

Trustworthy CASPO-001 Practice, Valid CASPO-001 Exam Bootcamp

CASPO-001 Certified Agile Scrum Product Owner Practice Exam

1. Which of the following statements best reflects an Agile principle from the Agile Manifesto?

- A) Following a rigid plan no matter what
- B) Customer collaboration over contract negotiation
- C) Comprehensive documentation over working software
- D) Strict adherence to initial requirements

Answer: B

Explanation: The Agile Manifesto values customer collaboration over contract negotiation, emphasizing ongoing customer engagement and feedback.

2. What is the primary focus of Agile methodologies?

- A) Maximizing documentation
- B) Delivering value incrementally
- C) Minimizing team interactions
- D) Extending project timelines

Answer: B

Explanation: Agile methodologies focus on delivering value incrementally through iterative progress and continuous feedback.

3. Which of the following best describes Scrum within the Agile framework?

- A) A sequential process for project management
- B) A prescriptive methodology with fixed roles and events
- C) An iterative framework that includes roles, events, and artifacts
- D) A tool for creating Gantt charts

Answer: C

Explanation: Scrum is an iterative framework that defines specific roles, events, and artifacts to help teams work in short cycles.

4. What distinguishes Scrum from traditional project management approaches?

- A) Fixed scope and predetermined deadlines
- B) Emphasis on documentation over working software
- C) Incremental delivery and adaptive planning
- D) Centralized command and control

Answer: C

Explanation: Scrum emphasizes incremental delivery and adaptive planning, contrasting with the fixed scope and detailed upfront planning of traditional project management.

5. Which role is responsible for maximizing the value of the product in Scrum?

- A) Scrum Master
- B) Product Owner
- C) Development Team
- D) Project Manager

Answer: B

Explanation: The Product Owner is charged with maximizing the product's value by prioritizing work based on stakeholder and customer needs.

Upon passing the CASPO-001 Exam, you will receive the Certified Agile Scrum Product Owner certification, which is valid for three years. To maintain your certification, you will need to complete continuing education and professional development activities to keep your skills and knowledge up to date.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q72-Q77):

NEW QUESTION # 72

How complete should the Sprint Backlog be at the end of the Sprint Planning meeting? (Choose the best answer)

- A. The Product Owner will set the threshold for completeness
- **B. Enough to ensure there is work for the first few days of the Sprint**
- C. It depends
- D. Every task should be defined

Answer: B

Explanation:

The Sprint Backlog is a plan that evolves. The Scrum Guide states: "The Sprint Backlog is a plan by and for the Developers. It is a highly visible, real-time picture of the work that the Developers plan to accomplish during the Sprint." At Sprint Planning's end, it needs enough detail to start, with flexibility to adapt later.

* A: Correct-initial work is planned, not everything.

* B: The Product Owner doesn't control the Sprint Backlog.

* C: Full task definition isn't required; it emerges during the Sprint.

NEW QUESTION # 73

Why is it imperative that the Scrum Master attend the Daily Scrum?

- A. To get the information to update the burndown chart
- **B. They don't have to attend - they just have to ensure that the team has it**
- C. To document impediments
- D. To facilitate the meeting

Answer: B

Explanation:

The Daily Scrum is the Developers' event, not the Scrum Master's. The Scrum Guide states: "The Daily Scrum is a 15-minute event for the Developers of the Scrum Team... The Scrum Master ensures that the Developers have the meeting, but the Developers are responsible for conducting the Daily Scrum." The Scrum Master's role is to ensure it happens and is effective, not to attend mandatorily.

* A: Documenting impediments is a support task, not a Daily Scrum requirement.

* B: Facilitation is optional, only if requested.

* C: Burndown charts aren't mandated; this isn't their purpose.

NEW QUESTION # 74

The Sprint Goal is a result of Sprint Planning, as is the Sprint Backlog. True or False?

- **A. True**
- B. False

Answer: A

Explanation:

The Sprint Goal and the Sprint Backlog are both outcomes of Sprint Planning, making this statement true.

According to the Scrum Guide, Sprint Planning is an event where the Scrum Team collaborates to define the work to be performed during the Sprint. The Sprint Goal is a single objective set for the Sprint, providing focus and coherence to the work selected. It is crafted collaboratively by the Product Owner, Developers, and Scrum Master during Sprint Planning. Simultaneously, the Sprint Backlog is created, consisting of the Product Backlog items selected for the Sprint plus a plan to deliver them, aligned with the Sprint Goal. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed... This resulting plan is created by the collaborative work of the entire Scrum Team." Thus, both the Sprint Goal and Sprint Backlog emerge from this event, confirming option A as correct.

NEW QUESTION # 75

The Product Owner is accountable for the functionality included in each Increment. Does he or she have the final say over the definition of "Done"?

- A. Yes, the Product Owner is responsible for the definition of "Done". The Developers may be consulted.
- **B. No, the Scrum Team is responsible for the definition of "Done". The Product Owner may be consulted.**

Answer: B

Explanation:

The Scrum Guide clarifies that the definition of "Done" is a shared commitment created by the Scrum Team:

"The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product." While the Product Owner defines what goes into the Increment (via the Product Backlog), the definition of "Done" is a collaborative effort, often driven by the Developers' technical expertise and organizational standards, with input from the Product Owner on value and quality expectations.

Option A incorrectly gives the Product Owner sole authority, while B correctly reflects the team's collective responsibility, with the Product Owner as a contributor, not the final arbiter.

NEW QUESTION # 76

Which three of the following are true about Scrum? (Choose the best three answers)

- **A. Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex products.**
- **B. Scrum is a framework for developing and sustaining complex products.**
- **C. Scrum is based on empirical process control theory.**
- D. Scrum is like traditional processes but with self-organization to replace Project Managers.
- E. Scrum is a methodology, where you can pick and choose which parts of Scrum you think will work for your environment.

Answer: A,B,C

Explanation:

* C: The Scrum Guide defines Scrum as "a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems." This is a core truth.

* D: Scrum's foundation in empirical process control theory (transparency, inspection, adaptation) is explicitly stated in the Scrum Guide: "Scrum is founded on empiricism and lean thinking."
