Test SC-900 Practice & TrainingDump - Leader in Certification Exam Materials & SC-900: Microsoft Security, Compliance, and Identity Fundamentals

Having more competitive advantage means that you will have more opportunities and have a job that will satisfy you. This is why more and more people have long been eager for the certification of SC-900. There is no doubt that obtaining this SC-900 certification is recognition of their ability so that they can find a better job and gain the social status that they want. Most people are worried that it is not easy to obtain the certification of SC-900, so they dare not choose to start. We are willing to appease your troubles and comfort you. We are convinced that our SC-900 test material can help you solve your problems. Compared to other learning materials, our products are of higher quality and can give you access to the SC-900 certification that you have always dreamed of. Now let me introduce our SC-900 test questions for you. I will show you our study materials.

Microsoft Security, Compliance, and Identity Fundamentals Sample Questions (Q174-Q179):

NEW QUESTION # 174
What is an assessment in Compliance Manager?

- A. A grouping of controls from a specific regulation, standard or policy.
- B. Recommended guidance to help organizations align with their corporate standards.

- C. A policy initiative that includes multiple policies.
- D. A dictionary of words that are not allowed in company documents.

Answer: B

Explanation:
Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors.
Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:
Compliance Manager helps simplify compliance and reduce risk by providing:
Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).
Workflow capabilities to help you efficiently complete your risk assessments through a single tool.
Detailed step-by-step guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results.
A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.

NEW QUESTION # 175
Which three tasks can be performed by using Azure Active Directory (Azure AD) Identity Protection? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Configure external access for partner organizations.
- B. Automate the detection and remediation of identity based-risks.
- C. Export risk detection to third-party utilities.
- D. Investigate risks that relate to user authentication.
- E. Create and automatically assign sensitivity labels to data.

Answer: B,C,D

Explanation:
Microsoft Entra ID Identity Protection is a risk-based conditional access capability that "automates the detection and remediation of identity-based risks" and enables admins to investigate risky users and sign-ins.
SCI guidance explains that Identity Protection evaluates signals such as user risk and sign-in risk, raises risk detections, and can automatically remediate by enforcing actions like password reset or blocking access via risk-based policies. The portal provides rich investigation experiences for risky users, risky sign-ins, and risk detections, allowing security teams to review evidence and confirm/dismiss risks. In addition, identity risk data can be exported through Azure Monitor/diagnostic settings and integrated with SIEM/SOAR tools, enabling "export of risk detections and security alerts to third-party solutions" for correlation and response.
Tasks such as configuring external access for partner organizations are handled by B2B collaboration features, and creating/assigning sensitivity labels belongs to Microsoft Purview Information Protection-not Identity Protection. Therefore, the tasks Identity Protection supports are: export risk detection (B), automate detection and remediation of identity-based risks (C), and investigate risks related to user authentication (D).

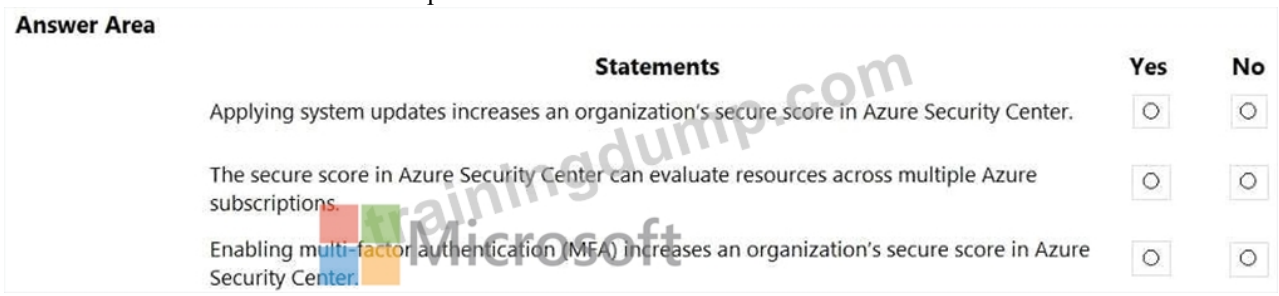
NEW QUESTION # 176
Select the answer that correctly completes the sentence.

Answer:

Explanation:

Reference:
https://docs.microsoft.com/en-us/microsoft-365/security/defender/threat-analytics?view=o365-worldwide

NEW QUESTION # 177
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.



Answer:

Explanation:

Reference:
