Success is in the DumpsActual SAP C_BCBAI_2509 exam training materials. Of course you can not miss it.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q43-Q48):

NEW QUESTION # 43

What are some activities SAP recommends customers consider when integrating agent AI systems into their operations? Note: There are 3 correct answers to this question.

- A. Provide internal data for training
- B. Measure and evaluate AI agent performance
- C. Maintain expert oversight over AI agent decisions
- D. Implement change management to align teams with AI agent functions
- E. Set up an AI agent governance board to prevent ethical issues

Answer: A,B,C

NEW QUESTION # 44

What are some of the challenges LLMs face that SAP Knowledge Graph tries to deal with?

- A. Providing subjective and contextual information
- B. Generating factually incorrect or fabricated information
- C. Capturing of dynamic and real-time information
- D. Overlooking relationships between entities

Answer: B,D

Explanation:

The SAP Knowledge Graph addresses key challenges faced by large language models (LLMs), as per SAP Business AI documentation. Generating factually incorrect or fabricated information (hallucinations) is mitigated by grounding LLMs in structured, verified enterprise data, ensuring accuracy. Overlooking relationships between entities is tackled by the Knowledge Graph's ability to map and contextualize data relationships, providing a comprehensive view of interconnected information. While capturing dynamic, real-time information and providing subjective, contextual information are challenges, they are not primary focuses of the Knowledge Graph, which emphasizes structured data and factual grounding. These capabilities enhance the reliability of AI-driven insights.

NEW QUESTION # 45

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Reduce sales outstanding
- B. Enforce compliance
- C. Generate creative accounting solutions
- D. Guard against fraud
- E. Simplify error resolution

Answer: B,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com

"Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C_BCBAI_2502 certification materials.

NEW QUESTION # 46

Apart from SAP LeanIX, what other solutions does the AI agent hub support? Note: There are 2 correct answers to this question.

- A. SAP Integrated Business Planning
- **B. SAP SuccessFactors**
- **C. SAP Ariba**
- D. SAP Signavio

Answer: B,C

Explanation:

The AI agent hub supports integration with SAP SuccessFactors and SAP Ariba, in addition to SAP LeanIX, as detailed in SAP Business AI documentation. SAP SuccessFactors enables AI agents to enhance HR processes, such as recruitment and employee development, with intelligent automation. SAP Ariba supports procurement processes, leveraging AI agents for supplier management and sourcing optimization. SAP Signavio focuses on process modeling, and SAP Integrated Business Planning is not explicitly listed as supported by the AI agent hub in the documentation. These integrations allow the AI agent hub to deliver cross-functional value across SAP's ecosystem.

NEW QUESTION # 47

(What are some characteristics of trustworthy business AI? Note: There are 3 correct answers to this question.)

- A. Resourcefulness
- **B. Reliability**
- C. Reusability
- **D. Relevance**
- **E. Responsibility**

Answer: B,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Characteristics of trustworthy business AI include responsibility through ethical governance and accountability, reliability via accurate and secure operations, and relevance by grounding in business data and contexts. These ensure AI is human-centered, transparent, and beneficial for enterprise use.
