## Salesforce Certified Data Cloud Consultant Sample Questions (Q96-Q101):

### NEW QUESTION # 96

What is a typical use case for Salesforce Data Cloud?

- A. Sending personalized emails at scale
- B. Data synchronization across the Salesforce ecosystem
- C. Storing CRM data on premises
- **D. Data harmonization across multiple platforms**

**Answer: D**

#### NEW QUESTION # 97

Northern Trail Outfitters wants to create a segment with customers that have purchased in the last 24 hours. The segment data must be as up to date as possible.

What should the consultant Implement when creating the segment?

- A. Use streaming insights for near real-time segmentation results.
- B. Use rapid segments with a publish interval of 1 hour.
- C. Use standard segment with a publish interval of 30 minutes.
- D. Use Einstein segmentation optimization to collect data from the last 24 hours.

**Answer: A**

#### NEW QUESTION # 98

Luxury Retailers created a segment targeting high value customers that it activates through Marketing Cloud for email communication. The company notices that the activated count is smaller than the segment count.

What is a reason for this?

- A. Marketing Cloud activations automatically suppress individuals who are unengaged and have not opened or clicked on an email in the last six months.
- B. Marketing Cloud activations only activate those individuals that already exist in Marketing Cloud. They do not allow activation of new records.
- C. Data Cloud enforces the presence of Contact Point for Marketing Cloud activations. If the individual does not have a related Contact Point, it will not be activated.
- D. Marketing Cloud activations apply a frequency cap and limit the number of records that can be sent in an activation.

**Answer: C**

Explanation:

Data Cloud requires a Contact Point for Marketing Cloud activations, which is a record that links an individual to an email address. This ensures that the individual has given consent to receive email communications and that the email address is valid. If the individual does not have a related Contact Point, they will not be activated in Marketing Cloud. This may result in a lower activated count than the segment count. #### NEW QUESTION # 99

Cumulus Financial wants to create a segment of individuals based on transaction history data. This data has been mapped in the data model and is accessible via multiple container paths for segmentation.

What happens if the optimal container path for this use case is not selected?

- A. The resulting segment will not be generated.
- B. Alternate container paths will be suggested before the segment is published.
- C. Data Cloud segmentation will automatically select the optimal container path.
- D. The resulting segment may be smaller or larger than expected.

**Answer: D**

#### NEW QUESTION # 100

What is the result of a segmentation criteria filtering on City | Is Equal To | 'San Jose'?

- A. Cities only containing 'San Jose' or 'San Jose'
- B. Cities containing 'San Jose', 'San Jose', 'san jose', or 'san jose'
- C. Cities only containing 'San Jose' or 'san jose'
- D. Cities only containing 'San Jose' or 'san jose'

**Answer: D**

Explanation:

The result of a segmentation criteria filtering on City | Is Equal To | 'San Jose' is cities only containing 'San Jose' or 'san jose'. This is because the segmentation criteria is case-sensitive and accent-sensitive, meaning that it will only match the exact value that is entered in the filter. Therefore, cities containing 'San Jose', 'san jose', or 'San Jose' will not be included in the result, as they do not match the filter value exactly. To include cities with different variations of the name 'San Jose', you would need to use the OR operator and add multiple filter values, such as 'San Jose' OR 'San Jose' OR 'san jose' OR 'san jose'
