Challenge is omnipresent like everywhere. By eliciting all necessary and important points into our AZ-120 practice engine, their quality and accuracy have been improved increasingly, so their quality is trustworthy and unquestionable. There is a bunch of considerate help we are willing to offer on our AZ-120 learning questions. If you have any question on downloading or opening the file, you can just contact us. And we will help you until you can use our AZ-120 exam prep.

Microsoft AZ-120 Certification Exam is ideal for professionals who are responsible for managing SAP applications and want to leverage the scalability, reliability, and security of Azure. Planning and Administering Microsoft Azure for SAP Workloads certification validates the skills and knowledge necessary to deploy and manage SAP solutions on Azure, including the ability to design an Azure infrastructure for SAP workloads, deploy SAP solutions on Azure, and monitor and maintain SAP solutions on Azure. Planning and Administering Microsoft Azure for SAP Workloads certification is designed to help professionals advance their careers by demonstrating their expertise in Azure and SAP solutions.

Best exercises of Microsoft certification AZ-120 exam and answers

Our AZ-120 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the AZ-120 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our AZ-120 study engine.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q301-Q306):

NEW QUESTION # 301

You have a large and complex SAP environment on Azure.

You are designing a training landscape that will be used 10 times a year.

You need to recommend a solution to create the training landscape. The solution must meet the following requirements:

Minimize the effort to build the training landscape.

Minimize costs.

In which order should you recommend the actions be performed for the first training session? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - Build
- 2 - Snapshot
- 3 - Custom Image
- 4 - Deliver Training
- 5 - Shutdown

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/planning-guide>

NEW QUESTION # 302

You plan to migrate an SAP environment to Azure.

You need to create a design to facilitate end-user access to SAP applications over the Internet, while restricting user access to the virtual machines of the SAP application servers.

What should you include in the design?

- A. Deploy an internal Azure Standard Load Balancer for incoming connections
- **B. Use an SAP Web Dispatcher to route all incoming connections**
- C. Configure a public IP address for each SAP application server
- D. Configure point-to-site VPN connections for each user

Answer: B

Explanation:

- * A public internet user can reach the SAP Web-Dispatcher over port 443
- * The SAP Web-Dispatcher can reach the SAP Application server over port 443
- * The App Subnet accepts traffic on port 443 from 10.0.0.0/24
- * The SAP Application server sends traffic on port 30015 to the SAP DB server
- * The DB subnet accepts traffic on port 30015 from 10.0.1.0/24.
- * Public Internet Access is blocked on both App Subnet and DB Subnet.

NEW QUESTION # 303

You have SAP ERP on Azure.

For SAP high availability, you plan to deploy ASCS/ERS instances across Azure Availability Zones and to use failover clusters.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No

You can't use an Azure Basic Load Balancer to create failover cluster solutions based on Windows Server Failover Clustering or Linux Pacemaker. Instead, you need to use the Azure Standard Load Balancer SKU.

Box 2: Yes

Azure Availability Zones is one of the high-availability features that Azure provides. Using Availability Zones improves the overall availability of SAP workloads on Azure.

The SAP application layer is deployed across one Azure availability set. For high availability of SAP Central Services, you can deploy two VMs in a separate availability set.

Box 3: Yes

You must use Azure Managed Disks when you deploy to Azure Availability Zones.

NEW QUESTION # 304

You are deploying an SAP production landscape in Azure.

You need to create an Azure policy that meets the following requirements:

* Limits which applications can be installed on virtual machines

* Ensures that when a virtual machine is deployed, the virtual machine has the latest version of the extension to be installed How should you complete the policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 305

You deploy an Azure Internal load balancer.

You deploy a node of an SAP NetWeaver 7.4 ABAP system named SP1.

You plan to deploy a second node.

You need to verify that the health probe port is configured for the cluster. The cluster IP address resource name is SAP SP1 IP.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 306

.....

The modern Microsoft world is changing its dynamics at a fast pace. To stay and compete in this challenging market, you have to learn and enhance your in-demand skills. Fortunately, with the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) certification exam you can do this job nicely and quickly. To do this you just need to enroll in the Microsoft AZ-120 Certification Exam and put all your efforts to pass the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) certification exam.
