

Valid Dumps 2V0-16.25 Free | Test 2V0-16.25 Objectives Pdf

What's more, part of that TestKingFree 2V0-16.25 dumps now are free: <https://drive.google.com/open?id=1dbZeLUq12dU6e72D4eCyLvu4Oht3qGuX>

Elementary 2V0-16.25 practice materials as representatives in the line are enjoying high reputation in the market rather than some useless practice materials which cash in on your worries. We can relieve you of uptight mood and serve as a considerate and responsible company which never shirks responsibility. It is easy to get advancement by our 2V0-16.25 practice materials. On the cutting edge of this line for over ten years, we are trustworthy company you can really count on.

Our 2V0-16.25 study materials do not have the trouble that users can't read or learn because we try our best to present those complex and difficult test sites in a simple way. As long as you learn according to the plan of our 2V0-16.25 training materials, normal learning can make you grasp the knowledge points better. Whether you are an experienced top student or a student with poor grades, our 2V0-16.25 learning guide can help you get started quickly.

Free PDF VMware - 2V0-16.25 - Authoritative Valid Dumps VMware vSphere Foundation 9.0 Administrator Free

You can also be part of successful 2V0-16.25 exam candidates. To do this you just need to enroll in 2V0-16.25 exam and strive hard to get success in the VMware 2V0-16.25 certification exam. In this journey, the 2V0-16.25 Dumps can help you perfectly. The VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Exam Questions are the real, updated VMware vSphere Foundation 9.0 Administrator 2V0-16.25 exam practice Test that will assist you in VMware 2V0-16.25 exam preparation and enable you to pass the final VMware 2V0-16.25 exam easily.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q28-Q33):

NEW QUESTION # 28

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Disconnect the vCenter from Active Directory.
- B. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.
- **C. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.**
- D. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.

Answer: C

Explanation:

To ensure compromised users cannot access vCenter resources:

- * Assign the No Access role at the vCenter level.
- * Enable propagation so this restriction applies to all child objects.
- * This guarantees zero permissions for SUSPECT_USERS.

Other options:

- * B. Administrator with uncheck propagate# Still gives dangerous access at root level.
- * C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.
- * D. Read-only role# Still grants access, not acceptable during investigation.

NEW QUESTION # 29

An administrator is tasked to configure Service Discovery in VMware Cloud Foundation (VCF) Operations for Linux Guest Operating Systems. For security reasons a non-root user needs to be used and all required steps for the Guest OS have already been completed.

What are the two steps the administrator needs to take? (Choose two.)

- A. Deactivate Use Sudo in the Service Discovery instance.
- **B. Activate Use Sudo in the Service Discovery instance.**
- **C. Activate Service Discovery in the required VCF Operations vCenter instance.**
- D. Activate Service Discovery in the required VCF Operations NSX instance.
- E. Activate Use Sudo in the vCenter instance.

Answer: B,C

Explanation:

To configure Service Discovery for Linux Guest OS in VCF Operations using a non-root user:

- * Activate Service Discovery in the vCenter instance to start discovery operations. (B)
- * Enable Use Sudo in the Service Discovery instance so the non-root account can run necessary privileged commands. (E) Other options:

- * A. Activate Use Sudo in vCenter instance# Wrong, this is configured in Service Discovery.
- * C. Activate in NSX instance# Not applicable; Service Discovery integrates with vCenter.
- * D. Deactivate Use Sudo# Opposite of required security setting.

NEW QUESTION # 30

An administrator has enabled a Supervisor on a vSphere cluster. The DevOps team has requested access to vSphere resources such as virtual machines, storage, and networking using Kubernetes tooling. To meet this request, the administrator must provide secure,

policy-based access that sets clear boundaries for compute and storage consumption.
Which function is provided by Supervisor services to support this use case?

- A. Enable virtual machine backup using native Kubernetes ConfigMaps.
- B. Grant DevOps users administrator access to the vCenter Server system namespace.
- C. Enable vSphere Replication between Supervisor Namespaces.
- **D. Allow access to vSphere resources through Kubernetes in a configured Supervisor Namespace.**

Answer: D

Explanation:

When Supervisor is enabled:

* It provides Supervisor Namespaces, which grant DevOps teams secure, policy-based access to vSphere resources (VMs, storage, networking) through Kubernetes tooling.

* This enforces boundaries and quotas for compute/storage consumption.

Other options:

* B. VM backup via ConfigMaps# Not a feature of Supervisor.

* C. vSphere Replication between namespaces# Not a Supervisor function.

* D. Granting administrator access to vCenter system namespace# Violates least-privilege security.

NEW QUESTION # 31

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- **A. Create the widget in Explore Logs and click Add to Dashboard.**
- B. Open Management Pack Builder and clone the widget.
- C. Import the widget in the dashboard design pane.
- D. Clone the widget from an existing dashboard.
- **E. Drag and drop the widget in the dashboard design pane.**

Answer: A,E

Explanation:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

* From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)

* Dashboard Design Pane- Use the design interface to drag and drop widgets. (C) Other options:

* A. Clone widget from existing dashboard# Not a supported method.

* D. Import widget in design pane# Import is for dashboards, not individual widgets.

* E. Management Pack Builder# Not related to Logs dashboard widgets.

NEW QUESTION # 32

An administrator is tasked with enabling a Supervisor in a VMware vSphere Foundation (VVF) environment using vSphere networking and the Foundation Load Balancer. The vSAN-backed cluster has been configured with a vSphere Distributed Switch. Which two actions must the administrator perform when enabling a Supervisor using vSphere networking? (Choose two.)

- **A. Provide a static IP address range for the Supervisor control plane VMs.**
- B. Select a vSphere namespace template to define initial namespace limits.
- **C. Assign a vSphere Distributed Switch and a corresponding port group.**
- D. Enable the VM Service before deploying the Supervisor.
- E. Configure a Tier-0 Gateway with BGP or static routing.

Answer: A,C

Explanation:

When enabling a Supervisor Cluster in vSphere with Tanzu using vSphere networking and the Foundation Load Balancer:

- * You must provide a static IP range for the Supervisor control plane VMs so they can be deployed with dedicated addresses. (B)
- * You must assign a vSphere Distributed Switch (VDS) with an appropriate port group for Supervisor networking. (E) Other options:
- * A. Namespace template# Optional after Supervisor is enabled, not required at setup.
- * C. Tier-0 Gateway# Applies to NSX networking, not vSphere networking.
- * D. VM Service# Enabled after Supervisor, not a prerequisite.
