentication
- not suitable for transferring large files

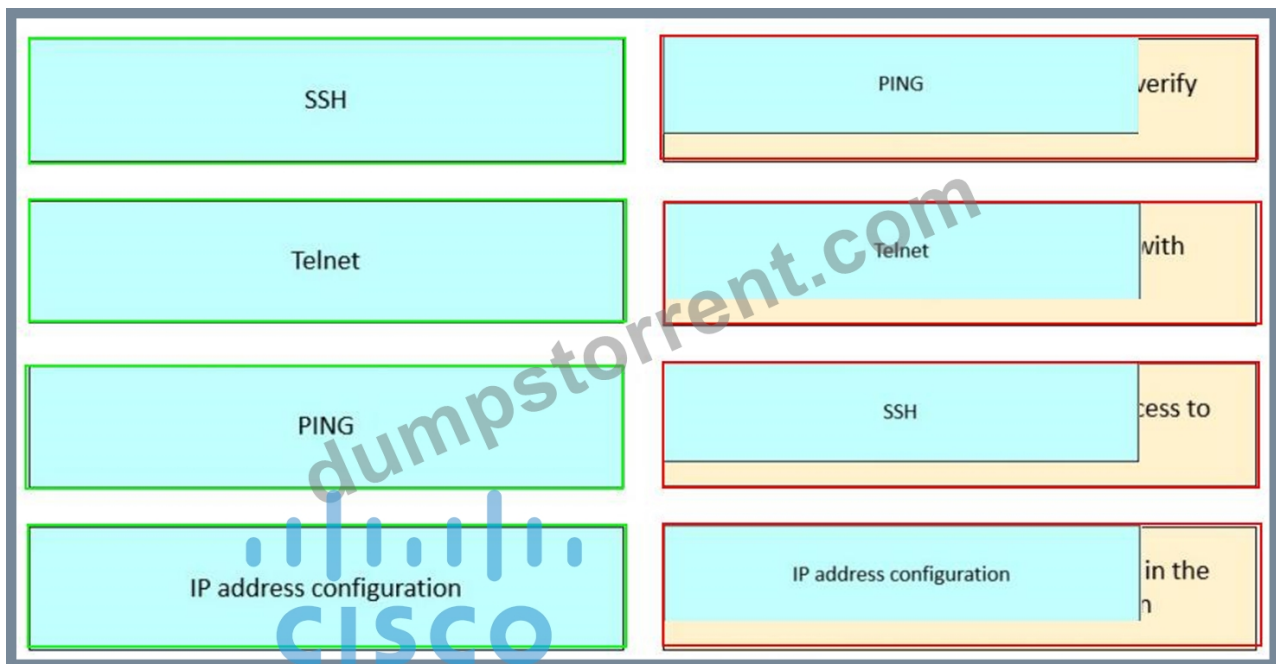

**NEW QUESTION # 100**

Drag and drop the network connectivity and management tools used to ensure connectivity from the left onto the description on the right.

SSH	sends ICMP echo request packets to verify connectivity
Telnet	allows virtual terminal connections with unencrypted traffic
PING	provides secure, encrypted remote access to network devices
IP address configuration	requires the PC and Cisco device to be in the same subnet for direct connection

Answer:

Explanation:

### NEW QUESTION # 101

Which scenario would result in a speed mismatch when configuring Ethernet devices with different speed settings?

- A. Both ends are manually set to the same speed
- **B. One end is manually set to 1 Gbps, and the other end is manually set to 100 Mbps**
- C. One end is manually set to 100 Mbps, and the other end is set to auto-negotiation
- D. Both ends are set to auto-negotiation and fail, reverting to their lowest speeds

**Answer: B**

Explanation:

A speed mismatch occurs when two connected Ethernet devices are configured to operate at different speeds. In scenario A, one device is manually set to 1 Gbps, while the other is set to 100 Mbps. Since both ends are hard-coded to different speeds, they cannot successfully negotiate a common speed, leading to a mismatch and resulting in a failed or unstable link.

In contrast, scenario B, where both ends are manually set to the same speed, ensures compatibility and stable communication. Scenario C can lead to a duplex mismatch rather than a speed mismatch; the auto-negotiating end may default to half-duplex if it cannot determine the duplex setting of the manually configured end. Scenario D is less common; if auto-negotiation fails, devices may revert to their lowest common speed, but this typically results in reduced performance rather than a complete mismatch.

### NEW QUESTION # 102

.....

Almost everyone is trying to pass the Supporting Cisco Devices for Field Technicians (800-150) certification exam to upgrade their CVs and land desired jobs. Every applicant of the Supporting Cisco Devices for Field Technicians (800-150) exam faces just one problem and that is not finding real and Latest 800-150 Exam Questions. Applicants are always confused about where to buy actual 800-150 Exam Questions and prepare successfully for the Supporting Cisco Devices for Field Technicians (800-150) exam in a short time.
