

# First-hand Juniper JN0-105 Certification Test Questions - Junos, Associate (JNCIA-Junos) Braindumps Torrent

What's more, part of that BraindumpStudy JN0-105 dumps now are free: [https://drive.google.com/open?id=1z2V7u5\\_KNIR7gk5yftuuNLIRJFAlsks5](https://drive.google.com/open?id=1z2V7u5_KNIR7gk5yftuuNLIRJFAlsks5)

As you can find on our website, we have three versions of our JN0-105 learning questions: the PDF, Software and APP online. The online test engine and window software need to run on computers. The PDF version of the JN0-105 training engine is easy to make notes. In short, all of the three packages are filled with useful knowledge. You can try our free trails before making final decisions since we also have demos of our JN0-105 Exam Materials for you to free download before your payment.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.</li></ul>

## JN0-105 Braindumps Torrent | JN0-105 Authorized Certification

Prepared by experts and approved by experienced professionals, our JN0-105 exam torrent is well-designed high quality products

and they are revised and updated based on changes in syllabus and the latest developments in theory and practice. With the guidance of our JN0-105 Guide Torrent, you can make progress by a variety of self-learning and self-assessing features to test learning outcomes. And as the high pass rate of our JN0-105 exam questions is 99% to 100%, you will be bound to pass the JN0-105 exam with ease.

## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q95-Q100):

### NEW QUESTION # 95

You are logged in to a Junos OS device with SSH and issued the show protocols | compare command in the configuration, but no output is shown.

Which statement is correct in this scenario?

- A. Someone accidentally deleted the active configuration.
- **B. There are no changes to the candidate configuration.**
- C. You must commit the configuration before any output will be shown.
- D. The command only works for interface configuration differences.

**Answer: B**

Explanation:

The show | compare command in Junos OS is used to display the differences between the candidate configuration and the active configuration. If no output is shown when you issue this command, it means that there are no changes between the candidate configuration and the active configuration. This indicates that the candidate configuration is identical to the active configuration, and thus no differences are displayed.

Reference:

"The show | compare command displays the differences between the candidate configuration and the active configuration. If there are no changes, no output is displayed."

### NEW QUESTION # 96

You are creating a new policy to accept and redistribute routes into your IGP.

In this scenario, which match criteria would you use to identify the route prefixes to select?

- **A. route-filter**
- B. instance
- C. neighbor
- D. route-type

**Answer: A**

Explanation:

When creating a new policy to accept and redistribute routes into your Interior Gateway Protocol (IGP), the route-filter match criteria is used to identify the route prefixes to select. The route-filter statement specifies which prefixes should be matched in a policy. This allows for precise control over which routes are accepted and redistributed, facilitating efficient and secure routing policies within the network.

Reference:

"show | display set | match ge-0/0/2" indicating command examples and match criteria from Useful Juniper Commands.txt. Juniper official documentation: Routing Policy and Firewall Filters Configuration Guide.

### NEW QUESTION # 97

Exhibit

[edit]

```
user@router# set interfaces ge-0/1/2 unit 0 family inet address 172.16.101.1/24 [edit] user@router# commit check configuration check succeeds
```

[edit]

user@router#

You need to configure interface ge-0/1/2 with an IP address of 172.16.100.1/24. You have accidentally entered 172.16.101.1/24 as shown in the exhibit.

Which command should you issue to solve the problem?

- A. (edit) user@router# rollback 1
- B. [edit] user@router# rollback 0
- C. [edit] user@router# rollback 2
- D. [edit] user@router# rollback rescue

**Answer: A**

Explanation:

If you've committed a configuration and then need to revert to the previous configuration, the rollback command is used. Since the incorrect IP address has not been committed, as indicated by the commit check command being successful, issuing rollback 1 will undo the changes made in the current session, which includes the accidental entry of the IP address.

### NEW QUESTION # 98

Click the Exhibit button.

Referring the exhibit, what does the highlighted number indicate?

- A. route preference is 5
- B. metric is 5
- C. cost is 5
- D. hop count is 5

**Answer: A**

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

### NEW QUESTION # 99

A network administrator is attempting to route traffic on a Juniper switch to one of three different VLANs:

Prod, Test, and Dev. Each VLAN has been assigned a numerical value.

In this scenario, what are these numerical values called?

- A. tags
- B. interfaces
- C. names
- D. defaults

**Answer: A**

Explanation:

In the context of VLANs (Virtual Local Area Networks) on a Juniper switch, the numerical values assigned to each VLAN, such as those for Prod, Test, and Dev, are known as VLAN tags. These tags are part of the 802.1 Q VLAN standard, which allows multiple VLANs to coexist on a single physical network. Each tag uniquely identifies the VLAN to which a frame belongs, enabling the switch to segregate and manage traffic based on VLAN membership. This tagging mechanism allows for efficient traffic separation and management, ensuring that devices within one VLAN do not receive traffic intended for another, thus maintaining network security and efficiency.

### NEW QUESTION # 100

.....

The format name of Juniper JN0-105 practice test questions is Juniper PDF Questions file, desktop practice test software, and web-based practice test software. Choose the right type of Junos, Associate (JNCIA-Junos) JN0-105 Practice Exam Questions that fit your JN0-105 exam preparation requirement and budget and start preparation without wasting further time.
