

Pass Guaranteed SDS - Accurate Senior Data Scientist Latest Exam Experience

BONUS!!! Download part of Pass4guide SDS dumps for free: <https://drive.google.com/open?id=1V3rJW1rIkV0opS0R4aqvdAHicZpSm6TC>

Every applicant goal is to find success in the DASCA SDS exam for the very first time. Candidates make an effort to study for the DASCA SDS test and are looking for a platform that ensures they will pass the SDS Exam on the first attempt. Candidates have fear of money and time loss because of using invalid DASCA SDS practice test material.

For candidates who will attend the exam, some practice is quite necessary. Our SDS training materials contain both questions and answers, and you can have a quick check after practicing. SDS training materials cover most knowledge points for the exam, and you can have a good command of the exam if you choose us. Besides, in the process of taking, your professional ability will also be improved. We offer you free update for 365 days if you buy SDS Exam Dumps from us. And the latest version will be sent to your email automatically.

Pass Guaranteed Quiz DASCA SDS - Senior Data Scientist Pass-Sure Latest Exam Experience

Nowadays, we live so busy every day. Especially for some businessmen who want to pass the SDS exam and get related certification, time is vital importance for them, they may not have enough time to prepare for their exam. Some of them may give it up. After so many years' development, our SDS exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Believing in our SDS Guide tests will help you get the certificate and embrace a bright future. Time and tide wait for no man. Come to buy our test engine.

DASCA Senior Data Scientist Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which of the following is FALSE for Social Network Analysis (SNA)?

- A. SNA is used to investigate social structures and relationships across social networks
- B. Social Network Analysis (SNA) is an example of trend analysis**
- C. SNA characterizes networked structures in terms of nodes and the ties or edges that connect them
- D. Social Network Analysis (SNA) is an example of graph analysis
- E. None of the above

Answer: B

Explanation:

Social Network Analysis (SNA) is a powerful analytical method that applies graph theory to study relationships among entities (people, organizations, computers, etc.).

Option A: Correct. SNA is indeed an example of graph analysis because it models entities as nodes and their relationships as

edges/ties.

Option B: FALSE. SNA is not an example of trend analysis. Trend analysis focuses on temporal patterns (time series), while SNA is structural and relational.

Option C: Correct. SNA investigates structures such as communities, influencers, and information diffusion in networks.

Option D: Correct. The characterization of nodes and edges is central to SNA.

Option E: Incorrect, since we've identified Option B as false.

Thus, the false statement is Option B.

NEW QUESTION # 52

What is Scrumban?

- A. It combines the principles of Scrum and Kanban into a pull-based system
- B. It is Scrum
- C. It combines the principles of Scrum and Kanban into a push-based system
- D. It is Kanban

Answer: A

Explanation:

Scrumban is a hybrid Agile methodology that merges Scrum and Kanban to take advantage of the strengths of both.

From Scrum, Scrumban adopts structured sprint planning, roles, and iterative review cycles.

From Kanban, it borrows the visual board system, continuous workflow management, and the pull-based approach, where tasks are pulled into the workflow only when capacity is available.

The pull-based system ensures that teams do not overload themselves and helps manage work-in-progress (WIP) effectively. This makes Scrumban particularly suitable for projects with frequent changes, ongoing maintenance tasks, or teams transitioning from Scrum to Kanban.

Thus, the correct answer is Option C.

NEW QUESTION # 53

Which of the following is TRUE for data lake?

- A. The data lake can make both of the Business Intelligence and Data Science environments less agile and more productive
- B. The data lake enables organizations to gather, manage, enrich, and analyze many new sources of data, whether structured or unstructured
- C. The data lake can make both of the Business Intelligence and Data Science environments more agile and more productive
- D. The data lake enables organizations to treat data as an organizational asset to be gathered and nurtured versus a cost to be minimized
- E. None of the above

Answer: B,C,D

Explanation:

But per MCQ single-choice format # answer: A (though ideally A, B, C are correct).

A data lake is a centralized repository designed to store raw, structured, semi-structured, and unstructured data at scale. It provides: Agility and productivity (Option A): Data lakes support flexible ingestion and faster access, making BI and data science environments more efficient.

Data integration (Option B): They handle multiple types of data, enabling advanced analytics and machine learning use cases.

Data as an asset (Option C): They shift perspective, treating data as a strategic resource, not just a storage cost.

Option D: Incorrect. Data lakes improve agility, not reduce it.

Option E: Incorrect, since multiple true statements exist.

Thus, the correct choice per DASCA context is Option A (with B and C also being true).

NEW QUESTION # 54

ElementTree sub-library gives us direct access to:

- A. Delete tree of the XML
- B. Parse tree of the XML
- C. Copy tree of the XML
- D. Insert tree of the XML
- E. None of the above

Answer: B

Explanation:

In Python, the ElementTree module (part of the standard library `xml.etree.ElementTree`) provides a simple and efficient API for parsing and creating XML data.

The main feature of ElementTree is its ability to provide direct access to the parse tree of an XML document.

This allows developers to:

Parse XML into an in-memory tree structure.

Traverse, search, modify, and extract information from XML elements.

Write back changes into XML files.

Options B, C, and D (Delete, Copy, Insert tree) are not standard terminology in XML handling with ElementTree. While you can delete, insert, or copy elements, the module itself primarily gives parse tree access.

Thus, the correct answer is Option A (Parse tree of the XML).

NEW QUESTION # 55

Which of the following errors refers to the wrong negation of a true null hypothesis?

- A. Type I Error
- B. Logical Error
- C. Type II Error
- D. Hypothesis Error
- E. None of the above

Answer: A

Explanation:

In hypothesis testing, two main types of errors are defined:

Type I Error (Option A): Occurs when the null hypothesis (H_0) is true, but we incorrectly reject it. This is known as a false positive.

Example: Concluding a drug is effective when it is not.

Type II Error (Option B): Occurs when the null hypothesis (H_0) is false, but we fail to reject it. This is a false negative. Example: Concluding a drug has no effect when it actually does.

Logical Error / Hypothesis Error (Options C and D): Not standard terms in statistical hypothesis testing.

Thus, the "wrong negation of a true null hypothesis" refers to a Type I Error (false positive).

NEW QUESTION # 56

.....

Created on the exact pattern of the actual SDS tests, Pass4guide's dumps comprise questions and answers and provide all important SDS information in easy to grasp and simplified content. The easy language does not pose any barrier for any learner. The complex portions of the SDS certification syllabus have been explained with the help of simulations and real-life based instances. The best part of SDS Exam Dumps are their relevance, comprehensiveness and precision. You need not to try any other source for SDS exam preparation. The innovatively crafted dumps will serve you the best; imparting you information in fewer number of questions and answers.
