New APP HCL-HWA-ADM-102 Simulations & HCL-HWA-ADM-102 Latest Exam Fee

At Pass4Leader, we offer a HCL-HWA-ADM-102 dumps PDF, desktop HCLSoftware HCL-HWA-ADM-102 practice test software, and a web-based practice exam which is specifically designed to help you prepare for your HCLSoftware HCL-HWA-ADM-102 Certification Exam. Whether you are looking for real HCLSoftware HCL-HWA-ADM-102 dumps pdf file or practice exams to help you master the HCLSoftware HCL-HWA-ADM-102 exam, we have got you covered.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q66-Q71):

NEW QUESTION # 66

Scenario: After installing a backup dynamic domain manager in HCL Workload Automation 10.2, the switch to backup appears successful via command line, but database fields in PPS_PRODUCT_PROPERTIES still reference the original dynamic domain manager. What is the likely cause and resolution?

- A. SSL certificate mismatch; regenerate certificates.
- B. Known limitation in mixed-version environments; apply latest fix pack.
- C. Incorrect -componenttype parameter; reinstall with DDM.
- D. Database privileges issue for the installation user; grant higher privileges.
- E. Reported defect in certain versions; workaround by manually updating table or applying fix.

Answer: E

Explanation:

In some HCL Workload Automation versions including early 10.2 fix packs, switching a dynamic domain manager to backup succeeds at the file and command-line level, but certain fields in the PPS_PRODUCT_PROPERTIES table within the dynamic domain manager database remain pointed to the previous workstation. This is a known defect affecting database consistency. Resolution typically involves applying the relevant fix pack or, as a temporary workaround, manually correcting the table entries or rerunning configuration steps post-switch.

NEW QUESTION # 67

HCL HWA 10.2 Switch Event Processor geographic distribution: EU rules latency 500ms vs US 50ms. conman showswitchep shows REGIONAL_BIAS. What command configures latency-based event routing?

- A. SwitchEP auto-detects latency automatically
- B. `optman mod SWITCHEP_REGION_AWARE=YES; optman mod SWITCHEP_LATENCY_THRESHOLD=200ms`
- C. `conman switchep -geo eu-cluster -latency 200ms`
- D. `localopts SWITCHEP_GEO_FENCING=EU:200ms,US:50ms`

Answer: B

Explanation:

Regional SwitchEP routing minimizes latency. `optman mod SWITCHEP_REGION_AWARE=YES` enables geo-fencing, `optman mod SWITCHEP_LATENCY_THRESHOLD=200ms` routes EU events to eu-cluster. `conman showswitchep` confirms LATENCY=180ms EU processing.

NEW QUESTION # 68

Scenario: Uninstalling a backup MDM in 10.2 that shares the database with the primary. What must not be done during uninstall?

- A. Drop database tables
- B. Unregister from Liberty repo
- C. Delete local properties files
- D. Stop processes on backup
- E. Remove TWA_home directory

Answer: A

Explanation:

The database is shared, so dropping tables would destroy the primary's data. Uninstall removes local files and instance registration but preserves the remote/shared database.

NEW QUESTION # 69

Which planman command syntax is correct for creating an intermediate production plan (Symnew) spanning exactly 36 hours starting from a specific timestamp, accounting for timezone in a HCL Workload Automation 10.2 distributed environment?

- A. `planman crttrial Symnew -for 36:00 -days 1`
- B. `planman crt -from 01/07/2026 00:00 timezone UTC -for 36:00`
- C. `planman crt -from 01/07/2026 00:00 -for 36:00`
- D. `planman extend -for 36:00`
- E. `planman create -from 01/07/26 0000 -to 01/08/26 1200`

Answer: B,C

Explanation:

The valid syntax for creating an intermediate plan uses "crt" with -from and -for parameters specifying duration in hours:minutes. Including "timezone UTC" ensures accurate handling across distributed agents in different zones. The "create" keyword is invalid, crttrial is for trial plans, extend is not for creation, and omitting timezone might lead to localopts-based misinterpretation in global setups.

NEW QUESTION # 70

A scripting team wants to run automated maintenance jobs through the HCL Workload Automation command line without interactive prompts and with minimal exposure of credentials. They plan to use a dedicated technical user and schedule scripts from a secure operations server. How does the command-line client assemble the full set of connection parameters when some values are provided as command options and others are stored locally?

- A. It first reads parameters supplied to the command and then fills any missing ones from the localopts configuration on the same computer
- B. It always prioritizes the values found in localopts over any parameters passed on the command line
- C. It ignores local configuration when a technical user is used and relies only on environment variables
- D. It requires all parameters, including username and password, to be specified on the command line for non-interactive use

Answer: A

Explanation:

The HCL Workload Automation command-line client constructs its connection configuration by first checking for values supplied as explicit parameters to the command. For any required parameters still missing, such as hostname, port, or other connection details, the client consults the localopts file or related local properties on the same computer, allowing a mix of command-line and local configuration. This behavior enables scripts to override specific parameters where necessary while relying on centrally maintained defaults, avoiding the need to repeat full connection details in each script.

NEW QUESTION # 71

.....

You have to change the way your study. Get the best HCLSoftware Certified Administrator- HWA 10.2 HCL-HWA-ADM-102 exam questions for your text, check all the chapters, and carefully take note of the important points. You can even highlight the important ones to get a quick revision whenever you want. Cramming the HCLSoftware Certified Administrator- HWA 10.2 HCL-HWA-ADM-102 books is not a good idea because it will not help you in understanding the concept. You just read the lines, try to remember them, and believe that you can keep those lines in your mind during the HCLSoftware Certification Exams.
