Answer: B

NEW QUESTION # 57

Refer to the diagram. Users at an internal system want to ssh to the SSH server. The server is configured to respond only to the ssh requests coming from IP 172.16.16.1.

In order to reach the SSH server only from the Trust zone, which Security rule and NAT rule must be configured on the firewall?

- A. NAT Rule:
Source Zone: Trust -
Source IP: 192.168.15.0/24 -
Destination Zone: Trust -
Destination IP: 192.168.15.1 -
Destination Translation: Static IP / 172.16.15.10
Security Rule:
Source Zone: Trust -
Source IP: 192.168.15.0/24 -
Destination Zone: Server -
Destination IP: 172.16.15.10 -
Application: ssh
- B. NAT Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Server -
Destination IP: 172.16.15.10 -
Source Translation: Static IP / 172.16.15.1
Security Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Trust -
Destination IP: 172.16.15.10 -
Application: ssh
- C. NAT Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Server -
Destination IP: 172.16.15.10 -
Source Translation: dynamic-ip-and-port / ethernet1/4
Security Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Server -
Destination IP: 172.16.15.10 -
Application: ssh
- D. NAT Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Trust -
Destination IP: 192.168.15.1 -
Destination Translation: Static IP /172.16.15.10
Security Rule:
Source Zone: Trust -
Source IP: Any -
Destination Zone: Server -
Destination IP: 172.16.15.10 -
Application: ssh

Answer: C

NEW QUESTION # 58

A company configures its WildFire analysis profile to forward any file type to the WildFire public cloud. A company employee receives an email containing an unknown link that downloads a malicious Portable Executable (PE) file.

What does Advanced WildFire do when the link is clicked?

- A. Performs malicious content analysis on the linked page and the corresponding PE file
- B. Performs malicious content analysis on the linked page; but not the corresponding PE file
- C. Does not perform malicious content analysis on the linked page but performs it on the corresponding PE file
- D. Does not perform malicious content analysis on either the linked page or the corresponding PE file

Answer: A

NEW QUESTION # 59

A security engineer wants to upgrade the company's deployed firewalls from PAN-OS 10.1 to 11.0.x to take advantage of the new TLSv1.3 support for management access.

What is the recommended upgrade path procedure from PAN-OS 10.1 to 11.0.x?

- A. Required: Download and install the latest preferred PAN-OS 10.1 maintenance release and reboot. Required: Download PAN-OS 10.2.0. Optional: Install the latest preferred PAN-OS 10.2 maintenance release. Required: Download PAN-OS 11.0.0. Required: Download and install the desired PAN-OS 11.0.x.
- B. Optional: Download and install the latest preferred PAN-OS 10.1 release. Optional: Install the latest preferred PAN-OS 10.2 maintenance release. Required: Download PAN-OS 11.0.0. Required: Download and install the desired PAN-OS 11.0.x.
- C. Required: Download and install the latest preferred PAN-OS 10.1 maintenance release and reboot. Required: Download PAN-OS 10.2.0. Required: Download and install the latest preferred PAN-OS 10.2 maintenance release and reboot. Required: Download PAN-OS 11.0.0. Required: Download and install the desired PAN-OS 11.0.x.
- D. Required: Download PAN-OS 10.2.0 or earlier release that is not EOL. Required: Download and install the latest preferred PAN-OS 10.2 maintenance release and reboot. Required: Download PAN-OS 11.0.0. Required: Download and install the desired PAN-OS 11.0.x.

Answer: C

Explanation:

Palo Alto Networks recommends following a specific upgrade path when upgrading PAN-OS to ensure compatibility and minimize the risk of issues. The recommended path involves sequential upgrades through major releases.

B: The detailed upgrade path from PAN-OS 10.1 to 11.0.x involves:

* First, upgrading to the latest preferred maintenance release of the current PAN-OS version (10.1) to ensure that all the latest fixes and improvements are applied.

* Next, upgrading to the base version of the next major release (PAN-OS 10.2.0), followed by upgrading to the latest preferred maintenance release of PAN-OS 10.2. This step ensures that the firewall is on a stable and supported version before proceeding to the next major release.

* Finally, upgrading to the base version of PAN-OS 11.0 (11.0.0), followed by the desired PAN-OS 11.0.x version. This step completes the upgrade to the new major version, providing access to new features and improvements, such as TLSv1.3 support for management access.

This sequential upgrade path is designed to ensure a smooth transition between major versions, maintaining system stability and security.

NEW QUESTION # 60

An administrator just submitted a newly found piece of spyware for WildFire analysis. The spyware passively monitors behavior without the user's knowledge.

What is the expected verdict from WildFire?

- A. Malware
- B. Phishing
- C. Spyware
- D. Grayware

Answer: D

Explanation:

Wildfire verdicts are as follow 1-Begin 2-Greyware 3-Malicious 4-Phishing

https://www.paloaltonetworks.com/documentation/80/wildfire/wf_admin/wildfire-overview/wildfire-concepts/verdicts

The sample does not pose a direct security threat, but might display otherwise obtrusive behavior. Grayware typically includes adware, spyware, and Browser Helper Objects (BHOs)
